SUMMARY COMMENT
Are there particular efforts and/or issues that you would like to highlight for this reporting period related to your community's work to achieve the Reaching Home minimum requirements? In particular, please describe your community's efforts to set-up or improve the Coordinated Access governance structure, including processes to ensure that policies and protocols, as approved by the governance group(s), are being implemented across the system as intended to achieve desired results.
The Capital Regional District had been working with BC Housing over the past two years to see if the Reaching Home funded and other funded programs could participate in the local Coordinated Access and Homeless Individuals and Families Information System (HIFIS) systems. Unfortunately, this effort has not achieved the hoped for result and the Greater Victoria Community Entity has aligned itself with the other BC Community Entities to make a request to have a system that will operate separately from BC Housing. This has slowed progress in developing the policies, procedures, agreements and processes needed to support a robust Coordinated Access and Assessment (CAA) and HIFIS implementation. The Community Entity has, in partnership with its CAA partners through the CAA Advisory Committee, hired a Community Planner to begin engaging institutional and community stakeholders in the further articulation and development of the CAA system that is currently operating in the region and to support the development of a local HIFIS system to support CAA activities.
