BIOSOLIDS PRODUCTION REPORT

Capital Regional District | April 2023

Summary of Biosolids Production & End Use

1. Amount of Biosolids Produced

Due to equipment failure at Lafarge, no Class A Biosolids produced at the Residuals Treatment Facility (RTF) were provided to Lafarge per the Definitive Plan. A total of 241 tonnes (t) were deposited in Hartland landfill.

Information on the CRD's biosolids beneficial use strategy can be found [here](#). The Definitive Plan can be found [here](#) and the Contingency Plan can be found [here](#).

Biosolids production and end use data for April 2023 is as follows:

| Biosolids Type | Produced | | End Use | | | |
|-------------------------------|--------------|---------|------------------------------|------------------------------------|---|--------------------------------|
| | | | Definitive Plan ^b | Contingency Plan: BGM ^c | Contingency Plan: Biocover ^c | Hartland Landfill ^d |
| Dried ^a Class A | This month | 241 t | 0 t | 0 t | 0 t | 241 t |
| | Year to date | 1,080 t | 0 t | 0 t | 0 t | 1,080 t |
| Non-Class A | This month | 0 t | | | | 0 t |
| | Year to date | 0 t | | | | 0 t |

^a Greater than 90% solids

^b Used as an alternative fuel at the Lafarge cement manufacturing facility in Richmond, BC

^c Land applied within the leachate containment area of Hartland Landfill

^d Class A Biosolids are rendered inert by mixing with soil and landfilled within leachate containment areas, and Non-Class A Biosolids are landfilled as a controlled waste

2. Compliance Monitoring

The CRD's contractor, Hartland Resource Management Group (HRMG), tests biosolids produced at the RTF to ensure the biosolids are Class A, as defined by the British Columbia Organic Matter Recycling Regulation (OMRR). Testing is performed by CARO Analytical Services. OMRR specifies that for Class A biosolids, metals concentrations must not exceed "those specified in Trade Memorandum T-4-93 (September 1997), Standards for Metals in Fertilizers and Supplements, as amended from time to time." The latest version of OMRR can be found [here](#) and the latest version of Trade Memorandum T-4-93 can be found [here](#). In June 2022, The Ministry of Environment

and Climate Change Strategy announced the intention to amend OMRR, including new standards for Class A biosolids. Regulatory amendments are targeted for 2023. The proposed OMRR Standards have been included in the table for reference.

Class A biosolids compliance data for April 2023 is as follows:
