

Making a difference...together

## Wastewater Treatment Project

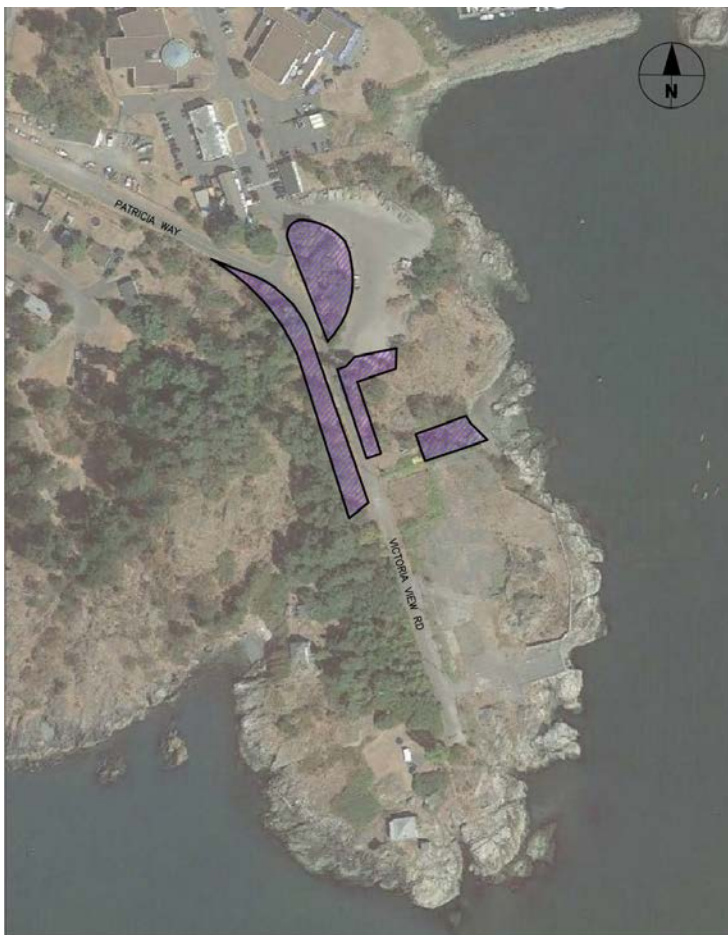

### Notice of Pre-Construction Work: McLoughlin Point

The Wastewater Treatment Project will begin some pre-construction clearing work at McLoughlin Point in the area shown on the map below pending approval from the Department of National Defence (DND).

Site preparation and landscape clearing will begin once approval has been received from DND and will take approximately ten days. The hours of work will be from 7am to 5pm, Monday to Friday. All activity will take place on DND property.

These clearing activities are starting now, so they can be completed in advance of the bird breeding period to avoid disruption of bird nests.

To contact the Wastewater Treatment Project, please e-mail [wastewater@crd.bc.ca](mailto:wastewater@crd.bc.ca).
