|-------------------|---|-----------------------|---|-----------------------------|---|
| Project Number    | 17-01   | Capital Project Title | Historic Goldstream Powerhouse Building | Capital Project Description | Repairs of historic Goldstream Powerhouse building and work toward making the site accessible to the public |
| Project Rationale | <p>Located near the Goldstream Treatment Plant and the Sooke Hills Wilderness Trail (Trans Canada Trail), is an 1897 brick hydroelectric powerplant that served Victoria (notably the streetcars) for approx. 60 years. The Powerhouse has its own Wikipedia entry: <a href="http://en.wikipedia.org/wiki/Lubbe_Powerhouse">http://en.wikipedia.org/wiki/Lubbe_Powerhouse</a> and has captured public interest as a unique structure in BC history. An engineering condition assessment including engineered drawings, site plan and approximate cost of repairs was conducted in 2017. A major repair in the masonry on the north side of the building was completed in 2018. Further masonry and major crack repair was completed on the south side in 2019 (\$10,000). A successful grant application (\$76,000) was used in 2022 to replace the roof membrane/envelope. The approved 2023 funds are to implement basic public interpretation signage and in 2025 to plan and seek grant funding or sponsors for security gates and fencing working toward a goal to make the site available to the public from the nearby Sooke Hills Wilderness Trail.</p> |                       |   |                             |   |

| Project Number    | 18-10   | Capital Project Title | Species-at-Risk Wildlife Habitat | Capital Project Description | Assessments (office and field) and planning for managing wildlife habitat, in particular species-at-risk habitat, in the GVWSA. |
| Project Rationale | <p>An assessment (office and field) and conservation planning for management of wildlife habitat, in particular species-at-risk habitat, in the GVWSA. Funds in 2018 (\$35,000) will be used for compilation of existing knowledge of species, distribution, habitat, research. Funds in 2019 and 2020 (\$50,000 each) will be used to field verify species, critical habitat and movement corridors. Funds added in 2021 (\$25,000) are to develop GVWSA specific conservation plans based on office and field investigations. Funds added in 2023 are in anticipation of future habitat mapping and planning required to address BC Species-at-Risk requirements.</p> |                       |                                  |                             |   |

|                   |   |                       |  |                             |   |

| Project Number    | 20-05  | Capital Project Title | Leech WSA Terrestrial Ecosystem Mapping & Wetland Classification/Mapping | Capital Project Description | Classification and mapping of terrestrial ecosystems and wetlands and integration with Sooke and Goldstream data. |
| Project Rationale | The existing Leech WSA terrestrial ecosystem mapping received from the previous landowner is not consistent with that of Sooke and Goldstream WSAs. The project is to renew the ecosystem mapping to a standard that matches Sooke and Goldstream for consistent data and analysis. The project will also conduct detailed wetland mapping in the Leech WSA to a standard that matches Sooke and Goldstream for consistent data and analysis. The projects have been combined (ecosystem mapping (20-05) and wetland mapping (20-06) and moved forward from 2020 to 2021. The project has been further moved forward from 2021 to 2022. The project has been further moved forward from 2022 to 2023. It is advantageous to wait for advances in technology and partners (BC) which may improve the product and/or reduce costs. |                       |  |                             |   |

|                   |   |                       |  |                             |  |

| Project Number    | 20-06   | Capital Project Title | Addressing mining in Leech WSA (impacts, agreements) | Capital Project Description | Funding to support work to reduce the impact of mining claims in the Leech WSA |
| Project Rationale | Assessment and/or studies and/or funds to buy and cancel mining claims to mitigate impacts from mining activities and with the goal of reducing mining claims in the Leech Water Supply Area. <b>2024: A minor increase in funding is required to continue buying and cancelling mining claims.</b> |                       |  |                             |  |

|                   |   |                       |  |                             |  |
|-------------------|---|-----------------------|--|-----------------------------|--|
| Project Number    | 20-27   | Capital Project Title | GVWSA Forest Resilience - wildfire/forest modelling and forest management field trials | Capital Project Description | Modelling forest and wildfire risk under climate change scenarios & forest/fuel management field trials. |
| Project Rationale | Projects to: a). model impact of climate change on forests, forest fuel types, and associated wildfire behavior and probability and potential effects of management options; and b). trial forest and fuel management treatments that reduce wildfire risk and reduce inter tree moisture stress, such as prescribed fire and thinning. <b>Increased funding is required in 2024 to conduct trial thinning treatments. Other income to the project is anticipated from disposal (sale) of thinned logs that are merchantable.</b> |                       |  |                             |  |

|                                      |  |                       |   |                             |   |
|--------------------------------------|--|-----------------------|---|-----------------------------|---|
| Service: 2.670 Regional Water Supply |  |                       |   |                             |   |
| Project Number                       | 20-28  | Capital Project Title | GVWSA Forest Resilience - Assessments of forest health and resilience | Capital Project Description | Field assessments to better understand current forest health and resilience.            |
| Project Rationale                    | Field assessments to better understand current forest health and resilience including: increasing pine mortality, increase in bark beetle killed trees, existing advance regeneration in the understory, sedimentation sources from roads. The project funding for 2021 and 2022 is moved forward by one year to 2022 and 2023. Planned additional funding is being moved forward in the plan. <b>2025: Additional funds are required for forest health treatments.</b>  |                       |   |                             |   |
| Project Number                       | 21-20  | Capital Project Title | West Leech Road   | Capital Project Description | Plan followed by construction of a road to access the western portion of the Leech WSA. |
| Project Rationale                    | A large portion of the western Leech WSA currently has overgrown unassessed roads. Brushing, upgrade, re-surfacing and some new road construction is required to provide access to this area for wildfire response, security patrols and forest management. Funds to implement plans have been added for 2022-2024. <b>2024: The funds previously requested for 2024 have been moved forward to 2025. No change in overall budget.</b>   |                       |   |                             |   |
| Project Number                       | 23-02  | Capital Project Title | GVWSA LiDAR Mapping   | Capital Project Description | Detailed contour mapping of ground, vegetation and tree cover (3D scanning)             |
| Project Rationale                    | LiDAR (which stands for Light Detection and Ranging) uses light in the form of a pulsed laser to measure ranges (distances). LiDAR will be acquired when orthophotography or other data is collected from the air. LiDAR provides 3D information about the forest stand structure which can be used by GIS (Geographic Information Systems). LiDAR data will be used to quantify forest structure, canopy biomass, and the size and configuration of forest openings to improve understanding of forest fuel loadings and watershed disturbance processes. Initial scoping has refined a required budget of \$250,000 rather than the previously planned \$120,000. The results will be used to plan forest fuel treatments across the GVWSA. <b>2024: An additional \$50,000 is required to complete fieldwork required to validate the LiDAR analyses.</b> |                       |   |                             |   |

|          |       |                       |

| Project Number    | 22-04  | Capital Project Title | GVWSA Orthophotography | Capital Project Description | Annual contribution to capture of regional digital orthophotography for baseline mapping and monitoring. |
| Project Rationale | Every two years CRD coordinates with municipalities and other levels of government to update aerial photography of the combined areas of interest in the region and develop an overall digital mosaic image. The images of the Greater Victoria Water Supply Area are used to monitor forest disturbances and adjacent land use activities and update spatial databases. To date these funds have come from Operating budgets, making it difficult to undertake other projects in the years when the photography is being flown. The funding plan has been adjusted to provide funds every second year when it is needed rather than annually. |                       |                        |                             |  |

|                   |  |                       |  |                             |   |
|-------------------|--|-----------------------|--|-----------------------------|---|
| Project Number    | 22-09  | Capital Project Title | GVWSA Powerlines Wildfire Risk Mitigation Plan | Capital Project Description | A detailed assessment, options and plan to reduce the risk of wildfire start from tree fall onto CRD powerlines in the GVWSA. |
| Project Rationale | A powerline that supplies Sooke Dam, the Head Tank, and associated infrastructure runs along the forested slopes on the east side of Sooke Lake Reservoir. Power interruption from tree fall is an ongoing concern. Tree fall on the powerline during the summer months could start a wildfire. While the forest along the line is actively managed to reduce tree fall hazard, concerns about fire starts has prompted a call to investigate the option of clearing a much wider area along the line. Funds will be used to carry out an assessment of the feasibility and impacts of this option. <b>2024: Funds to take treatment action in 2024 (\$20,000) and 2025 (\$40,00) are requested.</b> |                       |  |                             |   |

|                   |  |                       |                              |                             |   |
|-------------------|--|-----------------------|------------------------------|-----------------------------|---|
| Project Number    | 22-10  | Capital Project Title | GVWSA/RWS Educational Videos | Capital Project Description | Development of educational videos to address Regional Water Supply issues of interest to the public such as: wildfire risk and mitigation; climate change; water supply master plan update. |
| Project Rationale | The Watershed Protection division provides educational tours of the GVWSA and Regional Water Supply infrastructure. During the COVID pandemic, operating funds dedicated to tours were instead used to develop educational videos to replace or supplement tours. Going forward, there is a desire to provide further educational material on specific topics of current public interest such as: climate change and regional water supply; GVWSA wildfire management; and the Master Plan update for regional water supply. The funding request is for development of one video per year for 2022 and 2023. Given development of a corporate wide media strategy in 2022, approved funding has been moved forward to ensure additional videos are designed to fit with the strategy and new video branding templates. <b>2024: Funds for 2024 (\$30,000) are moved forward to 2025.</b> |                       |                              |                             |   |

|          |       |                       |

|                   |   |                       |  |                             |  |
|-------------------|---|-----------------------|--|-----------------------------|--|
| Project Number    | 23-05   | Capital Project Title | Spill Management Plan and Implementation | Capital Project Description | Review, assessment and re-development of a spill management plan for the GVWSA along with potential procurement of additional equipment or supplies. |
| Project Rationale | The existing spill preparedness plan to protect water quality and other resources in the GVWSA is more than 15 years old. An external review, assessment and re-development of a more comprehensive spill management plan for the GVWSA that considers improved materials, technology and strategies is required. Funding may allow for procurement of recommended spill supplies, or a separate funding request may follow in a subsequent year. <b>2024: A request for proposal solicitation in late 2022 did not garner any bids. A revised RFP is planned with additional funding request (\$20,000).</b> |                       |  |                             |  |

|                   |  |                       |  |                             |  |
|-------------------|--|-----------------------|--|-----------------------------|--|
| Project Number    | 24-03  | Capital Project Title | Biosecurity Risk Assessment & Procedures | Capital Project Description | Assess GVWSA biosecurity risks and develop mitigating protocols/procedures |
| Project Rationale | There has already been work done to identify and assess possible sources of biosecurity risk to the GVWSA in the forms of entry of pathogens, invasive plant and animal species, contaminated soils and materials. The project is intended to document the biosecurity assessment and prepare and work with staff to implement practical procedures to mitigate the highest risks. <b>2024: The project has been moved forward to 2025. No change in budget.</b> |                       |  |                             |  |

|                   |   |                       |                                   |                             |  |
|-------------------|---|-----------------------|-----------------------------------|-----------------------------|--|
| Project Number    | 09-01   | Capital Project Title | Leech River Watershed Restoration | Capital Project Description | A 17 year project to restore the Leech WSA lands for water supply. |
| Project Rationale | A 17 year project to 2025 to restore the Leech WSA lands for water supply. An update of projects completed and planned was provided in June 2019 (RWSC Report #19-13). Funding allocated by end of 2025 will be \$5,517,000; however total capital expenditure in the Leech WSA is higher when separate projects to install major bridges and inventory and assess forests is considered. |                       |                                   |                             |  |

|                   |   |                       |                             |                             |   |
|-------------------|---|-----------------------|-----------------------------|-----------------------------|---|
| Project Number    | 16-06   | Capital Project Title | Goldstream IWS Field Office | Capital Project Description | Renewal of Water Quality field office/lab and equipment storage and Watershed Protection office, yard, training space and equipment storage, replacing longstanding temporary facilities. |
| Project Rationale | Watershed Protection staff (27 FTE and 8 seasonal auxiliaries) are currently located in 2 trailers and a house at the Goldstream Gate entrance to the water supply area, and in office space at the Integrated Water Services office in View Royal. The trailers were considered temporary office space since their implementation over 15 years ago. The trailers are old, prone to leaks and a concern for mold. <b>Water Quality field staff are located in another temporary facility, since their field office was on the gravel pit property that was sold to Langford.</b> In addition, there are insufficient facilities for training, equipment storage, emergency management and public education. The separation of staff between various Goldstream facilities and the View Royal location causes inefficiencies and organizational difficulties. The IWS office is also above capacity and moving Watershed Protection staff out will extend the existing office space. <b>2024: A design build procurement process has been selected to deliver the project with a rough total project cost of \$12 million. Funding of \$ 5 million to the project is guaranteed through the completion of sale of the IWS gravel pit to Langford.</b> |                       |                             |                             |   |

|          |       |                       |

|                   |  |                       |                             |                             |  |
|-------------------|--|-----------------------|-----------------------------|-----------------------------|--|
| Project Number    | 17-02  | Capital Project Title | Leech River HydroMet System | Capital Project Description | Installation of a network of hydrometeorological stations to collect water quantity and quality information for the Leech WSA. |
| Project Rationale | A 17 year \$ 5.756 M capital plan is being carried out to restore the Leech Water Supply Area (Project #09-01) to prepare for future water needs. Historically only one hydrological measuring station was capturing flow and turbidity measurements 3.8 km downstream of the future water intake on the Leech River. In order to understand and predict the effect of precipitation, storm events and various restoration management measures on Leech River water quality and quantity, a network of hydrological measuring stations is needed further upstream in the Leech River watershed. This capital project first funded a design study of the most effective and efficient monitoring system that could be implemented (\$10,000) prior to funding implementation beginning in 2018. <b>2024: Additional funding of \$45,000 is requested to upgrade and enhance the system.</b> |                       |                             |                             |  |

|                   |  |                       |   |                             |  |
|-------------------|--|-----------------------|---|-----------------------------|--|
| Project Number    | 18-05  | Capital Project Title | GVWSA Forest Fuel Management/FireSmart Activities | Capital Project Description | Implementation of forest fuel management and FireSmart actions in strategic locations for wildfire risk management in the GVWSA. |
| Project Rationale | Wildfire is the greatest threat to water quality in the GVWSA. In 2014 - 2018 CRD staff completed two new fuel reduction corridor projects. Funding to tender contract projects is required in order to complete priority fuel management projects over and above existing staff effort which will be focused on maintenance of existing fuel managed sites. A requested increase from \$75,000 to \$100,000 annually reflects costs experienced in the first year of tendering fuel management work. The need for fuel management to address priority areas will be ongoing and funding is required annually for the 5 year period. |                       |   |                             |  |

|                   |   |                       |  |                             |  |
|-------------------|---|-----------------------|--|-----------------------------|--|
| Project Number    | 19-02   | Capital Project Title | Whiskey Creek Bridge Replacement (Sooke WSA) | Capital Project Description | Replacement of the existing undersized bridge with a longer and higher concrete structure. |
| Project Rationale | Whiskey Creek bridge is located on the Leechtown Main Road, one of the main access routes to Sooke Lake Dam and other critical IWS infrastructure. Whiskey Creek requires a larger bridge as it has been overtopped by storm events in the past and this poses water quality, environmental and safety risks. <b>2024: Project construction is moved forward from 2024 to 2025. No change in funding request.</b> |                       |  |                             |  |

|                                      |  |                       |   |                             |  |
|--------------------------------------|--|-----------------------|---|-----------------------------|--|
| Service: 2.670 Regional Water Supply |  |                       |   |                             |  |
| Project Number                       | 19-19  | Capital Project Title | Hydromet Upgrades Sooke and Goldstream        | Capital Project Description | Install additional hydrology monitoring sites on Sooke Lake Reservoir inflow streams and increase instrumentation on meteorological stations in Sooke and Goldstream watersheds. |
| Project Rationale                    | Only the main tributary inflows into Sooke Lake Reservoir are monitored. To better understand the hydrology of the Sooke watershed, additional hydrology monitoring sites are required. The existing meteorological stations in Sooke and Goldstream watersheds have only basic instrumentation and would benefit from additional sensors and upgrades to improve the quality of the meteorological data. <b>2024: \$170,000 additional funding is requested to continue to upgrade and enhance the system.</b>  |                       |   |                             |  |
| Project Number                       | 20-01  | Capital Project Title | Kapoor Main Mile 1 Bridge and Asphalt Upgrade | Capital Project Description | Replacement of the existing undersized culvert with a large bridge as well as subsequent 500 m road asphalt replacement.   |
| Project Rationale                    | The existing culvert at Mile 1 on Kapoor Main (which is the primary access road to Sooke Lake Reservoir and Dam) is undersized, has evidence of buried organics in the fill material and has oversteepend, unstable banks. The culvert will be removed and a bridge installed to improve water carrying capacity at peak flows, fish passage and bank stability. The asphalt section uphill of the bridge will also be repaired or replaced as a component of the project. <b>2024: Consulting engineer design work indicates a total construction cost of \$868,000 for the bridge. A cost driver is the significant amount of fill to remove. The 2024 budget has been increased to reflect the engineered cost estimate and to move the asphalt budget forward to 2025.</b> |                       |   |                             |  |
| Project Number                       | 20-29  | Capital Project Title | GVWSA Gravel Crushing                         | Capital Project Description | Production of gravel at existing quarries in Sooke and Goldstream WSAs.  |
| Project Rationale                    | Production of 19 mm road surfacing gravel from GVWSA quarries are required every few years to maintain roads. Gravel production needs are anticipated in 2023 and 2026. The need for additional gravel crushing in 2023 has been pushed forward by one year to 2024.   |                       |   |                             |  |
| Project Number                       | 21-26  | Capital Project Title | Road Deactivation/Rehabilitation in the GVWSA | Capital Project Description | Deactivate or rehabilitate unneeded roads in the Sooke and Goldstream WSAs.  |
| Project Rationale                    | A review was undertaken to identify roads in the Sooke and Goldstream WSAs that could be rehabilitated and removed from the road network without undue impact to operations, wildfire response and security. Funding is required over the 5 year period to make progress on the roads identified to be deactivated/rehabilitated. <b>2024: The budget for 2024 has been decreased to reflect the carryforward from 2023. The total project budget has been reduced by \$160,000.</b>   |                       |   |                             |  |

|  |  |                       |  |                             |
|--|--|-----------------------|--|-----------------------------|
| <div> <div>Service:</div> <div>2.670</div> <div>Regional Water Supply</div> </div> |  |                       |  |                             |
| Project Number   | 21-27  | Capital Project Title | Autogate Installations on Primary Access Routes              | Capital Project Description |
| Project Rationale  | Continued residential growth and corresponding increasing recreational pressure bring the public close to critical works (Goldstream Treatment Plant, and Ammonia Injection building). Recreational use of the Sooke Hills Wilderness Trail and Park also generate trespass into the GVWSA, and Drinking Water Protection Zone. Autogates improve security by 24 hour recorded keycard access operation and are located to increase security. Two autogates have been installed (2022 and 2023). <b>2024: The third and fourth autogate are being deferred by an additional year to 2025 to allow for additional design and provincial, Fortis Gas and Island Corridor Foundation approvals before the work can be tendered. \$50,000 is maintained in 2024 to add cameras to the newly installed autogates. No budget change.</b> |                       |  |                             |
| Project Number   | 22-02  | Capital Project Title | Muckpile Bridge Supply and Install (Deception)               | Capital Project Description |
| Project Rationale  | Replacement of undersized culverts with a concrete deck L100 bridge which will also improve fish passage and western toad migration. Addition of funding for design work ahead of construction. <b>2024: Construction has been moved ahead by one year to 2025, no change in budget.</b>   |                       |  |                             |
| Project Number   | 23-04  | Capital Project Title | 17S/Sooke Main Bridge Replacement                            | Capital Project Description |
| Project Rationale  | The current structure (3 concrete culverts side-by-side with a concrete deck) does not allow adequate room to pass potential storm debris. The most recent engineering inspection stated this recycled structure is in fair shape, with spalling of the concrete. The structure is planned to be replaced with a free span concrete bridge. <b>2024: The project is moved forward by one year, no change in budget.</b>  |                       |  |                             |
| Project Number   | 22-11  | Capital Project Title | Additional Boom Anchors for Sooke Lake Reservoir debris boom | Capital Project Description |
| Project Rationale  | The debris boom on Sooke Lake Reservoir with the existing anchors has the capacity to strike the Intake Tower if the boom breaks. It is recommended to add two additional anchors to ensure that if the boom breaks it will not damage the Intake Tower. An increased project budget (additional \$20,000) is required to design and install the anchors.  |                       |  |                             |

|                                      |   |                       |  |                             |  |
|--------------------------------------|---|-----------------------|--|-----------------------------|--|
| Service: 2.670 Regional Water Supply |   |                       |  |                             |  |
| Project Number                       | 23-10   | Capital Project Title | Work platform for Sooke Lake Reservoir   | Capital Project Description | A towable work platform for conducting stationary on-water work activities such as boom and intake tower maintenance and spill response. |
| Project Rationale                    | This request is for a non-powered towable dock or barge that can be moved to various project sites as required. It allows workers to easily access work on the water from a stable platform, and can allow small equipment (pumps or generators) to be operated on appropriate spill containment, and to be left in place for extended periods of time.   |                       |  |                             |  |
| Project Number                       | 23-11   | Capital Project Title | Purchase and Deployment of Second Wildfire Camera for Leech WSA, and Analytic software | Capital Project Description | A secondary wildfire camera to monitor for heat and smoke signatures in the Leech WSA during fire season.                                |
| Project Rationale                    | Rapid detection is key to taking action when fires are still small and controllable. An infrared camera network, supported by software to identify potential ignitions, can be monitored by staff and an after hours service to rapidly provide an alert to new fire starts. This allows response staff to arrive before the fire has a chance to dig in and start to spread quickly. There is an existing camera at Mount Healy that "sees" large portions of the Sooke WSA. The Leech WSA is the most remote and least visible area (to the public and staff) and there is a strong benefit to early detection. The camera may need to be supported with a tower and communications upgrades. Funding in 2023 is earmarked for analytic software for both wildfire cameras and funding in 2024 is earmarked for purchase and deployment of the additional Leech camera. |                       |  |                             |  |
| Project Number                       | 23-23   | Capital Project Title | Brushcutting head for Excavator  | Capital Project Description | The existing brushcutting head from the excavator used in roadside maintenance has reached end of life and requires replacement.         |
| Project Rationale                    | The existing brush cutting head for the excavator is past end of life and requires replacement. The old head will be disposed of and offset the cost of the new head.   |                       |  |                             |  |
| Project Number                       | 24-05   | Capital Project Title | Dock for Sooke Lake Reservoir  | Capital Project Description | Sooke Lake Reservoir requires a dock for safe deployment of boats, gear and crew.  |
| Project Rationale                    | Water Quality and Watershed Protection staff are required to go out on Sooke Lake Reservoir routinely, as well as in emergency situations. Sooke Lake Reservoir does not have a dock, beyond lockblocks that extend into the lake. It is unsafe and difficult to load and unload onto boats using the existing lockblocks. Funding of \$10,000 in 2024 to design and plan a dock; with up to \$90,000 to construct the dock in 2025 is requested.   |                       |  |                             |  |

|          |       |                       |
|----------|-------|-----------------------|
| Service: | 2.670 | Regional Water Supply |
|----------|-------|-----------------------|

|                   |  |                       |                |                             |   |
|-------------------|--|-----------------------|----------------|-----------------------------|---|
| Project Number    | 25-05  | Capital Project Title | Heli Fire Tank | Capital Project Description | A large water tank for helicopter bucketing to be deployed in Goldstream WSA. |
| Project Rationale | In order to avoid potential contamination of GVWSA reserservoirs from helicopter bucketing operations during wildfire suppression, a "Heli Fire" water tank is planned to be purchased and installed seasonally in the GVWSA. These tanks are of a size and volume that allow helicopters to fill their buckets out of them. |                       |                |                             |   |

|                   |   |                       |                                       |                             |  |
|-------------------|---|-----------------------|---------------------------------------|-----------------------------|--|
| Project Number    | 22-13   | Capital Project Title | Replace Storage Sheds with Containers | Capital Project Description | Covered sand storage between sea containers that have been procured. |
| Project Rationale | The existing storage facility (sheds) in the Pipeyard used for Infrastructure Operations and Watershed Protection equipment and supplies is enclosed but not sealed from the elements or rodents, and is at end of life. Due to health and safety concerns, the sheds are to be replaced with basic seacan storage containers that can be sealed and readily moved as needs change. <b>2024: additional funds (\$20,000) are requested for a cover between sea cans to store sand, for sanding the road and area around the Goldstream Water Treatment Plant and the Field Operations Centre.</b> |                       |                                       |                             |  |

|                   |   |                       |                                  |                             |  |
|-------------------|---|-----------------------|----------------------------------|-----------------------------|--|
| Project Number    | 24-06   | Capital Project Title | Post Wildfire Assessment Program | Capital Project Description | Acquiring access to existing software programs to model sediment and debris flows from burned areas. |
| Project Rationale | The amount and location of sediment and debris that would be generated from a large wildfire in the Sooke WSA has been modelled. New software is available that makes the existing modelling and results for the GVWSA more accessible, and compares results with post-wildfire events in the Pacific Northwest to help calibrate the results and make them more relevant to the GVWSA. |                       |                                  |                             |  |

|                   |  |                       |  |                             |   |
|-------------------|--|-----------------------|--|-----------------------------|---|
| Project Number    | 24-07  | Capital Project Title | Field Operations Centre - IT Infrastructure Upgrades | Capital Project Description | The firewall, switches and telephony system are end of life and require replacement. The equipment will be transferred to the new building. |
| Project Rationale | The firewall, switches and telephony system at the Field Operations Centre are at end of life and require replacement. The replaced equipment can be transferred to a new building when ready. |                       |  |                             |   |

|  |  |  |  |  |  |

|                                      |  |                       |   |                             |  |
|--------------------------------------|--|-----------------------|---|-----------------------------|--|
| Service: 2.670 Regional Water Supply |  |                       |   |                             |  |
| Project Number                       | 16-10  | Capital Project Title | Post Disaster Emergency Water Supply                          | Capital Project Description | Identify and procure emergency systems for post disaster preparedness.   |
| Project Rationale                    | In the event of a disaster, it is proposed to have in place the ability to source, treat (if required) and distribute drinking water during the initial and sustained response and recovery phases to the public. This item will see the study of the issue in 2016 and 2017 with the anticipated purchase of one or more emergency distribution systems in 2017. Initial investigation has highlighted areas, such as having hardened hydrants/standpipes that the CRD should be investing in. Additional funds are required to continue implementing these additional works and equipment. |                       |   |                             |  |
| Project Number                       | 17-13  | Capital Project Title | Asset Management Plan   | Capital Project Description | Development of a plan to inform future areas of study and highlight critical infrastructure improvements.          |
| Project Rationale                    | This plan will bring various components together from items 14-01, 16-07, 16-08, 16-09, 16-10 and 16-11 and form a strategic plan that will identify future study and construction requirements with capital replacement budgets and schedules.  |                       |   |                             |  |
| Project Number                       | 19-15  | Capital Project Title | Hydraulic Capacity Assessment and Transient Pressure Analysis | Capital Project Description | Determine the existing level-of-service for the RWSC transmission system and conduct a transient pressure analysis |
| Project Rationale                    | The RWSC transmission is complex with all the connection points to it. Funding is required to determine the available pressures and flows throughout the transmission system and whether it is susceptible to transient pressure waves.  |                       |   |                             |  |
| Project Number                       | 20-08  | Capital Project Title | Regional Water DCC Program                                    | Capital Project Description | Design of a Regional DCC Program   |
| Project Rationale                    | The municipalities are developing and growing and may result in upgrades to maintain the level of service due to development. Funds are required to design a Regional Water Development Cost Charge program.   |                       |   |                             |  |
| Project Number                       | 20-10  | Capital Project Title | Condition & Vulnerability Assessment                          | Capital Project Description | Conduct a condition assessment of critical supply infrastructure and assess its possibility of risk.               |
| Project Rationale                    | The RWSC is a large system with infrastructure of various ages and condition. Funding is required to conduct a condition assessment of critical infrastructure, such as Humpback PRV, and assess their risk of failure and provide a high level timeline for replacement/renewal.  |                       |   |                             |  |

|                 |              |                              |
|-----------------|--------------|------------------------------|
| <b>Service:</b> | <b>2.670</b> | <b>Regional Water Supply</b> |

|                          |  |                              |                            |                                    |   |
|--------------------------|--|------------------------------|----------------------------|------------------------------------|---|
| <b>Project Number</b>    | 21-05  | <b>Capital Project Title</b> | Level of Service Agreement | <b>Capital Project Description</b> | From #19-15 & #20-11, develop level-of-service agreements for participating municipalities to address hydraulic capacity of infrastructure. |
| <b>Project Rationale</b> | The RWSC supplies water directly and indirectly to 12 municipalities. Based upon Capital Projects #19-15 and #20-11, level-of-service agreements for participating municipalities will be developed to address hydraulic capacity of infrastructure. |                              |                            |                                    |   |

|                          |   |                              |                                |                                    |  |
|--------------------------|---|------------------------------|--------------------------------|------------------------------------|--|
| <b>Project Number</b>    | 22-14   | <b>Capital Project Title</b> | Sooke River Intake Feasibility | <b>Capital Project Description</b> | A feasibility study for an intake from Sooke River to replace the Main No. 15 salmon fishery contribution, for a variety of reasons. |
| <b>Project Rationale</b> | The feasibility to construct an intake from Sooke River to replace the Main No. 15 salmon fishery contribution. |                              |                                |                                    |  |

|                          |  |                              |                           |                                    |  |
|--------------------------|--|------------------------------|---------------------------|------------------------------------|--|
| <b>Project Number</b>    | 23-12  | <b>Capital Project Title</b> | Project Delivery Strategy | <b>Capital Project Description</b> | Develop a strategy to deliver the identified projects from the 2022 RWS Master Plan. |
| <b>Project Rationale</b> | Develop a strategy to deliver the identified projects from the 2022 RWS Master Plan. With over \$2 billion in planned spending over the next 30 years, including individual projects up to \$1 billion, a strategy is required on how to deliver the projects including project delivery models, assessment of consulting resources, contracting resources and internal staff resources. |                              |                           |                                    |  |

|                          |   |                              |                                    |                                    |  |
|--------------------------|---|------------------------------|------------------------------------|------------------------------------|--|
| <b>Project Number</b>    | 23-13   | <b>Capital Project Title</b> | Filtration Plant Planning & Design | <b>Capital Project Description</b> | Conduct a siting, conceptual design and detailed design for a filtration plant |
| <b>Project Rationale</b> | Identified in the 2022 Master Plan, planning, design and future construction of a Filtration Plant is required. Initial steps will include confirming site requirements, overview of integration with other system components, review of current and future technologies and preliminary engineering studies such as geotechnical once a site is confirmed. |                              |                                    |                                    |  |

|                          |   |                              |   |                                    |  |
|--------------------------|---|------------------------------|---|------------------------------------|--|
| <b>Project Number</b>    | 23-14   | <b>Capital Project Title</b> | Council Creek Crossing Hydrology Review | <b>Capital Project Description</b> | Conduct a hydrology review of the Council Creek crossing of water mains to ensure pipe resilience during high rainfall events. |
| <b>Project Rationale</b> | Council Creek runs through currently undersized culverts that need hydraulic assessment as well as hydrological confirmation of what flows they are expected to carry. If these culverts failed in an extreme storm event then supply mains may be affected negatively. |                              |   |                                    |  |

|                 |              |                              |

|--------------------------|---|------------------------------|---|------------------------------------|--|
| <b>Project Number</b>    | 23-24   | <b>Capital Project Title</b> | East-West Connector (Filtration Plant to District of Sooke) | <b>Capital Project Description</b> | Planning and Conceptual Design of the East-West Supply Main from the proposed filtration plant to the District of Sooke (identified in the 2022 Master Plan) |
| <b>Project Rationale</b> | Identified in the 2022 Master Plan, planning and conceptual design of an East- West Supply Main from the proposed filtration plant to the District of Sooke to maintain level of service and to account for growth. |                              |   |                                    |  |

|                          |  |                              |  |                                    |  |
|--------------------------|--|------------------------------|--|------------------------------------|--|
| <b>Project Number</b>    | 23-25  | <b>Capital Project Title</b> | Deep Northern Intake and Sooke Lake Pump Station | <b>Capital Project Description</b> | Planning and Design of the Deep Northern Intake and Sooke Lake Pump Station (identified in the 2022 Master Plan) |
| <b>Project Rationale</b> | Identified in the 2022 Master Plan, planning and design of the Deep Northern Intake and Sooke Lake Pump Station is required to provide water supply and transmission capability from currently inaccessible parts of Sooke Lake into the water supply and treatment systems. |                              |  |                                    |  |

|                          |  |                              |  |                                    |   |
|--------------------------|--|------------------------------|--|------------------------------------|---|
| <b>Project Number</b>    | 23-26  | <b>Capital Project Title</b> | Transmission Main - Sooke Lake Pump Station to Head Tank | <b>Capital Project Description</b> | Planning and Design of the Transmission Main from the Sooke Lake Pump Station to Head Tank (identified in the 2022 Master Plan) |
| <b>Project Rationale</b> | Identified in the 2022 Master Plan, planning and design of a pumped transmission main from the future Sooke Lake Pump Station to the existing Head Tank. |                              |  |                                    |   |

|                          |  |                              |  |                                    |   |
|--------------------------|--|------------------------------|--|------------------------------------|---|
| <b>Project Number</b>    | 23-27  | <b>Capital Project Title</b> | Gravity Main - Sooke Lake to Head Tank | <b>Capital Project Description</b> | Planning and Design of a Gravity Transmission Main (redundancy) from Sooke Lake to Head Tank (identified in the 2022 Master Plan) |
| <b>Project Rationale</b> | Identified in the 2022 Master Plan, planning and design of a gravity transmission main from Sooke Lake to the Head Tank to provide redundant water supply to the system. |                              |  |                                    |   |

|                                      |   |                       |   |                             |  |
|--------------------------------------|---|-----------------------|---|-----------------------------|--|
| Service: 2.670 Regional Water Supply |   |                       |   |                             |  |
| Project Number                       | 23-28   | Capital Project Title | Goldstream Reservoir Connector  | Capital Project Description | Planning and Design of the Goldstream Reservoir Connector transmission main  |
| Project Rationale                    | Identified in the 2022 Master Plan, planning and design of a transmission main to connect the Goldstream Reservoir to the Sooke system to ensure transmission safety and reliability when using the Goldstream system to supplement flows to the Sooke system.  |                       |   |                             |  |
| Project Number                       | 24-08   | Capital Project Title | Seismic and Flood Vulnerability Assessment of Supply Main 10 and 11 Spillway Crossing | Capital Project Description | Engineering Seismic Assessment of the spanned crossing of of Supply Main No 10 and 11 over the Sooke Lake Spillway channel |
| Project Rationale                    |   |                       |   |                             |  |
| Project Number                       | 24-09   | Capital Project Title | Aggricultural Water Rate Review   | Capital Project Description | Phase 2  |
| Project Rationale                    | Identified in the 2022 Master Plan, planning and design of a transmission main to connect the Goldstream Reservoir to the Sooke system to ensure transmission safety and reliability when using the Goldstream system to supplement flows to the Sooke system.  |                       |   |                             |  |
| Project Number                       | 18-07   | Capital Project Title | Replacement of UV System  | Capital Project Description | Replacement of the UV system at the Goldstream Water Treatment Plant   |
| Project Rationale                    | The UV trains and associated electrical equipment at Goldstream Water Treatment Plant require upgrade and replacement.  |                       |   |                             |  |
| Project Number                       | 18-08   | Capital Project Title | Bulk Supply Meter Replacement Program   | Capital Project Description | Planned replacement of aging bulk meter replacement based upon a condition assessment and water audit.                     |
| Project Rationale                    | This item is to replace, upgrade and install new bulk water meters and related equipment that measure flow and volumes of water delivered to the wholesale customers. Many of the meter stations are in need of upgrading. Funding is required to replace the flow meter and appurtenances.Funding is required for Blue Ridge, Alderly, Holland and Maplewood replacements. Somerset Valve Chamber replacement will also be completed under this project which is also tied to backflow prevention. |                       |   |                             |  |

|                                      |   |                       |  |                             |   |
|--------------------------------------|---|-----------------------|--|-----------------------------|---|
| Service: 2.670 Regional Water Supply |   |                       |  |                             |   |
| Project Number                       | 18-15   | Capital Project Title | Corrosion Protection Program                 | Capital Project Description | Study deficiencies in the current material protection and implement recommendations.  |
| Project Rationale                    | This item is to assess, design and implement cathodic protection for the various infrastructure, including steel pipes, that are susceptible to corrosion. The supply system has various implementations of cathodic protection ranging from interior/exterior coatings for pipe and passive anodes to impressed current systems with variable results and condition. Funding is required to retain a specialist to conduct a high level assessment of existing infrastructure with recommendations for additional investigation or areas that require immediate attention. |                       |  |                             |   |
| Project Number                       | 18-18   | Capital Project Title | Main No.3 Segment Replacement                | Capital Project Description | Replacement of segments of Main No. 3 based upon previous studies.  |
| Project Rationale                    | The existing Main No. 3 is approximately 70 years old. Some section of the 22 km main are steel pipe in known potentially corrosive soils. It is proposed to eventually replace a segment or Main #3 on Wale Road, Island Hwy. and Adams Place in Colwood and View Royal. Conceptual design and options analysis will start in 2023 with detailed design and construction commencing in 2024 to 2027. Funding is required to retain a consultant to undertake design and to construct a replacement to Main No. 3.  |                       |  |                             |   |
| Project Number                       | 19-05   | Capital Project Title | Repairs - Kapoor Shutdown                    | Capital Project Description | Repair items such as defects in the Kapoor tunnel, replacement of critical valves, intake exterior inspection and actuator replacement while the Kapoor tunnel is shutdown. |
| Project Rationale                    | During the 2016 Kapoor Tunnel inspection numerous deficiencies were noted. Some of the repairs were made and inspected in 2017. Funds are required to complete remaining identified repairs as well as conduct other works, such as head tank valve maintenance, dive inspection of the Intake Tower, hydraulic actuator line replacement, that can only be conducted when the Kapoor Tunnel is offline.  |                       |  |                             |   |
| Project Number                       | 19-23   | Capital Project Title | Critical Spare Equipment Storage & Pipe Yard | Capital Project Description | Plan, design and construct a critical equipment storage building.   |
| Project Rationale                    | Additional and accessible storage is required at the pipe yard for critical spare equipment such as repair bands and clamps. Funds are required to pland, design and construct an equipment storage building accessible by loading vehicles.  |                       |  |                             |   |

|                                      |   |                       |   |                             |  |
|--------------------------------------|---|-----------------------|---|-----------------------------|--|
| Service: 2.670 Regional Water Supply |   |                       |   |                             |  |
| Project Number                       | 20-16   | Capital Project Title | Cecelia Meter Replacement                               | Capital Project Description | Replacement of the Cecelia billing meter as well as its enclosure.   |
| Project Rationale                    | The St Giles and Cecelia meters are aging and in hard to maintain locations. Funding is required to construct new meter sites and decommission and demolition the old sites.  |                       |   |                             |  |
| Project Number                       | 20-17   | Capital Project Title | Decommission & Conceptual Design of the Smith Hill Site | Capital Project Description | Plan for decommission the conceptual design for the replacement of the Smith Hill reservoir site.  |
| Project Rationale                    | The Smith Hill reservoir has not been in operation for many years. Funds are required to plan for decommission the site in 2020 and then carry out decommissioning in 2023.   |                       |   |                             |  |
| Project Number                       | 21-06   | Capital Project Title | Sooke Lake Dam Spillway Hoist and Stop Log Replacement  | Capital Project Description | Replacement of the sluice gate spillway hoist and stop logs at Sooke Lake Dam.   |
| Project Rationale                    | The Sooke Lake Dam Spillway Hoist is  |                       |   |                             |  |
| Project Number                       | 21-09   | Capital Project Title | Goldstream Water Chlorination Gas System Removal        | Capital Project Description | Plan and construct provisions for removal of chlorination system   |
| Project Rationale                    | The Goldstream Water Treatment Plant has undergone numerous upgrades and updates, both large and small since its initial construction. There are numerous vestigial mechanical and electrical assets that require planned removal. Funds are required to plan and remove unused assets that affect maintenance of the system. |                       |   |                             |  |
| Project Number                       | 21-10   | Capital Project Title | SCADA Masterplan and System Upgrades                    | Capital Project Description | Update the SCADA Master Plan in conjunction with the Juan de Fuca Water Distribution, Saanich Peninsula Water and Wastewater, and Core Area Wastewater Services. |
| Project Rationale                    | The SCADA and radio system utilized by the RWS comprises of components ranging from 2-25 years in age. A planned replacement of assets, to be coordinated with the Juan de Fuca Water Distribution and Saanich Peninsula Water & Wastewater Systems is required to create a more resilient and cohesive communications system |                       |   |                             |  |

| <div> <div>Service:</div> <div>2.670</div> <div>Regional Water Supply</div> </div> |  |  |   |   |
| <div>Project Number</div> <div>21-11</div>   |  | <div>Capital Project Title</div> <div>RWS Supply Main No. 4 Upgrade</div>        | <div>Capital Project Description</div> <div>           Upgrade vulnerable sections of the RWS Supply Main No. 4 and Main No. 1 to a resilient system to better able to withstand a seismic event. Vulnerable sections are Concrete Cylinder pipe material which is susceptible to failure during a seismic event. This is part of project partnered with the Saanich Peninsula Water system.         </div> | <div>Project Rationale</div> <div>           Sections of RWS Supply Main No. 4 have been identified as being vulnerable due to age and material type during a seismic event and require replacement. To support replacement of the Goldstream section of Main No. 4, improvements to RWS Supply Main No. 1 are required, such as replacement of approximately 40 m of transmission Main #1 at Watkiss Way and upgrade of the Watkiss PRV, upgrade of the Millstream PRV, modifications to the Humpback PRV and construction of five new pressure control stations. This project is part of a project partnered with the Saanich Peninsula Water System to increase the resilience of the water system by replacing vulnerable sections of transmission mains.The budget breakdown of the works: Goldstream section of Main #4 \$21,975,000; Watkiss Way section of Main #1 \$950,000; Watkiss PRV \$1,250,000; Millstream PRV \$1,350,000; Humpback PRV improvements \$825,000; Five new PRVs \$9,050,000.         </div> |

Includes IT equipment located at tower sites within the RWS system. |
| <b>Project Rationale</b>                    | Replacement of Core IT infrastructure such as servers, network switches, UPS, etc for equipment end of life. Includes IT equipment located at tower sites within the RWS system.   |                              |   |  |
| <b>Project Number</b>                       | 24-12  | <b>Capital Project Title</b> | Head Tank Valve Replacement                         | <b>Capital Project Description</b><br>Supply and installation of Head Tank valves and actuators.   |
| <b>Project Rationale</b>                    | Supply and installation of Head Tank valves and actuators.   |                              |   |  |
| <b>Project Number</b>                       | 16-16  | <b>Capital Project Title</b> | Implications from Goldstream Dam Safety Review      | <b>Capital Project Description</b><br>Conduct dam improvements at the Goldstream dams that resulted for the Dam Safety Review and routine inspections (refer to the Dam Safety Database).                              |
| <b>Project Rationale</b>                    | The Goldstream Dams Dam Safety Review was initiated in 2015 and delivered in 2016 and the review provided recommendations for dam safety improvements for the 11 dams in the Goldstream Watershed. The dam deficiencies and related projects are identified in the Dam Safety Database.  |                              |   |  |
| <b>Project Number</b>                       | 16-17  | <b>Capital Project Title</b> | #N/A  | <b>Capital Project Description</b><br>#N/A   |
| <b>Project Rationale</b>                    | Butchart Dam #5 was observed to have a sinkhole on the downstream slope. The earthfill dam was founded on limestone in the about 1905 and seepage issues have occurred since that time. A geotechnical investigation was conducted in 2016, and remediation has been recommended by geotechnical consultant. It is proposed to complete detailed design of remediation in 2018 and construction of repairs in 2019. Phase 1 of the revised program is complete and the dam is now in the monitoring stage. |                              |   |  |
| <b>Project Number</b>                       | 17-25  | <b>Capital Project Title</b> | Implications from 2016 Sooke Lake Dam Safety Review | <b>Capital Project Description</b><br>Conduct dam improvments at the Sooke Lake Dam that resulted from the 2016 Dam Safety Review and routine inspections (refer to the Dam Safety Database)                           |
| <b>Project Rationale</b>                    | The 2016 Dam Safety Review Audit was completed and provided a list of recommended improvements. Upcoming capital work to be completed is identified in the dam safety database.  |                              |   |  |

|   |  |                              |  |  |
|---|--|------------------------------|--|--|
| <b>Service:</b> <b>2.670</b> <b>Regional Water Supply</b> |  |                              |  |  |
| <b>Project Number</b>                                     | 18-19  | <b>Capital Project Title</b> | Sooke Lake Dam - Instrumentation System Improvements | <b>Capital Project Description</b><br>Complete dam performance instrumentation system/surveillance improvements for the Sooke Lake Dam.  |
| <b>Project Rationale</b>                                  | The 2016 Dam Safety Review identified and recommended various dam safety surveillance instrumentation improvements including piezometers, weirs, seismometers, etc. An Instrumentation system plan was completed and includes a prioritized list of improvement projects.                  |                              |  |  |
| <b>Project Number</b>                                     | 18-20  | <b>Capital Project Title</b> | Sooke Lake Dam - Breach Risk Reduction Measures      | <b>Capital Project Description</b><br>Implement measures to reduce Sooke Lake Dam breach implications in the unlikely event of dam failure (refer to the NHC Consulting study).                    |
| <b>Project Rationale</b>                                  | A Dam Breach Assessment and Inundation Zone Mapping proecjt was completed in 2017 by an engineering consutlant and risk mitigation measures included structural and non-structural measures to lower risk should a dam breach occur. The measures are captured in the Dam Safety Database. |                              |  |  |
| <b>Project Number</b>                                     | 19-07  | <b>Capital Project Title</b> | Integrate Dam Performance and Hydromet to SCADA      | <b>Capital Project Description</b><br>Integrate the dam safety instrumentation/surveillance (i.e. piezometers and weirs) and HydroMet stations to report to WIO through the existing SCADA system. |
| <b>Project Rationale</b>                                  | Based on capital project 18-19, dam performance piezometers and weirs and Hydromet/Dam Safety Instrumentation stations will be integrated through the SCADA system.  |                              |  |  |
| <b>Project Number</b>                                     | 19-09  | <b>Capital Project Title</b> | Cabin Pond Dams Decommissioning (PES)                | <b>Capital Project Description</b><br>The Cabin Pond Dams (x2) have been retired from drinking water service, plan to decommission.  |
| <b>Project Rationale</b>                                  | The two Cabin Pond Dams have been retired from drinking water service with no other interested owners. Funds are required to plan and implement decommissioning of the dams.   |                              |  |  |
| <b>Project Number</b>                                     | 19-12  | <b>Capital Project Title</b> | Goldstream Dams Instrumentation Improvements         | <b>Capital Project Description</b><br>Conduct dam safety instrumentation/surveillance improvements (refer to report from Thurber Engineering).   |
| <b>Project Rationale</b>                                  | Thurber completed a study on the Goldstream Dam instrumentation and found numerous deficiencies with respect to dam safety. Funds are required to design and implement improvements to the Goldstream Dam instrumentation.   |                              |  |  |

|                                      |   |                       |  |                             |   |
|--------------------------------------|---|-----------------------|--|-----------------------------|---|
| Service: 2.670 Regional Water Supply |   |                       |  |                             |   |
| Project Number                       | 19-13   | Capital Project Title | Dam Safety Instrumentation                             | Capital Project Description | The existing dam safety instrumentation/surveillance equipment is getting older and will need to be replaced/rehabilitated (does not include pending SCADA effort). |
| Project Rationale                    | Aging Hydromet/Dam Safety Instrumentation stations maintained by Infrastructure Engineering require replacement so that ongoing monitoring within the watersheds can be maintained. Funds are required for upgrades and replacement of existing Hydromet Stations.  |                       |  |                             |   |
| Project Number                       | 20-19   | Capital Project Title | Goldstream System High Level Outlet Valve Replacements | Capital Project Description | The Goldstream and Butchart high level outlet valves have been identified as requiring replacement.   |
| Project Rationale                    | Through dam safety inspections and routine operations, the Goldstream and Butchart high level outlet valves have been identified as requiring replacement. Funds are required to design and replace the valves.   |                       |  |                             |   |
| Project Number                       | 21-03   | Capital Project Title | Deception Dam - Dam Safety Review 2021 & Improvements  | Capital Project Description | Conduct a Dam Safety Review and improvements for the Deception Dam.   |
| Project Rationale                    | Deception Dam has a consequence classification of "very high" and a dam safety review is required to be completed every ten years under the current B.C. Dam Safety Regulation. The last dam safety review was completed in 2011. The dam safety review is anticipated to be an "audit-style" assessment of the physical condition of the dam, operations, maintenance, surveillance, identification of dam safety deficiencies and recommendations for dam safety improvements. Project includes budget for subsequent year to complete recommended dam safety improvements. |                       |  |                             |   |
| Project Number                       | 21-04   | Capital Project Title | Saddle Dam - Dam Safety Review 2021 & Improvements     | Capital Project Description | Conduct a Dam Safety Review and improvements for the Saddle Dam.  |
| Project Rationale                    | Saddle Dam has a consequence classification of "very high" and a dam safety review is required to be completed every ten years under the current B.C. Dam Safety Regulation. The last dam safety review was completed in 2011. The dam safety review is anticipated to be and "audit-style" assessment of the physical condition of the dam, operations, maintenance, surveillance, identification of dam safety deficiencies and recommendations for dam safety improvements. Project includes budget for subsequent year to complete recommended dam safety improvements.   |                       |  |                             |   |
| Project Number                       | 21-21   | Capital Project Title | Goldstream Dams - 4 Low Level Gate Improvements        | Capital Project Description | Logistics planning in 2022, installation in 2023  |
| Project Rationale                    | Several of the water control gates related to the Goldstream dams are in need of repair and possibly replacement.   |                       |  |                             |   |

Funding is required to carry out recommendations from the review.</div>   |  |
| <div>Project Number</div> <div>25-01</div>   | <div>Capital Project Title</div> <div>Goldstream Dam - Dam Safety Review 2025 &amp; Addressing Implications</div> | <div>Capital Project Description</div> <div>Conduct a Dam Safety Review to meet regulatory requirement.</div>                    | <div>Project Rationale</div> <div>The Goldstream Watershed Dams have a consequence classification of "low" to "high" and a dam safety review is required to be completed every ten years under the current B.C. Dam Safety Regulation. The last dam safety review was completed in 2015. The dam safety review is anticipated to be an "audit-style" assessment of the physical condition of the dam, operations, maintenance, surveillance, identification of dam safety deficiencies and recommendations for dam safety improvements. Project includes budget for subsequent years to complete recommended dam safety improvements.</div> |  |
| <div>Project Number</div> <div>25-02</div>   | <div>Capital Project Title</div> <div>Probable Maximum Flood and Inflow Design Flood Updates</div>                | <div>Capital Project Description</div> <div>Update the previous edition from 2015 (recommended 10 year review cycle).</div>      | <div>Project Rationale</div> <div>The various Dam Safety Reviews and Canadian Dam Safety Guideline recommend updating the reservoir inflow design flood and freeboard analysis every ten years.</div>   |  |

|--------------------------|---|------------------------------|-----------------------------------|------------------------------------|---|
| <b>Project Number</b>    | 20-04   | <b>Capital Project Title</b> | Sooke Lake HyDy Model Development | <b>Capital Project Description</b> | Critical data collection, model building+calibration, model utilization for 3 different scenarios |
| <b>Project Rationale</b> | This project consists of the following different phases: 2020/2021 Procurement/Rental of monitoring equipment to fill critical data gaps; 2022 Consulting contract to build the hydrodynamic lake model and calibrate it against existing data; 2022 Consulting contract to run the model for a North Basin intake scenario; 2023 Consulting Contract to run the model for investigating impacts of a diversion of Leech River water into Sooke Lake; 2024 Consulting Contract for investigating impacts of wind induced seiches in Sooke Lake. |                              |                                   |                                    |   |

|                          |  |                              |                           |                                    |   |
|--------------------------|--|------------------------------|---------------------------|------------------------------------|---|
| <b>Project Number</b>    | 22-06  | <b>Capital Project Title</b> | Sooke Lake Food Web Study | <b>Capital Project Description</b> | Assess the aquatic food web structure and create an inventory of fish and invertebrate species and distribution in Sooke Lake Reservoir - to be used as indicators of stream health |
| <b>Project Rationale</b> | CRD has been using predominantly algal data as an indicator for stream health and condition assessment in the source waters. To gain a better understanding of the source water conditions and how they may change over time it is necessary to expand this indicator system for other trophic levels in the food web. Sooke Lake Reservoir is of particular interest as the primary and critical water source for the GVDWS and therefore a aquatic food web study will be commissioned on this lake. |                              |                           |                                    |   |

|                          |   |                              |                           |                                    |  |
|--------------------------|---|------------------------------|---------------------------|------------------------------------|--|
| <b>Project Number</b>    | 23-06   | <b>Capital Project Title</b> | GVDWS Nitrification Study | <b>Capital Project Description</b> | Investigate nitrification occurrence and potential impacts on drinking water quality |
| <b>Project Rationale</b> | With the operation of the upgraded Goldstream disinfection process (liquid NH3 and hypo) the volatility of the residual products and potential for nitrification in the distribution systems needs to be studied to assess any potential impacts to the drinking water quality. |                              |                           |                                    |  |

|                          |  |                              |   |                                    |  |
|--------------------------|--|------------------------------|---|------------------------------------|--|
| <b>Project Number</b>    | 24-02  | <b>Capital Project Title</b> | Boat Motor Replacement with Electric Outboards (Sooke and Goldstream Boats) | <b>Capital Project Description</b> | 50hp and 15hp motor replacement due to age and water quality concerns, large electric outboards are already available from Torqeedo for instance |
| <b>Project Rationale</b> | When the existing boat motors are due for replacement they shall be replaced with electric outboard motors to reduce emmissions and to provide clean propulsion of CRD boats on the drinking water source lakes. This will reduce the risk of fuels spills and eliminate combustion exhausts entering the water. |                              |   |                                    |  |

|                                      |   |                       |  |                             |   |

| Project Rationale                    | Investigate drawdown effects on Sooke Lake water quality and ecosystem impacts with max drawdown and determine a safe max drawdown level for SOL. |                       |  |                             |   |
| Project Number                       | 25-04   | Capital Project Title | 4 x multi-parameter field analyzers (SL1000) | Capital Project Description | Replace 4 multi-parameter (total/free/mono/ammonia) field analyzers   |
| Project Rationale                    | Replace 4 multi-parameter (total/free/mono/ammonia) field analyzers   |                       |  |                             |   |
| Project Number                       | 26-01   | Capital Project Title | 2 x Floating Water Quality Sensor Platforms  | Capital Project Description | To support and confirm water quality data in SOL for Deep Norther Intake, install 2 floating sensor platforms                                     |
| Project Rationale                    | To support and confirm water quality data in SOL for Deep Norther Intake, install 2 floating sensor platforms                                     |                       |  |                             |   |
| Project Number                       | 27-01   | Capital Project Title | Drinking Water Safety Plan Update            | Capital Project Description | Review and update existing DWSP spreadsheet and risk registry. Consider planned system expansions/upgrades.                                       |
| Project Rationale                    | Review and update existing DWSP spreadsheet and risk registry. Consider planned system expansions/upgrades.                                       |                       |  |                             |   |
| Project Number                       | 24-14   | Capital Project Title | Laboratory Equipment Replacements            | Capital Project Description | Replacement of critical laboratory equipment.   |
| Project Rationale                    | Replacement of critical laboratory equipment.   |                       |  |                             |   |

|                                      |   |                       |   |   |
|--------------------------------------|---|-----------------------|---|---|
| Service: 2.670 Regional Water Supply |   |                       |   |   |
| Project Number                       | 24-15   | Capital Project Title | Laboratory Renovations                                    | Capital Project Description<br>Renovation for main lab cabinetry, floor, aquatic ecology lab and prep room.         |
| Project Rationale                    | Renovation for main lab cabinetry, floor, aquatic ecology lab and prep room.  |                       |   |   |
| Project Number                       | 24-16   | Capital Project Title | WQ Field Office IT Upgrades                               | Capital Project Description<br>The firewall, switches and telephony system are end of life and require replacement. |
| Project Rationale                    | The firewall, switches and telephony system are end of life and require replacement.  |                       |   |   |
| Project Number                       | 17-27   | Capital Project Title | Watershed Bridge and Culvert Replacement                  | Capital Project Description<br>Replacement of small culverts and bridges throughout the GVWSA.                      |
| Project Rationale                    | This provides annual funding for the replacement of culverts and bridges that have reached end of life and/or are undersized given present knowledge of potential peak water flows and anticipated climate change effects. With the completion of peak flow modelling of all major structures in the Sooke and Goldstream WSAs in 2017, additional funds are required beginning in 2018 to upgrade identified structures to current standards. Costs of upgrades have increased significantly in the last 5 years.  |                       |   |   |
| Project Number                       | 17-28   | Capital Project Title | Watershed Security Infrastructure Upgrade and Replacement | Capital Project Description<br>New, upgrade and replacement of security infrastructure in the GVWSA.                |
| Project Rationale                    | The outer boundary of the Leech, Sooke and Goldstream Water Supply Areas is approximately 119 kilometers in length. Main access roads are gated and there are 11 kilometers of existing security fencing. A constant effort is needed to maintain a Closed Watershed Policy. Through monitoring, high incident areas are identified, security plans are developed, and security infrastructure (fencing, gates and signage) is installed or upgraded where required. The uplift in provisional funding requested in 2017 has been reduced given full integration of the Weeks Lake area within the GVWSA, completion of fencing and gates related to the Sooke Hills Wilderness Trail and with seperate capital projects for autogates. |                       |   |   |
| Project Number                       | 17-29   | Capital Project Title | Water Supply Area Equipment Replacement                   | Capital Project Description<br>Hydrometeorological, fireweather and wildfire suppression equipment replacement.     |
| Project Rationale                    | This provides annual funding for the replacement or upgrading of equipment for wildfire suppression and spill response, fire weather stations, hydro-meteorological monitoring and water quality sampling and monitoring equipment. Given an expansion of the hydrology and meteorology network of stations and sensors, an additional \$50,000 per year is added in 2020 and going forward. In 2021 and going forward, funding is reduced by \$20,000 as water quality equipment will be funded under a separate line item (21-17). A revised level of funding is requested beginning in 2023 that reflects forecasted needs.  |                       |   |   |

|                                      |  |                       |  |                             |   |
|--------------------------------------|--|-----------------------|--|-----------------------------|---|
| Service: 2.670 Regional Water Supply |  |                       |  |                             |   |
| Project Number                       | 17-30  | Capital Project Title | Transmission Main Repairs                  | Capital Project Description | Emergency repairs to the transmission mains.  |
| Project Rationale                    | Each year a visual inspection of this critical supply tunnel is carried out by CRD staff. This capital item allows for minor repairs that are discovered during these inspections. This also allows for annual funding for repair of emergency breaks on large diameter supply mains.  |                       |  |                             |   |
| Project Number                       | 17-31  | Capital Project Title | Transmission System Components Replacement | Capital Project Description | Replacement and repair of transmission components.  |
| Project Rationale                    | This is an annual allowance for the capital costs for the replacement and repair of supply system components that fail under normal operation and maintenance during the year.   |                       |  |                             |   |
| Project Number                       | 17-33  | Capital Project Title | Disinfection Equipment Parts Replacement   | Capital Project Description | Replacement of incidental equipment and parts associated with the disinfection system.  |
| Project Rationale                    | The annual work includes the replacement of the plastic gas feed piping that has become very brittle, installing air valves on the ammonia solution lines, installing and replacing shut off valves on the booster pumps supply piping, installing indicator stems on UV cooling water valves, relocating the UV cooling water feed pipes, improving the landscaping around the UV building to reduce dust and other minor upgrades. |                       |  |                             |   |
| Project Number                       | 17-34  | Capital Project Title | Supply System Computer Model Update        | Capital Project Description | Annual update of the regional hydraulic model.  |
| Project Rationale                    | This item is to allow for staff and consultant time each year to keep the hydraulic computer model current.  |                       |  |                             |   |
| Project Number                       | 19-16  | Capital Project Title | Dam Improvements                           | Capital Project Description | Items not covered by Dam Safety Reviews, but brought up in Dam Safety Inspections and Dam Safety Reviews and address itesm in the dam safety database/risk registry |
| Project Rationale                    | Dam Safety Inspections are carried out throughout the year and result in minor improvements at each dam annually. These improvements are minor in nature and are typically not covered in the Dam Safety Review. Funds are required to carry out the dam safety improvements resulting from Dam Safety Inspections.  |                       |  |                             |   |

|                                      |  |                       |                                       |                             |  |
|--------------------------------------|--|-----------------------|---------------------------------------|-----------------------------|--|
| Service: 2.670 Regional Water Supply |  |                       |                                       |                             |  |
| Project Number                       | 19-22  | Capital Project Title | SCADA Repairs & Equipment Replacement | Capital Project Description | Items not covered by the SCADA Replacement and SCADA Master Plan, but integral in maintaining the SCADA System and revenue meter system. |
| Project Rationale                    | This item is to allow for unplanned SCADA repairs and equipment replacement not covered by the capital projects SCADA Replacement.   |                       |                                       |                             |  |
| Project Number                       | 21-15  | Capital Project Title | Corrosion Protection                  | Capital Project Description | Replace corrosion protection assets, such as coatings, for the transmission system when identified.                                      |
| Project Rationale                    | There are numerous assets with varying levels of corrosion protection throughout the RWS system. Funds are required to ensure that corrosion protection assets are replaced or rehabilitated when identified.  |                       |                                       |                             |  |
| Project Number                       | 21-16  | Capital Project Title | Valve Chamber Upgrades                | Capital Project Description | Replace failing valves and appurtenances along the RWS supply system.  |
| Project Rationale                    | The RWS system has numerous isolation and air valves along the transmission system, usually in underground chambers. Funds are required for replacement of valves and chamber upgrades as they are identified.   |                       |                                       |                             |  |
| Project Number                       | 21-17  | Capital Project Title | Water Quality Equipment Replacement   | Capital Project Description | Replacement of water quality equipment for the   |
| Project Rationale                    | This provides annual funding for the replacement or upgrading of equipment for the water quality lab, sampling, and operations. Of this provisional budget, \$20,000 was previously included in item 17-29 (Water Supply Area annual provisional budget) |                       |                                       |                             |  |
| Project Number                       | 21-18  | Capital Project Title | LIMS support                          | Capital Project Description | Support for LIMS database  |
| Project Rationale                    | Provides for support for the laboratory information management system  |                       |                                       |                             |  |

|  |   |                       |   |   |
|--|---|-----------------------|---|---|
| <div> <div>Service:</div> <div>2.670</div> <div>Regional Water Supply</div> </div> |   |                       |   |   |
| Project Number   | 23-20   | Capital Project Title | Land Exchange/Acquisition                                       | <div>Capital Project Description</div> <div>Land surveys, appraisals to support decisions regarding land exchange to increase catchment area, buffer water supply areas and other possible land exchange and acquisition within the RWS system.</div> |
| Project Rationale  | There are opportunities to increase the catchment and critical buffer areas of Sooke, Goldstream and the Leech WSA by purchase or land exchange with surrounding land owners. From time to time, the RWS System requires acquisition of lands for infrastructure purposes. Funds will be used when needed to undertake appraisals, legal surveys, and legal fees for work to develop agreements to purchase or exchange lands for the Regional Water Supply Area or System. |                       |   |   |
| Project Number   | 17-35   | Capital Project Title | Vehicle & Equipment Replacement (Funding from Replacement Fund) | <div>Capital Project Description</div> <div>This is for replacement of vehicles and equipment used by CRD Water Services for the day-to-day operation and maintenance of the supply system.</div>   |
| Project Rationale  | This is for replacement of vehicles and equipment used by CRD Water Services for the day-to-day operation and maintenance of the supply system. The Equipment Replacement Fund is used to fund the expenditure. The requests have been adjusted to align with the pricing for electric vehicles.  |                       |   |   |
| Project Number   | 20-22   | Capital Project Title | Vehicle for the Dam Safety Program                              | <div>Capital Project Description</div> <div>New Transit Van</div>   |
| Project Rationale  | An additional pick up is required for the dam safety program. The request has been adjusted to align with the pricing for an electric Transit Van.  |                       |   |   |
| Project Number   | 20-23   | Capital Project Title | Vehicle for the CSE Support Program                             | <div>Capital Project Description</div> <div>New Transit Van</div>   |
| Project Rationale  | A new Transit van is required to support the Confined Space Entry Support program. The request has been adjusted to align with the pricing for an electric Transit Van.   |                       |   |   |
| Project Number   | 21-30   | Capital Project Title | Vehicle for Warehouse Operations                                | <div>Capital Project Description</div> <div>New pick up</div>   |
| Project Rationale  | For use of the warehouse worker to source supplies and materials in support of the remote sites.This warehouse worker will maintain wastewater stores and will travel and transport as required items between stores locations. A pickup truck will be required. The request has been aligned with the pricing for an electric Pick Up.   |                       |   |   |

| <div> <div>Service:</div> <div>2.670</div> <div>Regional Water Supply</div> </div> |  |   |   |  |
| <div>Project Number</div> <div>23-21</div>   | <div>Capital Project Title</div> <div>EV Charging Stations Electrical Infrastructure</div> | <div>Capital Project Description</div> <div>Electrical System upgrades at 479 Island Hwy to power up 44 charging stations</div> | <div>Project Rationale</div> <div>In support of the CRD's Climate Action Strategy to reduce the corporate GHG emissions. The CRD Fleet of vehicles is one of the larger contributors to the generation of GHG's. Integrated Water Services identified 44 of the approx. 100 vehicles that operate out of the 479 Island location for replacement with Electrical Vehicles by 2030. I preparation for providing the proper charging network at 479 an Electric Vehicle Fleet Conversion Study was completed in 2021.The results of the study was to upgrade the electrical infrastructure to accommodate the power needs of 44 charging points. It is proposed that phase 1 is started in 2023 to upgrade the electrical distribution system and provide 17 charging points. The larger portion of the costs will be to upgrade the electrical system. Phase 2 to allow for a further 27 charging points can be planned to accommodate the balance of EV vehicles pending their purchasing and delivery.</div> |  |
| <div>Project Number</div> <div>23-22</div>   | <div>Capital Project Title</div> <div>Fuel Truck</div>                                     | <div>Capital Project Description</div> <div>Fuel tender truck</div>   | <div>Project Rationale</div> <div>At present the fueling of stationary emergency generators and equipment is done using a tidy tank. This requires several trips to the gas station. During the period when fuel was difficult to source it became apparent that Corporate Fleet needs to find a solution to the possibility that during an emergency fuel is available. The fuel truck will also be used during a watershed emergency to fuel equipment and vehicles.</div>  |  |
| <div>Project Number</div> <div>23-30</div>   | <div>Capital Project Title</div> <div>Fleet Shop Hoist</div>                               | <div>Capital Project Description</div> <div>Heavy Capacity Hoist for fleet maintenance</div>                                    | <div>Project Rationale</div> <div>The new larger and heavier vehicles are proving to be a challenge for the two hoists presently used in the Fleet worksho at 479 Island Hwy. Currently our hoists are rated for 18,000 lbs. It is proposed to replace one of the hoists with a 24,000 lbs hoist in the centre bay.</div>   |  |

General Comments:

Reserve Fund is used for the purpose of replacing fleet vehicles including heavy equipment and associated mobile components, as outlined in the capital plan. Proceeds from disposals are estimated at 15% of replacement equipment purchases. Note not all vehicles are sold within the year in which they are replaced.

\* Interest should be included in determining the estimated ending balance for the current year. Interest in planning years nets against inflation which is not included.

# **CAPITAL REGIONAL DISTRICT**

## **2024 BUDGET**

### **JDF Water Distribution**

#### **COMMITTEE OF THE WHOLE**

OCTOBER 2023

**Service:** 2.680 JDF Water Distribution

**Commission:** Juan De Fuca Water Distribution

**DEFINITION:**

To finance the administration, development, maintenance, and operational expenses, of the Juan de Fuca Water Distribution local service in the Western Communities of the Capital Regional District, as per the Water Distribution Local Service Area Establishment Bylaw No. 2538.

The establishment and operation of a Juan de Fuca water Distribution Commission is done by Bylaw No. 2540.

**SERVICE DESCRIPTION:**

Juan de Fuca Water Distribution Service provides retail water distribution system to participants within the Western Communities. The service administration and operation is provided by the Integrated Water Services Department.

**PARTICIPATION:**

|                             |                       |
|-----------------------------|-----------------------|
| City of Colwood             | District of Metchosin |
| City of Langford            | District of Sooke     |
| Town of View Royal          | District of Highlands |
| Juan de Fuca Electoral Area |                       |

**MAXIMUM LEVY:**

The maximum amount that may be requisitioned is NIL.

**MAXIMUM CAPITAL DEBT:**

|             |   |      |              |
|-------------|---|------|--------------|
| Authorized: | Pre Consolidated MFA Loan Authorizations - Juan de Fuca Water Distribution Facilities |      | \$19,000,000 |
| Borrowed:   |   |      | \$17,500,000 |
| Remaining:  | Expired   |      | \$1,500,000  |
| Authorized: | MFA Bylaw No. 3981 - Juan de Fuca Water Distribution Facilities                       |      | \$14,800,000 |
| Borrowed:   |   |      | \$10,100,000 |
| Remaining:  | Expired   |      | \$4,700,000  |
| Authorized: | MFA Bylaw No. 3164 - Juan de Fuca Water Distribution Facilities Development-DCC       |      | \$10,000,000 |
| Borrowed:   |   |      | \$3,500,000  |
| Remaining:  | Expired   |      | \$6,500,000  |
| Authorized: | MFA Bylaw No. 4379 - Juan de Fuca Water Distribution Facilities                       | 2021 | \$14,800,000 |
| Borrowed:   |   |      | \$6,000,000  |
| Remaining:  | Active  |      | \$8,800,000  |

**FUNDING:**

Costs are recovered from Water Sales, and transfer from DCC reserves to service DCC debt.

**Overall 2023 Budget Performance**  
(expected variance to budget and surplus treatment)

*Favourable revenue and water sales variance of \$740,000 (3.15%) due to higher than budgeted water demand largely a result of dry summer weather. The additional revenue will be partially offset by bulk water purchase overages. The net surplus of \$530,000 will be transferred to the Service's Water Capital Fund.*

|-------------------|---|-----------------------|----------------------------------|-----------------------------|---|
| Project Number    | 18-03   | Capital Project Title | JDF Site Decommissioning Program | Capital Project Description | Decommissioning of facilities that are no longer in use based on preliminary work from Annual Provisional |
| Project Rationale | Numerous pump station and PRV facilities have been made redundant or have been decommissioned within the JDF system. Sites have been identified as part of the annual provisional project and funds are required to complete decomission of the sites and then demolish them. In 2021 the Treanor pump station demolition was carried out. The Townsview PS and Tank started planning in 2021 and will continue through 2023. |                       |                                  |                             |   |

|                   |  |                       |  |                             |  |
|-------------------|--|-----------------------|--|-----------------------------|--|
| Project Number    | 18-06  | Capital Project Title | Disaster Response Plan for Water Supply and Distribution | Capital Project Description | Determine and supply response equipment for disaster response. |
| Project Rationale | Proposed work includes developing a response plan to disasters to the Juan de Fuca water supply or distribution system. Funds are required to procure equipment and carry out works developed the in 2018 plan in conjunction with the Regional Water Supply disaster response Plan. |                       |  |                             |  |

|                   |  |                       |   |                             |   |
|-------------------|--|-----------------------|---|-----------------------------|---|
| Project Number    | 19-09  | Capital Project Title | Distribution System Seismic Resiliency Improvements | Capital Project Description | Determine and commence improvements to the distribution system to provide seismic resiliency. |
| Project Rationale | Determine and commence improvements to the distribution system to provide resiliency. In 2023, sites will be prioritized with design commencing in 2024 and construction starting in 2024. |                       |   |                             |   |

|                                       |  |                       |                             |                             |  |
|---------------------------------------|--|-----------------------|-----------------------------|-----------------------------|--|
| Service: 2.680 JDF Water Distribution |  |                       |                             |                             |  |
| Project Number                        | 20-03  | Capital Project Title | AC Pipe Replacement Program | Capital Project Description | Replacement of aging asbestos cement pipe year over year as outlined in the May 2023 staff report. Replacement is expected to be phased until 2055 to replace all AC pipe in the distribution network. |
| Project Rationale                     | As identified most recently in the May 2023 Staff Report, this AC Replacement Program is anticipated to continue until all AC pipe in the distribution system has been replaced. Current target deadline for complete replacement is 2055. |                       |                             |                             |  |

|                   |  |                       |                                      |                             |  |
|-------------------|--|-----------------------|--------------------------------------|-----------------------------|--|
| Project Number    | 20-04  | Capital Project Title | William Head & VGH Meter Replacement | Capital Project Description | Replacement of the meter and chambers at William Head & VGH with the possibility of resilient connections. |
| Project Rationale | Identified through Statement of Works, the William Head and Victoria General Hospital meters require replacement and redundancy to maintain service to the two facilities. In 2021 funds were utilized to complete design of the two new meters that will allow for construction of the meters while maintaining service. VGH Meter Replacement was completed in 2023 by CRD forces and VGH will be completed in 2024. |                       |                                      |                             |  |

|                   |  |                       |  |                             |   |
|-------------------|--|-----------------------|--|-----------------------------|---|
| Project Number    | 21-02  | Capital Project Title | Sooke Rd - 2,200m of 600mm Pipe - VMP to Jacklin | Capital Project Description | Replacement of aged, large diameter water main from Jacklin Rd to VMP |
| Project Rationale | According to corrosion assessment, a 2.2 kilometre section of an existing steel pipe along Sooke Road and Allendale Road (between Wishart to Jacklin) was unprotected and in need of replacement. In 2014, the design of both phases of the water main was completed by a consultant and construction of the main from Wishart to VMP was completed by CRD resources. Due to increased material and contruction costs, it is proposed to update the condition assessment to determine whether this project is still required or could be deferred. |                       |  |                             |   |

|                                       |  |                       |                                     |                             |   |
|---------------------------------------|--|-----------------------|-------------------------------------|-----------------------------|---|
| Service: 2.680 JDF Water Distribution |  |                       |                                     |                             |   |
| Project Number                        | 21-13  | Capital Project Title | SCADA Master Plan Update & Upgrades | Capital Project Description | Update the SCADA Master Plan in conjunction with the RWS, Saanich Peninsula and Core Area infrastructure.                 |
| Project Rationale                     | The SCADA and radio system utilized by JDF Water System comprises of components ranging from 2-25 years in age. A planned replacement of assets, to be coordinated with the Regional Water Supply and Saanich Peninsula Water & Wastewater Systems is required to create a more resilient and cohesive communications system |                       |                                     |                             |   |
| Project Number                        | 22-01  | Capital Project Title | East Sooke Interconnect Water Main  | Capital Project Description | Construction approximately 430 m of watermain for system improvements.  |
| Project Rationale                     | Funds are required to design and construct approximatly 430 m of a new watermain interconnection in East Sooke. Interconnection will provide redundancy and improve flows in the area.   |                       |                                     |                             |   |
| Project Number                        | 22-02  | Capital Project Title | Microwave Radio Upgrades            | Capital Project Description | Installation of high-bandwidth microwave radio infrastructure to accommodate CRD infrastructure                           |
| Project Rationale                     | Installation of high-bandwidth microwave radio infrastructure to accommodate CRD infrastructure  |                       |                                     |                             |   |
| Project Number                        | 24-01  | Capital Project Title | Charters Road Watermain Replacement | Capital Project Description | Replacement of watermain on Charters Road as part of larger transportation project being undertaken by District of Sooke. |
| Project Rationale                     | Roads project being completed by District of Sooke with Sooke's contractor replacing CRD AC watermain, as agreed to between CRD and Sooke by Memorandum of Understanding.  |                       |                                     |                             |   |

|                                       |   |                       |   |
|---------------------------------------|---|-----------------------|---|
| Service: 2.680 JDF Water Distribution |   |                       |   |
| Project Number                        | 24-02   | Capital Project Title | Hwy 14 Watermain Relocation                                     |
| Capital Project Description           | Relocation of CRD watermain in MOTI right of way. Project work to be bundled within MOTI's project.   |                       |   |
| Project Rationale                     | Relocation of watermain in vicinity Hwy 14 and Idlemore Road. MOTI to manage transportation project with CRD to fund the portion of watermain relocation.   |                       |   |
| Project Number                        | 16-06   | Capital Project Title | Vehicle & equipment replacement (funding from replacement fund) |
| Capital Project Description           | Vehicle and equipment replacement.  |                       |   |
| Project Rationale                     | This is for the replacement of vehicles and equipment used by CRD Integrated Water Services for the day-to-day operation and maintenance of the Juan De Fuca distribution system. These replacements are funded from the Juan De Fuca Vehicle and Equipment Replacement Fund.   |                       |   |
| Project Number                        | 23-02   | Capital Project Title | Vehicle to support the meter replacement program                |
| Capital Project Description           | Purchase of a Transit Van equipped with tools and equipment to support the meter replacement program  |                       |   |
| Project Rationale                     | A Transit Van equiped with tools and equipment is required for the on site work to be done during the multi year meter replacement program. It will be more effective to setup a vehicle with the required tools and fittings related to replacing meters rather than having to setup a different vehicle based on the operational needs of the day/week/month. |                       |   |
| Project Number                        | 17-07   | Capital Project Title | Site Decommissioning - General                                  |
| Capital Project Description           | Planning for decommissioning of unused sites.   |                       |   |
| Project Rationale                     | This is a provisional item to allow engineering and planning reviews of old facilities with a view to possible future site uses.  |                       |   |
| Project Number                        | 17-09   | Capital Project Title | Emergency Main Replacement                                      |
| Capital Project Description           | Major main replacement under emergencies.   |                       |   |
| Project Rationale                     | This item is to fund the costs of responding to emergency major main breaks and conducting replacements.  |                       |   |

|                                       |  |                       |   |                             |   |
|---------------------------------------|--|-----------------------|---|-----------------------------|---|
| Service: 2.680 JDF Water Distribution |  |                       |   |                             |   |
| Project Number                        | 17-12  | Capital Project Title | Large Meters/Meter Vaults Components Replacement    | Capital Project Description | Replacement or repairs to components in large meters/vaults as required.                  |
| Project Rationale                     | This is an annual provision for the replacement of obsolete and worn out large (greater than 2” diameter) meters, adding new meters and upgrading meter vaults.  |                       |   |                             |   |
| Project Number                        | 17-13  | Capital Project Title | Site Security Upgrades                              | Capital Project Description | Upgrading and replacement of security systems for sites as required.                      |
| Project Rationale                     | This is an annual allowance for upgrading and maintaining equipment, security and control systems at distribution facilities such as pump stations, PRV chambers and reservoirs. Items such as access hatches, fencing, etc., will be modified to provide a larger degree of security.   |                       |   |                             |   |
| Project Number                        | 17-15  | Capital Project Title | Distribution System Improvements                    | Capital Project Description | Unplanned distribution system improvements or decommissioning.                            |
| Project Rationale                     | Historically, opportunities to complete work arise during the year which were not specifically identified and budgeted. This item typically relates to coordinating work programs (i.e. JDF water main replacements and municipal paving programs) with the municipalities or development and taking advantage of opportunities during the year that were not specifically identified. |                       |   |                             |   |
| Project Number                        | 17-16  | Capital Project Title | Hydraulic Model Yearly Update                       | Capital Project Description | Annual hydraulic model update.  |
| Project Rationale                     | This item is required to input the pipes installed that year into the hydraulic computer model, followed by calibration and testing in order to keep the model up to date for design and planning purposes.  |                       |   |                             |   |
| Project Number                        | 21-03  | Capital Project Title | Hydrant & Flush Replacement, Upgrades and Additions | Capital Project Description | Upgrade, replacement or installation of flushes and fire hydrants, and fire flow testing. |
| Project Rationale                     | This is an annual provision for replacing old and outdated hydrants, flushes and associated works and access, as well as adding new hydrants to the system where requested by the municipalities or fire departments.  |                       |   |                             |   |

|                                       |   |                       |   |
|---------------------------------------|---|-----------------------|---|
| Service: 2.680 JDF Water Distribution |   |                       |   |
| Project Number                        | 21-04   | Capital Project Title | Residential Service & Meter Replacement |
| Capital Project Description           | Replacement of residential water meters as highlighted by the 2017 KWL Water Audit report.  |                       |   |
| Project Rationale                     | This is an annual provision for replacing failed residential services and meters, as well as proactively replacing services and meters in areas with historically large number of breaks. |                       |   |
| Project Number                        | 21-05   | Capital Project Title | Pump Station Equipment Replacements     |
| Capital Project Description           | Unplanned pump station repairs and equipment replacement  |                       |   |
| Project Rationale                     | This is an annual provision for unplanned pump station repairs and equipment replacement.   |                       |   |
| Project Number                        | 21-06   | Capital Project Title | SCADA Equipment Replacement             |
| Capital Project Description           | Unplanned replacement of SCADA and electrical equipment.  |                       |   |
| Project Rationale                     | This is an annual provision for unplanned SCADA and electrical equipment replacement.   |                       |   |
| Project Number                        | 21-07   | Capital Project Title | Reservoir Equipment Replacement         |
| Capital Project Description           | Replacement or repairs to components at reservoir sites.  |                       |   |
| Project Rationale                     | This is an annual provisional for unplanned replacement of equipment, such as safety devices and mechanical fittings, at reservoir sites.   |                       |   |
| Project Number                        | 21-09   | Capital Project Title | Valve Replacement                       |
| Capital Project Description           | Unplanned replacement and repair of isolation and line valves, air valves, and pressure control valves.   |                       |   |
| Project Rationale                     | This is an annual provisional for unplanned replacement of valves, including air valves and check valves.   |                       |   |

|                                       |   |                       |   |

| Project Number                        | 16-07   | Capital Project Title | Update DCC Bylaw (Comprehensive Update in 2022) |
| Capital Project Description           | Planned update of the DCC Bylaw.  |                       |   |
| Project Rationale                     | This is a provisional item to cover questions that arise and referred to our consultants for advice. Every 5 years a comprehensive update is required and the previous DCC update was completed in 2017, with the next update scheduled to start in 2022.   |                       |   |
| Project Number                        | 21-01   | Capital Project Title | Sooke Henlyn Supply & Distribution Mains        |
| Capital Project Description           | Construction of water mains based upon development predictions from the Helgesen Pump Station westwards.  |                       |   |
| Project Rationale                     | Proposed work includes the continued installation of the supply and distribution water mains connected to the Helgesen pump station which was previously constructed in 2011 as part of the DCC program. The supply and distribution water mains will continue west as development proceeds towards the proposed Henlyn Tank. |                       |   |
| Project Number                        | 25-02   | Capital Project Title | Throup Road Watermain Installation              |
| Capital Project Description           | Future budget to install new watermain along Throup Road when District of Sooke completes connector road.   |                       |   |
| Project Rationale                     | Budget allocated for future collaboration works to align with Sooke's Throup Road connector project. Schedule to be driven by District of Sooke project.  |                       |   |

|          |             |  |

|-------------------|---|-----------------------|---|-----------------------------|--|
| Project Number    | 16-01   | Capital Project Title | Upgrades to Buildings at 479 Island Highway | Capital Project Description | Maintenance and changes to buildings and office layouts. |
| Project Rationale | The budget includes the following funds to upgrade and renew the buildings at 479 Island Highway: <ul style="list-style-type: none"> <li>• Improvements,Repairs, upgrades and changes to the buildings (provisional \$45,000)</li> <li>• Painting of the buildings. (provisional \$20,000 annually)</li> <li>• Repair and replacement of carpets, floors and walls. (provisional \$40,000 annually)</li> <li>• Climate Action initiatives and feasibility studies (\$55,000)</li> </ul> |                       |   |                             |  |

|                   |  |                       |                     |                             |   |
|-------------------|--|-----------------------|---------------------|-----------------------------|---|
| Project Number    | 17-01  | Capital Project Title | Voice Radio Upgrade | Capital Project Description | Replacement of end of life voice radio system repeaters, office, vehicle and handheld radios. |
| Project Rationale | Service Life and projected replacement: <ul style="list-style-type: none"> <li>• The service life of the mobile and portable units was forecast as 10 years at minimum, 15 years at maximum in 2005.</li> <li>• The present radio models used in the system have just been taken out of production by the manufacturer, there will be no new units available for purchase as of July 1, 2015.</li> <li>• Support for repairs and maintenance of the present radio will continue for the next 3 years at least.</li> <li>• There are no pressing issues with equipment maintenance or repairs, present repair rates suggest we can maintain the system for the next few years, and perhaps reach a 12-15 year lifespan on the present equipment.</li> </ul> |                       |                     |                             |   |

|                   |   |                       |                       |                             |   |
|-------------------|---|-----------------------|-----------------------|-----------------------------|---|
| Project Number    | 20-01   | Capital Project Title | Portable Pump Station | Capital Project Description | Portable pump station and generator to provide backup when a pump station is offline, in construction or to bypass a section of pipe. |
| Project Rationale | The RWS and JdF operation numerous water mains and pump stations. There are situations, when a pump station fails, construction of a pump station or bypassing a section of pipe, where a portable pump station with a generator is required to maintain the level of service. Portable PS was delivered in 2023 but some deficiencies, including the associated generator remain and may carry into 2024 to fully address. |                       |                       |                             |   |

General Comments:

Development Cost Charges Reserve Funds for Juan de Fuca Water Distribution was adopted in year 2000 for the purpose of providing funds for the capital costs of water facilities in the service areas.

These Reserve funds are received from Member Municipalities as Development Cost Charges (DCC's) to provide for the capital costs attributable to water sytem capacity improvements projects specified in the DCC capital expenditure program. Municipalities collect these DCC charges through building permits that are issued to developers for subdivision development.

Future years DCC's received from member municipalities are difficult to predict, due to unknown development activity in the Municipalities, influenced by market conditions. Estimates based on recent annual collections of DCCs, and the cyclical nature of property development.

\* Interest should be included in determining the estimated ending balance for the current year. Interest in planning years nets against inflation which is not included.

General Comments:

Reserve Fund is used for the purpose of replacing fleet vehicles including heavy equipment and associated mobile components, as outlined in the capital plan. Proceeds from disposals are estimated at 15% of replacement equipment purchases. Note not all vehicles are sold within the year in which they are replaced.

\* Interest should be included in determining the estimated ending balance for the current year. Interest in planning years nets against inflation which is not included.

# **CAPITAL REGIONAL DISTRICT**

## **2024 BUDGET**

### **Florence Lake Water System**

#### **COMMITTEE OF THE WHOLE**

OCTOBER 2023

**Service:**     **2.681   Florence Lake Water System**

**Commission:** **Juan De Fuca Water Distribution**

**DEFINITION:**

Florence Lake Water System is a water distribution local service of the regional district.  
Establishment Bylaw No. 4393, July 14, 2021

**SERVICE DESCRIPTION:**

The service is established for the purpose of upgrading the existing Florence Lake Water System, the operation of a water utility, and assuming responsibility for the administration, operation, and maintenance of the infrastructure providing water to the residences of Savory Road, Langford BC, in the area formerly known as the Florence Lake Improvement District.

**PARTICIPATION:**

Only the City of Langford includes a participating area for this service

**MAXIMUM LEVY:**

Greater of **\$75,000** or **\$6.3298 per \$1,000** of actual assessments

**MAXIMUM CAPITAL DEBT:**

# **CAPITAL REGIONAL DISTRICT**

## **2024 BUDGET**

### **Seagirt Water System**

#### **COMMITTEE OF THE WHOLE**

OCTOBER 2023

**Service:** 2.682 Seagirt Water System

**Commission:** Juan De Fuca Water Distribution

**DEFINITION:**

Seagirt Water System is a water distribution local service of the regional district.  
The establishment and operation of Seagirt Water System is done by Bylaw No. 4487, December 14, 2022

**SERVICE DESCRIPTION:**

The service is established for the purpose of upgrading the existing Seagirt Water System, the operation of a water utility, and assuming responsibility for the administration, operation, and maintenance of the infrastructure providing water to the residences of the area formerly known as the Seagirt Waterworks District.

**PARTICIPATION:**

Juan de Fuca Electoral Area

**MAXIMUM LEVY:**

Greater of \$320,000 or \$3.4824 per \$1,000 of actual assessments

**MAXIMUM CAPITAL DEBT:**

| Project Number    | 23-03   | Capital Project Title | Seagirt Watermain Extension | Capital Project Description | Upgrade of Seagirt water distribution system |
| Project Rationale | Upgrades to the Seagirt Improvement District water distribution system including engineering, construction and administration costs for full replacement of the existing SID water distribution system. Upgrade infrastructure to include 150mm diameter water distribution mains, new hydrants, new service connections with meter and meter boxes, air valves and isolation valves as required. |                       |                             |                             |  |

# Change in Budget 2023 to 2024

Service: 3.717 & 3.798C Core Area Wastewater

## Total Expenditure

## Comments

### 2023 Budget

59,310,738

### Change in Salaries:

|                               |   |   |
|-------------------------------|---|---|
| Base salary change            | - | Inclusive of estimated collective agreement changes |
| Step increase/paygrade change | - |   |
| Other (explain as necessary)  | - |   |
| Total Change in Salaries      | - |   |

### Other Changes:

#### Operations

|                                |             |   |
|--------------------------------|-------------|---|
| Supplies - Chemical & Other    | 846,840     | Over 20% increase to chemical cost and increase frequency of carbon media replacement to reduce odours                            |
| Allocation - IWS Operations    | 670,391     | Labour allocations from Inflationary lifts, reflecting staff safety and administration for Core Area                              |
| RTF Operations                 | 375,000     | HRMG operating costs and RTF insurance expense  |
| Allocation - Standard Overhead | 197,785     | Standard overhead   |
| Allocation - Other             | 198,960     | Inflationary increases for Enviro Monitoring & Marine Protection Programs, Infrastructure Engineering, Facilities Management etc. |
| Operating - Other              | 139,715     | Inflationary increases for contract services, insurance and rentals, etc.   |
| Repairs & Maintenance          | 34,833      | Adjustment of budget to reflect operational requirements  |
| Utilities                      | (197,985)   | Adjustment to water and electricity based on understanding from ongoing operational experience                                    |
| Biotreatment and Disposal      | (1,508,424) | Cost reduced from short term biosolids management option  |
| Reserve Transfers              | (400,000)   | Reducing contributions to reserves temporarily  |

#### Capital

|                             |             |   |
|-----------------------------|-------------|---|
| CAWTP Debt Retirement       | (4,341,430) | One-time early payout of debt related to the Core Area Wastewater Treatment Project (CAWTP) in 2023 |
| Transfer to Capital Reserve | (1,000,000) | Reducing the reserve contribution in 2024 and reinstating it in the following years                 |
| CAWW Debt                   | 947,397     | Long-term debt financing starting in 2023. Bulk of new debt servicing costs begin in 2024           |
| Transfer to Debt Reserve    | (144,288)   | One-time additional transfer in 2023, not in 2024   |
| Other                       | 25,000      | Interest expense increases  |

Total Other Changes

(4,156,206)

### 2024 Budget

55,154,532

|   |       |  |
|---|-------|--|
| % expense increase from 2023:                     | -7.0% | Requisition funding is 96.9% of combined service revenue |
| % Requisition increase from 2023 (if applicable): | 8.2%  |  |

### Overall 2023 Budget Performance

(expected variance to budget and surplus treatment)

#### 3.717 - Core Area Wastewater Operations

'There is a favourable variance of \$185k. A small surplus of 185k will be transferred to the Operating Reserve Fund at the end of 2023.

#### 3.798C - Debt - Core Area Wastewater Capital

#### **COMMITTEE OF THE WHOLE**

OCTOBER 2023

|                 |  |   |
|-----------------|--|---|
| <b>Service:</b> | <b>3.717 Core Area Wastewater Operations</b> | <b>Committee: Core Area Liquid Waste Management</b> |
|-----------------|--|---|

**DEFINITION:**

Provision of sewage treatment and disposal through treatment plant facilities and outfalls for member participants.

**SERVICE DESCRIPTION:**

This program is for the provision of sub-regional wastewater collection and treatment in the Core Area and Western Communities. Although the largest component of the program budget is for the operation and maintenance of the McLoughlin Point Wastewater Treatment and Residuals Treatment Plants and conveyance systems, many other key programs are funded through and support these budgets including engineering (capital projects), odour control, and marine monitoring and protection.

**PARTICIPATION:**

Operating costs to be recovered by requisition to all participating members based on measured flow from previous year.

**MAXIMUM LEVY:**

N/A

**MAXIMUM CAPITAL DEBT:**

**3.717 Core Area Wastewater Operations Asset and Reserve Summary**  
**Summary Schedule**  
**2024 - 2028 Financial Plan**

**Asset Profile**

**Core Area Wastewater Operations**

Construction of the Core Area Wastewater Treatment Plant, Residuals Treatment Plant, pump stations and conveyance systems will be completed in 2021. The treatment plants, pump stations and conveyance systems provide tertiary wastewater treatment to the Core Area and Westshore Communities.

## Profile

### Core Area Wastewater Operations

Bylaw 4144 - Starting in 2021, the operating reserve account is established for operating and maintenance activities that typically do not occur annually. These maintenance activities are large expenses and to avoid large swings in the operating budget, funds are set aside annually to undertake this maintenance.

### Assumptions/Background:

Cyclical maintenance reserve account with funding for Outfall Inspection, Heat Recovery Exchange System Cleaning, other major non-annual maintenance expenditures. The Operating Reserve fund also includes contributions from Environmental Services and the Residual Treatment Facility

\* Interest should be included in determining the estimated ending balance for the current year. Interest in planning years nets against inflation which is not included.

## ERF Reserve Fund Schedule

### ERF: CAWW Fund for Equipment Replacement

In 2021, all remaining funds from old legacy trunk budgets were transferred into the amalgamated Core Area Wastewater service equipment reserve fund.

| Equipment Replacement Fund<br>Fund: 1022 Fund Center: 102229 | Estimated        | Budget           |                  |                  |                  |                  |

|---|--|--|--|
| <p><b>Project Number</b><br/>         Project number format is "yy-##"<br/>         "yy" is the last two digits of the year the project is planned to start.<br/>         "##" is a numerical value. For example, 23-01 is a project planned to start in 2023.</p> <p>For projects in previous capital plans, use the same project numbers previously assigned.</p>               | <p><b>Capital Project Description</b><br/>         Briefly describe project scope and service benefits.<br/>         For example: <i>"Full Roof Replacement of a 40 year old roof above the swimming pool area; The new roofing system meets current energy standards with an expected service life of 35 years".</i></p>  | <p><b>Carryforward from 2022</b><br/>         Input the carryforward amount from the 2022 capital plan that is remaining to be spent.<br/>         Forecast this spending in 2023 to 2027.</p>   | <p><b>Project Drivers</b><br/> <b>Maintain Level of Service</b> = Project maintains existing or improved level of service.<br/> <b>Advance Board or Corporate Priority</b> = Project is a Board or Corporate priority.<br/> <b>Emergency</b> = Project is required for health or safety reasons.<br/> <b>Cost Benefit</b> = Project provide economic benefit to the organization.</p>  |
| <p><b>Capital Expenditure Type</b><br/> <b>Study</b> - Expenditure for feasibility and business case report.<br/> <b>New</b> - Expenditure for new asset only<br/> <b>Renewal</b> - Expenditure upgrades an existing asset and extends the service ability or enhances technology in delivering that service<br/> <b>Replacement</b> - Expenditure replaces an existing asset</p> | <p><b>Total Project Budget</b><br/>         Provide the total project budget, even if it extends beyond the 5 years of this capital plan.</p>  | <p><b>Long-term Planning</b><br/> <b>Master Plan / Servicing Plan</b> = Plan that identifies new assets required to meet future needs.<br/> <b>Asset Management Plan / Sustainable Service Delivery Plan</b> = Integrated plan that identifies asset replacements based on level of service, criticality, condition, risk, replacement costs as well as external impacts.<br/> <b>Replacement Plan</b> = Plan that identifies asset replacements based primarily on asset age or asset material/type.<br/> <b>Condition Assessment</b> = Assessment that identifies asset replacements based on asset condition.</p> |  |
| <p><b>Capital Project Title</b><br/>         Input title of project. For example "Asset Name - Roof Replacement", "Main Water Pipe Replacement".</p>  | <p><b>Funding Source Codes</b><br/>         Debt = Debenture Debt (new debt only)<br/>         ERF = Equipment Replacement Fund<br/>         Grant = Grants (Federal, Provincial)<br/>         Cap = Capital Funds on Hand<br/>         Other = Donations / Third Party Funding<br/>         Res = Reserve Fund<br/>         STLoan = Short Term Loans<br/>         WU = Water Utility<br/>         If there is more than one funding source, use additional rows for the project.</p> | <p><b>Asset Class</b><br/> <b>L</b> - Land<br/> <b>S</b> - Engineering Structure<br/> <b>B</b> - Buildings<br/> <b>V</b> - Vehicles<br/> <b>E</b> - Equipment</p>  | <p><b>Cost Estimate Class</b><br/>         Class A (±10-15%) = Estimate based on final drawings and specifications; used to evaluate tenders.<br/>         Class B (±15-25%) = Estimate based on investigations, studies or preliminary design; used for budget planning.<br/>         Class C (±25-40%) = Estimate based on limited site information; used for program planning.<br/>         Class D (±50%) = Estimate based on little/no site information; used for long-term planning.</p> |

| Capital Project Description                                   | The Penrhyn Siphon is PVC pipe, and has never been flushed or assessed. Flushing and assessment of the pipe is required.   |                       |  |
| Project Rationale   | The Penrhyn Siphon is PVC pipe, and has never been flushed or assessed. Flushing and assessment of the pipe is required.   |                       |  |
| Project Number  | 24-07  | Capital Project Title | Parsons Siphon Assessment              |
| Capital Project Description                                   | The Parsons Siphons are PVC and steel pipe, and have never been flushed or assessed. Flushing and assessment of the pipe is required.  |                       |  |
| Project Rationale   | The Parsons Siphons are PVC and steel pipe, and have never been flushed or assessed. Flushing and assessment of the pipe is required.  |                       |  |
| Project Number  | 25-01  | Capital Project Title | Admirals Siphon Assessment             |
| Capital Project Description                                   | The Admirals Siphon is PVC pipe, and has never been flushed or assessed. Flushing and assessment of the pipe is required.  |                       |  |
| Project Rationale   | The Admirals Siphon is PVC pipe, and has never been flushed or assessed. Flushing and assessment of the pipe is required.  |                       |  |
| Project Number  | 24-12  | Capital Project Title | Harriet Siphon Cleaning and Assessment |
| Capital Project Description                                   | Specialized flushing and cleaning to remove solids from both 400m siphons.   |                       |  |
| Project Rationale   | The Harriet Siphons were unable to be inspected in 2023 as they are 50% full of solids. The siphons need to be flushed or they will continue to accumulate solids and be completely plugged. Special flushing and cleaning equipment is required to clean both of these 400m long siphons. |                       |  |

|   |   |                       |  |                             |   |

| Project Number    | 24-16  | Capital Project Title | Biosolids Particle Size Optimization | Capital Project Description | Installation of equipment to ensure biosolids particle size meets reuse option specifications. |
| Project Rationale | Biosolids beneficial reuse options are evolving. There is potential that a new end use may come into play in 2024, requiring the need to install new equipment to ensure required particle size. |                       |                                      |                             |  |

**3.798C Debt - Core Area Wastewater Capital Asset and Reserve Summary**  
**Summary Schedule**  
**2024 - 2028 Financial Plan**

**Reserve Schedule Summary**

**Core Area Wastewater**

The Wastewater Treatment Project (WTP) provides tertiary treatment for wastewater from the core area municipalities of Victoria, Esquimalt, Saanich, Oak Bay, View Royal, Langford and Colwood, and the Esquimalt and Songhees Nations. The WTP is built to meet the provincial and federal regulations for treatment at December 31, 2020. The Project consists of three main elements: McLoughlin Point Wastewater Treatment Plant, Residuals Treatment Facility, and the Conveyance System

**Assumptions/Background:**

The funding strategy for the capital reserve fund is based upon the 25 year replacement plan as by Stantec during the construction of the Core Area Wastewater Treatment Project

\* Interest should be included in determining the estimated ending balance for the current year. Interest in planning years nets against inflation which is not included.

### Debt Reserve Fund Schedule Core Area Wastewater

Bylaw 4377 - The debt reserve fund was established for the specified purpose of funding future debt servicing payments or debt retirements. Monies in the debt repayment reserve will fund debt servicing and early repayment of debts issued to fund the Core Area Wastewater Treatment Project

### Debt Reserve Schedule

## **2024 BUDGET**

### **Saanich Peninsula Water Supply**

#### **COMMITTEE OF THE WHOLE**

OCTOBER 2023

**Service:** 2.610

**Saanich Peninsula Water Supply**

**Committee: Saanich Peninsula Water**

**DEFINITION:**

To purchase water and to acquire, design, construct, reconstruct, purchase, maintain and operate facilities and to acquire property easements, licences and authorities for the supply of water to Central Saanich, North Saanich, and Sidney, for distribution by the municipalities. Letters Patent, December 22, 1976; revised Sept. 27, 1984. Amended SLP April 27, 1978 and March 19, 1986.

**SERVICE DESCRIPTION:**

This service provides for the purchase of bulk water for supply to Central Saanich, North Saanich, and Sidney, for distribution within their municipalities. Included in the program is the responsibility to provide design, construction, operation and maintenance, licenses, and water quality monitoring to the service area.

**PARTICIPATION:**

Central Saanich / North Saanich / Sidney

**MAXIMUM LEVY:**

**MAXIMUM CAPITAL DEBT:**

As established by Inspector of Municipalities.

**COMMISSION:**

Saanich Peninsula Water Commission established by Letters Patent to advise the Board with respect to this function.

**FUNDING:**

Costs are recovered through the sale of bulk water.

**CAPITAL DEBT:**

**6.5%****Overall 2023 Budget Performance**

(expected variance to budget and surplus treatment)

*Favourable water sales variance of \$300,000 (4%) due to higher than budgeted water demand largely a result of dry summer weather. This additional revenue will be used to offset bulk water purchase overages. The net surplus of \$100,000 will be transferred to the Capital Reserve Fund.*

|-------------------|---|-----------------------|--------------------------------------|-----------------------------|---|
| Project Number    | 18-04   | Capital Project Title | Post Disaster Emergency Water Supply | Capital Project Description | Identify and procure emergency systems for post disaster preparedness |
| Project Rationale | In the event of a disaster, it is proposed to have in place the ability to source, treat (if required) and distribute drinking water during the initial and sustained response and recovery phases to the public. This item will see the study of the issue in 2017 and 2018 with the anticipated purchase of one or more emergency distribution systems in 2018 and beyond.Initial investigation has highlighted areas, such as having hardened hydrants/standpipes that the CRD should be investing in. Additional funds are required to start implementing these additional works. |                       |                                      |                             |   |

|                   |   |                       |   |                             |  |
|-------------------|---|-----------------------|---|-----------------------------|--|
| Project Number    | 20-02   | Capital Project Title | Hamsterly Pump Station Backup Power Generator | Capital Project Description | Addition of a backup power generator at the Hamsterly Pump Station |
| Project Rationale | From the 2018 DCC Update, KWL identified that the addition of backup power at the Hamsterly Pump Station is required. Funds are required to design and construct backup power for the Hamsterly Pump Station. |                       |   |                             |  |

|                   |   |                       |                            |                             |   |
|-------------------|---|-----------------------|----------------------------|-----------------------------|---|
| Project Number    | 21-01   | Capital Project Title | Level of Service Agreement | Capital Project Description | Determine and develop appropriate level of service agreements with the participating municipalities for water supply. |
| Project Rationale | The SPW Service has numerous transfer points with the participating municipalities. Funding is required to determine the pressure and flow at transfer points with the participating municipalities for water supply. |                       |                            |                             |   |

|   |  |                       |                                  |
|---|--|-----------------------|----------------------------------|
| Service: 2.610 Saanich Peninsula Water Supply |  |                       |                                  |
| Project Number                                | 21-04  | Capital Project Title | SCADA Upgrades                   |
| Capital Project Description                   | SCADA upgrades and planning in conjunction with the Juan de Fuca Water Distribution, Saanich Peninsula Water and Wastewater, and Core Area Wastewater Services.  |                       |                                  |
| Project Rationale                             | The existing SCADA system is nearing end of life for equipment. The SCADA system provides vital operational monitoring and control information for the Saanich Peninsula Water System. Additionally, the Juan de Fuca Water Distribution, Saanich Peninsula Wastewater, Regional Water System, and Core Area Wastewater services require similar upgrades and integration. This project will be carried out with the other services so that an fully integrated system can be implemented.   |                       |                                  |
| Project Number                                | 21-05  | Capital Project Title | SPW System Upgrade and Expansion |
| Capital Project Description                   | Upgrade vulnerable sections of the SPW system to a resilient system better able to withstand a seismic event, and extend sections of the system to have dual feed redundancy. Vulnerable sections are cement   |                       |                                  |
| Project Rationale                             | This project is for design and replacement of cement pipe sections that are susceptible to failure during a seismic event. Funds are required for detailed design and construction of the Bear Hill section of transmission main from Mt Newton to the Dean Park Lower tank along East Saanich Road including a new PRV, detailed design of the transmission main from McTavish Tank to Mills Road.The budget breakdown of the works: Bear Hill Section design and construction of new transmission main and PRV station \$14,200,000; conceptual and detailed design of the transmission main from Mctavish Reservoir to Mills Road \$500,000. Budget also includes preliminary design for replacement of permastrand and AC pipe between Dean Park Feeder Main between Dean Park Lower and Dean Park Middle Tanks. |                       |                                  |
| Project Number                                | 22-01  | Capital Project Title | Water Strategic Plan Update      |
| Capital Project Description                   | Update the strategic plan to inform future works and identify hydraulic deficiencies.  |                       |                                  |
| Project Rationale                             | A water distribution system changes with development demand. A periodic update of the strategic plan to identify hydraulic deficiencies and inform future works is periodically required to ensure the level of service.   |                       |                                  |

|-------------------|--|-----------------------|--------------------------|-----------------------------|---|
| Project Number    | 22-02  | Capital Project Title | Microwave Radio Upgrades | Capital Project Description | To provide a high bandwidth communications backbone to the SPW/SPWW systems, a microwave communications system will be installed. |
| Project Rationale | Multiple facilities throughout the CRD RWS system require additional bandwidth to allow for proper monitoring and control. This project will enable the initial design and preliminary installation of a high bandwidth microwave backbone that will be able to be leveraged by multiple CRD operational groups. The installation of this backbone will be coordinated with the other IWS service areas. |                       |                          |                             |   |

|                   |   |                       |                               |                             |   |
|-------------------|---|-----------------------|-------------------------------|-----------------------------|---|
| Project Number    | 22-03   | Capital Project Title | Keating Cross Road Water Main | Capital Project Description | MoTI driven project, MoTI has expectation of CRD contributing (TBD), approximately 500m of 500mm DI, agreement not in place yet |
| Project Rationale | MoTI driven project, MoTI has expectation of CRD contributing (TBD), approximately 500m of 500mm DI |                       |                               |                             |   |

|                   |   |                       |                    |                             |                                   |
|-------------------|---|-----------------------|--------------------|-----------------------------|-----------------------------------|
| Project Number    | 23-01   | Capital Project Title | DCC Program Update | Capital Project Description | 5-year update of the DCC program. |
| Project Rationale | Review of the DCC program and identify any projects that may require a full DCC update. |                       |                    |                             |                                   |

|   |  |                       |   |                             |   |
|---|--|-----------------------|---|-----------------------------|---|
| Service: 2.610 Saanich Peninsula Water Supply |  |                       |   |                             |   |
| Project Number                                | 23-04  | Capital Project Title | RTU & PLC Upgrade and Replacement       | Capital Project Description | Upgrade RTU programming within the SPWS service, upgrade the PLC at the Deep Cove pump station, and upgrade the telecommunications from the Hamsterly PS. |
| Project Rationale                             | Equipment and programming upgrades are required system wide but specifically at the Deep Cove and Hamsterly pump stations to deal with equipment and technology nearing end of life.   |                       |   |                             |   |
| Project Number                                | 25-01  | Capital Project Title | Hamsterly Pump Station Capacity Upgrade | Capital Project Description | Increase the capacity of the Hamsterly Pump Station to address increased water demand. This is the service's contribution to the DCC project.             |
| Project Rationale                             | In the 2018 KWL DCC Update report, the Hamsterly Pump Station was identified to require addition of a third pump to meet increased water demand. This is for the Saanich Peninsula Water service's contribution to the DCC project. Funds are required for the design and construction of the additional pump. |                       |   |                             |   |
| Project Number                                | 24-01  | Capital Project Title | Dean Park Road Well Decommissioning     | Capital Project Description | Decommissioning of a groundwater well at 1557 Dean Park Road.   |
| Project Rationale                             | Decommissioning of a former groundwater well at 1557 Dean Park Road. Initial decommissioning may only including well sealing for compliance with provincial regulations but eventually the electrical and concrete structure will also need to be decommissioned.  |                       |   |                             |   |

**2.610 Saanich Peninsula Water**  
**Summary Schedule**  
**2024 - 2028 Financial Plan**

**Asset Profile**

**Saanich Peninsula Water**

One of the 16 CRD drinking water systems across the region, Saanich Peninsula Water Supply obtains treated drinking water from the Regional Water Supply System and is responsible for the bulk trunk water supply systems for Central Saanich, Sidney & North Saanich. Assets include land, 46 kilometres of water supply mains, nine balancing reservoirs, nine pumping stations, two pressure reducing stations, nine supply meters and two rechlorination stations.

**Reserve/Fund Summary**

General Comments:

Saanich Peninsula Water Development Cost Charges (DCC's) was adopted in 2005 for the purpose of providing funds to assist with the capital costs of providing, constructing, altering or expanding the Districts water & wastewater systems that services the Member Municipalities.

The above cash flow only reflects DCC Reserve information for Water System only (Wastewater's information will be provided in the Wastewater budgets). These Reserve funds are received from member municipalities as Development Cost Charges (DCC's) to provide for the capital costs of water capacity system improvements within the service areas.

In December 2018 the bylaw was ammended to remove Development Cost Charges on new projects to recognize that the fund's balance exceeded the total of current development projects.

\* Interest should be included in determining the estimated ending balance for the current year. Interest in planning years nets against inflation which is not included.

General Comments:

Saanich Peninsula Water Capital Reserve Fund was adopted in 1985 for the purpose of capital payments including planning, engineering and legal costs for providing, latering or expanding water system infrastructure related to the Saanich Peninsula Water Supply System.

The fund is used for the purpose of funding the Service Capital infrastructure related directly or indirectly to water facilities, (excluding DCC) capital expenditures.

\* Interest should be included in determining the estimated ending balance for the current year. Interest in planning years nets against inflation which is not included.

# **CAPITAL REGIONAL DISTRICT**

## **2024 BUDGET**

### **Saanich Peninsula Wastewater**

#### **COMMITTEE OF THE WHOLE**

OCTOBER 2023

**DEFINITION:**

Provision of sewage treatment and disposal through treatment plant facilities and outfall for member participants.

**SERVICE DESCRIPTION:**

This program is for the provision of wastewater collection and treatment to the Saanich Peninsula municipalities of Central Saanich, North Saanich, and Sidney. Although the largest component of the program budget is for the operation and maintenance of the systems, many other key programs are funded through and support these budgets including engineering (capital projects), odour control, and marine monitoring and protection.

**PARTICIPATION:**

Operating costs to be recovered by requisition to all participating members based on measured flow from previous year.

**MAXIMUM LEVY:**

Establishment Bylaw No. 2388/2439 - Greater of \$5,663,000 or \$1.56 / \$1,000 of actual assessed value of land and improvements.

**MAXIMUM CAPITAL DEBT:**

See Debt Budget 3.775 - debt fully retired in 2016

**SPWWS SEWER SYSTEM:**

| <u>Location</u> | <u>Allocation for 2023</u> |
|-----------------|----------------------------|
| Airport         | 1.76%                      |

**Change in Budget 2023 to 2024**

**Service:** 3.718 Saanich Peninsula Wastewater

**Total Expenditure**

**Comments**

**2023 Budget**

**4,747,515**

**Change in Salaries:**

|                               |   |
|-------------------------------|---|
| Base salary change            | - |
| Step increase/paygrade change | - |
| Other (explain as necessary)  | - |
| Total Change in Salaries      | - |

**Other Changes:**

|                       |           |
|-----------------------|-----------|
| Labour Allocation     | 84,610    |
| Reserve Contributions | 449,724   |
| Waste Sludge          | (400,000) |
| BC Permit             | 27,340    |
| Chemical              | 23,610    |
| Other                 | 60,361    |
| Total Other Changes   | 245,644   |

IWS labour charge out rate lift  
A one-time increase contribution to ERF and a minor contribution increment to the ORF  
One-time saving due to delay from the OMS receiving facility  
Fee to discharge increased by the province  
Over 20% increase on chemical expense  
Increase in utilities, cyclical maintenance costs, etc.

**2024 Budget**

**4,993,159**

|   |       |
|---|-------|
| Transfer Reserve                                  | 9.47% |
| % expense increase from 2023:                     | 5.17% |
| % Requisition increase from 2023 (if applicable): | 5.39% |

Requisition funding is 96.1% of service revenue

**Overall 2023 Budget Performance**

(expected variance to budget and surplus treatment)

*There is a one time favourable variance of \$520k due mainly to tipping solids at Hartland instead of the Residual Treatment Facility. This amount will be split into two funds: the Operating Reserve Fund and Equipment Replacement Fund, with each fund receiving \$260k.*

## CAPITAL REGIONAL DISTRICT

|   |   |  |  |
|---|---|--|--|
| <p><b>Project Number</b></p> <p>Project number format is "yy-##"</p> <p>"yy" is the last two digits of the year the project is planned to start.</p> <p>"##" is a numerical value. For example, 23-01 is a project planned to start in 2023.</p> <p>For projects in previous capital plans, use the same project numbers previously assigned.</p>   | <p><b>Capital Project Description</b></p> <p>Briefly describe project scope and service benefits.</p> <p>For example: <i>"Full Roof Replacement of a 40 year old roof above the swimming pool area; The new roofing system meets current energy standards with an expected service life of 35 years".</i></p> | <p><b>Carryforward from 2022</b></p> <p>Input the carryforward amount from the 2022 capital plan that is remaining to be spent. Forecast this spending in 2023 to 2027.</p>  | <p><b>Project Drivers</b></p> <p><b>Maintain Level of Service</b> = Project maintains existing or improved level of service.</p> <p><b>Advance Board or Corporate Priority</b> = Project is a Board or Corporate priority.</p> <p><b>Emergency</b> = Project is required for health or safety reasons.</p> <p><b>Cost Benefit</b> = Project provide economic benefit to the organization.</p>  |
| <p><b>Capital Expenditure Type</b></p> <p><b>Study</b> - Expenditure for feasibility and business case report.</p> <p><b>New</b> - Expenditure for new asset only</p> <p><b>Renewal</b> - Expenditure upgrades an existing asset and extends the service ability or enhances technology in delivering that service</p> <p><b>Replacement</b> - Expenditure replaces an existing asset</p> | <p><b>Total Project Budget</b></p> <p>Provide the total project budget, even if it extends beyond the 5 years of this capital plan.</p>   | <p><b>Funding Source Codes</b></p> <p>Debt = Debenture Debt (new debt only)</p> <p>ERF = Equipment Replacement Fund</p> <p>Grant = Grants (Federal, Provincial)</p> <p>Cap = Capital Funds on Hand</p> <p>Other = Donations / Third Party Funding</p> <p>Res = Reserve Fund</p> <p>STLoan = Short Term Loans</p> <p>WU = Water Utility</p> <p>If there is more than one funding source, use additional rows for the project.</p> | <p><b>Long-term Planning</b></p> <p><b>Master Plan / Servicing Plan</b> = Plan that identifies new assets required to meet future needs.</p> <p><b>Asset Management Plan / Sustainable Service Delivery Plan</b> = Integrated plan that identifies asset replacements based on level of service, criticality, condition, risk, replacement costs as well as external impacts.</p> <p><b>Replacement Plan</b> = Plan that identifies asset replacements based primarily on asset age and <del>service</del> <sup>asset</sup> <del>type</del> <sup>material</sup> type.</p> <p><b>Condition Assessment</b> = Assessment that identifies asset replacements based on asset condition.</p> |
| <p><b>Capital Project Title</b></p> <p>Input title of project. For example "Asset Name - Roof Replacement", "Main</p>   | <p><b>Asset Class</b></p> <p><b>L</b> - Land</p> <p><b>S</b> - Engineering Structure</p> <p><b>B</b> - Buildings</p> <p><b>V</b> - Vehicles</p>   |  | <p><b>Cost Estimate Class</b></p> <p>Class A (±10-15%) = Estimate based on final drawings and specifications; used to evaluate tenders.</p> <p>Class B (±15-25%) = Estimate based on investigations, studies or preliminary design; used for budget planning.</p> <p>Class C (±25-40%) = Estimate based on limited site information; used for program planning.</p> <p>Class D (±50%) = Estimate based on little/no site information; used for long-term planning.</p>   |

| Service: 3.718 Saanich Peninsula Wastewater |  |                       |  |                             |
| Project Number                              | 19-06  | Capital Project Title | Odour Control Upgrades                     | Capital Project Description |
| Project Rationale                           | Continuing on from the 2018 KWL Odour Control Program study, HDR has been retained to complete the detailed design of the odour control upgrades at SPWWTP.  |                       |  |                             |
| Project Rationale                           | In 2017 KWL was retained to conduct an audit of the odour control systems in the Core Area and Saanich Peninsula Wastewater systems. KWL made recommendations on remediation works include: SPWWTP odour control management study and Sidney and Keating PS ventilation study (2019); SPWWTP Odour Control Improvements Design ; SPWWTP Odour Control Improvements Construction .                        |                       |  |                             |
| Project Number                              | 21-04  | Capital Project Title | Voice Radio Replacement                    | Capital Project Description |
| Project Rationale                           | Replacement of the voice radios, in coordination with the RWS, SPW, JDF, and Core Area services.   |                       |  |                             |
| Project Rationale                           | End of life replacement of the voice radios, in coordination with the RWS, SPW, JDF, and Core Area services.   |                       |  |                             |
| Project Number                              | 18-10  | Capital Project Title | Equipment Replacement - Annual Provisional | Capital Project Description |
| Project Rationale                           | Funds are required for emergency replacement of equipment that is unplanned and outside maintenance contingencies.   |                       |  |                             |
| Project Rationale                           | Funds are required for emergency replacement of equipment that is unplanned and outside maintenance contingencies.   |                       |  |                             |
| Project Number                              | 22-02  | Capital Project Title | Microwave Radio Upgrades                   | Capital Project Description |
| Project Rationale                           | To provide a high bandwidth communications backbone to the SPW/SPWW systems, a microwave communications system will be installed.  |                       |  |                             |
| Project Rationale                           | Multiple facilities throughout the CRD RWS system require additional bandwidth to allow for proper monitoring and control. This project will enable the initial design and preliminary installation of a high bandwidth microwave backbone that will be able to be leveraged by multiple CRD operational groups. The installation of this backbone will be coordinated with the other IWS service areas. |                       |  |                             |

|   |   |                       |                                    |                             |   |
|---|---|-----------------------|------------------------------------|-----------------------------|---|
| Service: 3.718 Saanich Peninsula Wastewater |   |                       |                                    |                             |   |
| Project Number                              | 23-02   | Capital Project Title | Electrical & Control Upgrades      | Capital Project Description | Replacement of the Sidney PS PLC and RTUs before failure, and updating programming of facilities to supported hardware and operating systems. WWTP Capacitor replacement is planned for 2024. |
| Project Rationale                           | The Sidney PS PLC and RTU have been discontinued by the manufacturer, leaving no support if they fail. Additionally, the Sidney PS, Keating PS and SPWWTP have control systems on outdated control software no longer supported by current hardware and operating systems. Funds are required to replace the Sidney PS PLC and RTU and update the programming of the control software to a supported hardware and operating system.     |                       |                                    |                             |   |
| Project Number                              | 24-06   | Capital Project Title | IT Core Infrastructure Replacement | Capital Project Description | Replacement of Core IT infrastructure such as servers, network switches, UPS, etc for equipment end of life   |
| Project Rationale                           | Project for IT Core Infrastructure Replacement associated with SPWWS. Program to be managed by IT.  |                       |                                    |                             |   |
| Project Number                              | 20-03   | Capital Project Title | Trunk Sewer Relining               | Capital Project Description | Based upon CCTV inspection, high priority relining of about 1,300m of 500mm dia asbestos cement sewer will start in 2022. Another 1600m may need to be relined within the next 5 years.       |
| Project Rationale                           | The trunk sewer mains were inspected in 2018-2019 resulting in approximately 1,300 m of 500 mm diameter asbestos cement sewer pipe requiring relining to maintain integrity. Funds are required to retain a contractor to conduct the pipe relining starting at the most northern section of the Sidney Trunk main. This project will be substantially complete in 2023 with only minor close out works expected to continue into 2024. |                       |                                    |                             |   |

|                 |              |                                     |
|-----------------|--------------|-------------------------------------|
| <b>Service:</b> | <b>3.718</b> | <b>Saanich Peninsula Wastewater</b> |
|-----------------|--------------|-------------------------------------|

|                          |   |                              |                                 |                                    |   |
|--------------------------|---|------------------------------|---------------------------------|------------------------------------|---|
| <b>Project Number</b>    | 20-04   | <b>Capital Project Title</b> | Manhole Repairs and Replacement | <b>Capital Project Description</b> | Based upon inspections, high priority repairs and relining will start on some MH's in Central Saanich and Sidney. Repairs/relining will be scheduled in the next 5 years. |
| <b>Project Rationale</b> | During the trunk sewer main inspections in 2018-2019, the manholes were inspected as well. A number of manholes were identified with major defects requiring repairs or relining, mostly in Central Saanich and Sidney. Funds are required to retain a contractor to carry out manhole repairs. |                              |                                 |                                    |   |

|                          |  |                              |                            |                                    |   |
|--------------------------|--|------------------------------|----------------------------|------------------------------------|---|
| <b>Project Number</b>    | 27-02  | <b>Capital Project Title</b> | Trunk Sewer Relining - Ph2 | <b>Capital Project Description</b> | Based upon CCTV inspection, about another 1600m of 500mm dia asbestos cement sewer should be lined in 2029. |
| <b>Project Rationale</b> | The trunk sewer mains were inspected in 2018-2019 resulting in approximately 800 m of 500 mm diameter asbestos cement sewer pipe requiring relining to maintain integrity. Funds are required to retain a contractor to conduct the pipe relining starting where Phase 1 left. |                              |                            |                                    |   |

| <b>Project Rationale</b> | This item is for a planned review and update of the DCC Program. |                              |                             |                                    |                                   |

Summary Schedule  
2024 - 2028 Financial Plan

Asset Profile

Saanich Peninsula Wastewater Assets

Construction of the Saanich Peninsula Wastewater Treatment Plant (SPWWTP) was completed in January 2000 to provide wastewater service for Central Saanich, North Saanich and Sidney, as well as the local First Nations, Victoria Airport Authority, and the Institute of Ocean Sciences Centre. Annually, the SPWWTP produces on average 3,600 tonnes of sludge which is currently hauled being treated at the Residuals Treatment Facility at Hartland. The SPWWTP heat recovery system was commissioned in February 2011 and has supplied treatment plant effluent waste heat to the Panorama Recreation Center for heating its swimming pools since then. Assets in the Saanich Peninsula Wastewater System include land, the SPWWTP and a secondary treatment plant, three pumping stations, thermal recovery and other buildings, 14 kilometres of collections and conveyance (gravity & pressure) mains, and a marine outfalls.

Reserve/Fund Summary

|                             | Estimated | Budget    |           |           |           |           |

See attached reserve schedules for projected annual cash flows.

**Capital Reserve Fund Schedule - SPWWTP**

**Capital Reserve Fund SPWWTP - DCC Portion and Capital Reserve Portion**

Bylaw 2760 established a Reserve Fund for the Saanich Peninsula Wastewater System. There are two portions in the Reserve Fund: Development Cost Charges is deposited in the DCC portion and expenditures are restricted. Surplus funds from the Operating budget are deposited to the Capital Reserve portion and expenditures provide for capital works.

**DCC Portion**

**Fund: 1012**

**Fund Center: 101356**

ERF Reserve Fund Schedule SPWWTP

ERF: SPWWTP ERF or PERS Fund for Equipment

ERF Reserve to fund replacement of equipment that lasts less than 15 years in the NWT System. Also called PERS (Priority Equipment Replacement). Example motors, pumps... There are 2 PERS, Trunks and Treatment Plant; and 1 ERF for SPWWTP Lab Equipment

| Equipment Replacement Fund- SPWWTP<br>Fund: 1022<br>Fund Center: 101700 | Estimated | Budget    |           |           |           |           |

The ERF funds the replacement or repair of equipment with a service life of 15 years or less. In the past the ERF has also been referred to as a Priority Equipment Replacement Strategy (PERS). There are three individual ERF funds; Wastewater Treatment Plant (E00561), Trunk Sewers (E00562) and Saanich Peninsula Laboratory Equipment (E00586)

\* Interest in planning years nets against inflation which is not included.

**Profile**

**Saanich Peninsula Wastewater**

Starting in 2003, maintenance reserve accounts were established for operating and maintenance activities that typically do not occur annually. These maintenance activities are large expense and to and to avoid large swings in the operating budget, funds are set aside annually to undertake this maintenance. The maintenance activities are the replacement and disposal of the odour control carbon at the treatment plant approximately every 2 years, replacement and disposal of the odour control carbon at Keating Pump Station every 5 years, the regulatory inspection of the Bazan Bay marine outfall every 5 years and the cleaning and rebuild of the District Energy Sharing System heat exchanger every 5-8 years.

**Operating Reserve Schedule**

# Service Budget Highlights >

**Committee of the Whole**  
**Wednesday September 25, 2023**

## Materiality Threshold

and **\$50,000**

all service budgets are  
included in Appendix G of the  
agenda package

| 2) EXECUTIVE SERVICES  |  | \$000's |      | %     |       |
|--|--|---------|------|-------|-------|
| 2.1) CAO & Executive Office (Appendix G, Part A, PDF pg 4, Print pg 3)   |  | \$185   |      | 19.9% |       |
| <ul style="list-style-type: none"><li>New Manager of Corporate Initiatives and Administration (1.0 FTE) and base salary and step increases for existing staff.</li></ul>   |  | Req     | Fees | Other | Alloc |
|  |  | 100%    | -    | -     | -     |
| 2.2) Human Resources (Appendix G, Part A, PDF pg 11, Print pg 10)  |  | \$571   |      | 18.0% |       |
| <ul style="list-style-type: none"><li>New Manager of EDIA and Indigenous Strategies (1.0 FTE), new Manager of Human Resources (1.0 FTE), and new Accessibility &amp; EDI Specialist (1.0 FTE).</li></ul>   |  | Req     | Fees | Other | Alloc |
|  |  | -       | -    |       | 100%  |
| 2.3) Corporate Communications (Appendix G, Part A, PDF pg 18, Print pg 17)   |  | \$60    |      | 4.1%  |       |
| <ul style="list-style-type: none"><li>Auxiliary labour for Corporate Website project, base salary and step increases for existing staff, and one-time expenses for a citizen experience survey and build EDI principles into public participation framework. These costs are partially offset by reduction in 2023 one-time consultancy costs.</li></ul> |  | Req     | Fees | Other | Alloc |
|  |  | -       | -    | -     | 100%  |

| 3) CORPORATE SERVICES  |  | \$000's |      | %      |       |
|--|--|---------|------|--------|-------|
| 3.2) Board Expenditures (Appendix G, Part A, PDF pg 37, Print pg 13)   |  | \$76    |      | 6.1%   |       |
| <ul style="list-style-type: none"><li>Increased costs related to new software licenses for meeting management, and inflationary increases for Director remuneration. Costs partially offset by reduction in one-time funding for 2023 Board Orientation.</li></ul> |  | Req     | Fees | Other  | Alloc |
|  |  | 100%    | -    | -      | -     |
| 3.4) First Nations Relations (Appendix G, Part A, PDF pg 47, Print pg 23)  |  | (\$83)  |      | (6.3%) |       |
| <ul style="list-style-type: none"><li>Reduction of one-time 2023 costs for First Nations Relations initiatives, partially offset by new First Nations Relations staffing (1.0 FTE).</li></ul>  |  | Req     | Fees | Other  | Alloc |
|  |  | -       | -    | 100%   | -     |

| 4) FINANCE AND TECHNOLOGY  | \$000's |      | %      |       |
|--|---------|------|--------|-------|
| 4.1.1) Finance (Appendix G, Part A, PDF pg 67, Print pg 3)   | \$303   |      | 3.6%   |       |
| <ul style="list-style-type: none"><li>Financial support for various initiatives (1.0 FTE), financial support for Capital Project Delivery (0.5 Term) and Transportation Service (0.5 Term). Additional base salary and step increases including the annualization and reclassification of 2023 initiatives. Increase to salaries partially offset by reduction in 2023 one-time contract for services costs.</li></ul> | Req     | Fees | Other  | Alloc |
|  | -       | -    | -      | 100%  |
| 4.3.4) Feasibility Study Reserve Fund (Appendix G, Part A, PDF pg 125, Print pg 61)  | \$203   |      | 137.4% |       |
| <ul style="list-style-type: none"><li>New Feasibility Study of a Regional Transportation Service, net of return of existing funding to participants.</li></ul>   | Req     | Fees | Other  | Alloc |
|  | 100%    | -    | -      | -     |

## 5) PARKS AND RECREATION

### 5.1) Regional Parks (Appendix G, Part B, PDF pg 2, Print pg 1)

\$1,565

8.9%

- Increase in contract for services for various initiatives, increased operating costs for fleet expansion, and additional debt servicing costs for land acquisition fund.

| Req  | Fees | Other | Alloc |
|------|------|-------|-------|
| 100% | -    | -     | -     |

### 5.2) Panorama (Appendix G, Part B, PDF pg 43, Print pg 42)

\$438

4.3%

- Increased transfer to reserves, additional base salaries and step increases for existing staff and new Facility Maintenance Supervisor (1.0 FTE) . Costs partially offset by reduction in debt servicing costs.

| Req | Fees | Other | Alloc |
|-----|------|-------|-------|
| 24% | 64%  | 12%   | -     |

### 5.3) SEAPARC (Appendix G, Part B, PDF pg 78, Print pg 79)

\$673

14.7%

- New Manager of Operations (1.0 FTE), additional auxiliary hours to support increased service levels, and higher costs for base salaries and step increases.

| Req | Fees | Other | Alloc |
|-----|------|-------|-------|
| 12% | 69%  | 18%   | -     |

| 6) ENVIRONMENTAL SERVICES  |      | \$000's |       | %       |  |
|--|------|---------|-------|---------|--|
| 6.2.5) Millstream Site Remediation (Appendix G, Part B, PDF pg 143, Print pg 44)   |      | (\$518) |       | (96.4%) |  |
| <ul style="list-style-type: none"><li>Reduction in debt servicing costs from exercising early payout option in 2023, under MFA LA 3513.</li></ul>                                      | Req  | Fees    | Other | Alloc   |  |
|  | 100% | -       | -     | -       |  |
| 6.2.8) LWMP – Core and West Shore (Appendix G, Part B, PDF pg 172, Print pg 73)  |      | \$211   |       | 56.6%   |  |
| <ul style="list-style-type: none"><li>Increased transfer to reserve to fund long-term biosolids planning</li></ul>   | Req  | Fees    | Other | Alloc   |  |
|  | 3%   | 97%     | -     | -       |  |
| 6.2.11) Climate Action & Adaption (Appendix G, Part B, PDF pg 172, Print pg 73)  |      | \$284   |       | 12.4%   |  |
| <ul style="list-style-type: none"><li>Increased transfer to General Capital Fund for capital plan requirements, partially offset by decreased Operating Reserve transfers.</li></ul>   | Req  | Fees    | Other | Alloc   |  |
|  | -    | -       | 100%  | -       |  |
| 6.2.13) Sooke Stormwater Quality Management (Appendix G, Part B, PDF pg 185, Print pg 86)  |      | \$51    |       | 129.6%  |  |
| <ul style="list-style-type: none"><li>Increased contract for services costs for Sooke Basin Water Quality Sampling Study, partially offset by reduction in reserve transfer.</li></ul> | Req  | Fees    | Other | Alloc   |  |
|  | 2%   | -       | 98%   | -       |  |
| 6.2.14) Core and West Shore Stormwater Quality Management (Appendix G, Part B, PDF pg 190, Print pg 91)  |      | \$111   |       | 14.9%   |  |
| <ul style="list-style-type: none"><li>Increased contract for services costs for Harbour Water Quality Sampling Study and increased transfer to reserve.</li></ul>                      | Req  | Fees    | Other | Alloc   |  |
|  | 19%  | -       | 81%   | -       |  |

| 6) ENVIRONMENTAL SERVICES (Continued)  | \$000's  | %           |              |               |  |
|--|----------|-------------|--------------|---------------|--|

\* 2022 and 2023 totals have been recast from the 2023 Final SEC approved by the Board. The restatement reclassified an existing position from FTE to Term to classify it appropriately. The total 2022 and 2023 count of FTE plus Term positions remains unchanged.

### Reserve Forecasts

Tables 1 and 3 provide the 2024 budgeted and 2023 forecasted reserve amounts. Tables 2 and 4 provide a summary of significant reserve balances at the start of 2023.

**Table 1 - Estimated Operating Reserves Activity (in \$ millions)**

| Reserve Activity               | 2024<br>Financial Plan \$ | 2023<br>Forecast \$ |
|--------------------------------|---------------------------|---------------------|
| <b>Opening Reserve Balance</b> | 46.6                      | 55.3                |
| Transfers from Operating       | 3.6                       | 7.0                 |
| Interest Income                | 1.6                       | 1.9                 |
| Transfer to Operating          | (23.1)                    | (17.6)              |
| <b>Closing Reserve Balance</b> | <b>\$28.7</b>             | <b>\$46.6</b>       |

Consolidated operating reserves through the end of 2023 are forecasted to be \$46.6 million. Net budgeted transfers, interest income, and funding of operating costs result in a budgeted closing balance of \$28.7 million at the end of 2024. Operating reserves reflect funds retained and segregated by service to fund future operating activities. The CRD currently manages 62 operating reserve funds.

Table 2 summarizes the significant operating reserve balances by service. A detailed listing of reserve balances is included in the audited financial statements.

**Table 2: January 1, 2023 Operating Reserve Balances by Service (>\$1M)**

| Description                 | Amount<br>(\$M) |
|-----------------------------|-----------------|

| <b>Ending balance</b>              | <b>\$71.2</b>             | <b>\$87.6</b>       |

<sup>1</sup>Reserve balances restated to include specified purpose funds for Landfill Closure and Post Closure, and Development Cost Charges

Capital reserves at the end of 2023 are forecasted to be \$87.6 million. Net of budgeted transfers, interest income, and funding to capital projects result in a budgeted closing balance of \$71.2 million at the end of 2024. Capital reserves reflect funds retained and segregated by service to fund future capital activities. The CRD currently manages 74 capital reserve funds.

Table 4 summarizes the significant capital reserve balances by service and includes the consolidated balance for the Equipment Replacement Fund (ERF). The ERF is one fund established by bylaw but covers all CRD services. Specified purpose funds for Landfill Closure and Post Closure, and Development Cost Charges have been shown separately. A detailed listing of reserve balances will be included in the audited financial statements.

**Table 4: January 1, 2023 Capital Reserve Balances by Service, Including ERF (>\$1M)**

 Operating Budgets with increases/(decreases) over 3.5% and \$50,000 in 2024

## REPORT TO ELECTORAL AREAS COMMITTEE MEETING OF MONDAY, OCTOBER 23, 2023

**SUBJECT**     **2024 Preliminary Electoral Area Budget Review**

### **ISSUE SUMMARY**

To present 2024 Electoral Area (EA) Budgets for recommended approval to the Capital Regional District Board.

### **BACKGROUND**

The Capital Regional District (CRD) provides a range of regional, sub-regional and local services. Regional services are provided to the entire region, sub-regional services to groups of participating Municipalities, EAs and local services to single Municipalities, an EA or to groups of residents within a defined service area. Through the combined EAs, the CRD provides services to approximately 23,300 residents.<sup>1</sup>

Budgets for review are specific to services in the Juan de Fuca (JDF) EA, the Salt Spring Island (SSI) EA, and the Southern Gulf Islands (SGI) EA. EA services delivered are established through the *Local Government Act* and Service Establishment Bylaws and are guided by the Board Strategic and Corporate Plans.

### **Budget Approval Process**

Under direction provided by the Board, review and recommendation for approval of EA service budgets, including local service commission budgets, is delegated to the EAC. These budgets will be included in the preliminary 2024 CRD Financial Plan to be presented on October 25, 2023 to Committee of the Whole.

As in previous years and in alignment with the Commission Handbook Guidelines, where applicable, review and approval of local EA commission budgets will take place annually through the fall. Budget changes following commission review will be forwarded to the Board and considered at final budget approval in March 2024.

New in 2023, the SSI Local Community Commission (LCC) was established towards the end of the second quarter. The CRD Board delegated administrative and advisory authority to the LCC for fourteen (14) existing SSI local services. This delegated authority includes review and recommendation of budgets annually.

On September 14 and 21, 2023, the LCC met to review preliminary budgets. At these meetings budget direction was provided where these impacts have been incorporated into the preliminary SSI financial plan.

<sup>1</sup> 2021 Census Data

## **Service Planning and Budget Development**

The CRD Board approved the 2023-2026 Board Priorities and CRD Corporate Plan earlier this year. The Plan includes a number of community needs with outcome statements for staff to advance through the four-year election term. The 2024 service planning process marked the first year of the four-year planning cycle. The planning cycle is designed to ensure alignment and implementation of strategic objectives during the term. Any initiatives and/or changes to service levels will be advanced through the annual service and financial planning cycle.

As part of the planning process, the Executive Leadership Team (ELT) has met multiple times over recent months to review service plans, initiative business cases (IBCs), and financial implications in alignment with the corporate plan and Board approved financial planning guidelines. ELT has prioritized initiatives in consideration of fiscal constraints, organizational capacity and workforce pressures.

Budget development is based on resources required for delivery of core services, impacts of new initiatives, proposed capital expenditures and other cost pressures such as inflation and contractual agreements. Service budgets include operating and capital plans in addition to any changes in reserve funds. A detailed discussion of the main budget drivers for each EA is included in this report supported by Appendices A, B and C.

## **ALTERNATIVES**

### *Alternative 1*

The Electoral Areas Committee recommends the Committee of the Whole recommend to the Capital Regional District Board:

1. That the 2024 Electoral Area Services Budgets be given provisional approval as presented; and
2. That the new initiatives for January 1, 2024 implementation identified in Appendix D, be approved for expenditure.

### *Alternative 2*

The Electoral Areas Committee recommends the Committee of the Whole recommend to the Capital Regional District Board:

1. That the 2024 Electoral Area Services Budgets be given provisional approval with specific direction on amendments; and
2. That the new initiatives for January 1, 2024 implementation identified in Appendix D, be approved with specific direction on amendments.

## **IMPLICATIONS**

### *Financial Implications*

### **Requisition**

Table 1 summarizes the change in tax requisition from 2023 final to 2024 provisional for each EA.

**Table 1: 2024 Provisional vs 2023 Final Requisition**

|               | 2024 Provisional Requisition |           | 2023 Final Requisition |           | \$ Change |           | % Change |
|---------------|------------------------------|-----------|------------------------|-----------|-----------|-----------|----------|
|               | \$M                          | \$ Per HH | \$M                    | \$ Per HH | \$M       | \$ Per HH | Per HH   |
| <b>JDF EA</b> | 2.83                         | 715       | 2.67                   | 675       | 0.16      | 40.33     | 5.98%    |
| <b>SSI EA</b> | 8.37                         | 1,275     | 7.64                   | 1,164     | 0.73      | 111.31    | 9.56%    |
| <b>SGI EA</b> | 3.86                         | 568       | 3.70                   | 545       | 0.16      | 22.94     | 4.21%    |

Requisition increases are inclusive of all regional, sub-regional, and EA services in addition to the Capital Regional Hospital District (CRHD). However, Table 1 excludes changes in specified and defined area services within each EA. It should also be noted that regional and sub-regional service budgets may change as service plans and budgets are deliberated at Committee of the Whole and the Board on October 25, 2023.

The actual tax rates impact to EA residents will vary depending on the specified and defined service areas in which they reside in addition to their individual 2024 property assessment values. The 2024 preliminary requisition impact shown in Table 1 (above) reflects the 2023 assessment values from BC Assessments. New assessment information will be incorporated in the final budget when revised data is released by BC Assessments in early February 2024.

Detailed Requisition summaries by service area are included in Appendix A-1 (JDF), Appendix B-1 (SSI), and Appendix C-1 (SGI).

### Operating Budget Overview

Table 2 summarizes the change in expenditures for each EA in the 2024 provisional budget compared to the 2023 final budget, for individual EA budgets only (excludes Regional, Sub-Regional, Joint EA and CRHD services).

**Table 2: Summary of Operating Budget (in \$ millions) by EA**

|               | 2024 Provisional Plan \$M | 2023 Financial Plan \$M* | \$M Change  | % Change    |
|---------------|---------------------------|--------------------------|-------------|-------------|
| <b>JDF EA</b> | 4.85                      | 4.65                     | 0.20        | 4.3%        |
| <b>SSI EA</b> | 11.40                     | 10.54                    | 0.86        | 8.2%        |
| <b>SGI EA</b> | 8.29                      | 8.10                     | 0.19        | 2.3%        |
| <b>Total</b>  | <b>24.54</b>              | <b>23.29</b>             | <b>1.25</b> | <b>5.4%</b> |

\*Based on Amendment Financial Plan (Bylaw No. 4570)

- JDF: The provisional 2024 operating budget is \$ 4.85 million, an increase of \$0.20 million or 4.3% from 2023. The primary driver of this increase is due to an increase in vehicle costs and rentals in JDF EA Parks. Other minor increases in operating expenses are primarily related to inflationary adjustments. Transfer to reserves have also increased in support of asset management plans and capital programs.
- SSI: The provisional 2024 operating budget is \$11.40 million, an increase of \$0.86 million or 8.2% from 2023. The increase in operating expenditures are primarily due to an incremental

staffing adjustment of 0.6 FTEs through IBC 16b-1.1 SSI Community Recreation. Additional pressures are related to higher service levels in SSI Community Parks and Recreation, increased contributions through the SSI Public Library service, higher sludge hauling and disposal costs through SSI Liquid Waste Disposal and cyclical maintenance costs (operating reserve funded) for local utility services. Transfers to reserves have increased in support of asset management plans and capital programs.

- SGI: The provisional 2024 operating budget is \$8.29 million, an increase of \$0.19 million or 2.3% from 2023. The primary driver of this increase is due to additional repairs and maintenance and screening disposal costs through the Magic Lake Estates Wastewater service. There is also pressure from a new resiliency program in the SGI Emergency service. Other minor increases in operating expense are due to inflationary adjustments partially offset by discontinued one-time expenses from 2023.

The Operating Budget Overview summary of changes by service, and by expenditure type are included in Appendix A-2 (JDF), Appendix B-2 (SSI) and Appendix C-2 (SGI).

### **Capital Budget Overview**

Capital plan highlights including capital projects over \$100,000 for each EA, are summarized in Appendix A-3 (JDF), Appendix B-3 (SSI) and Appendix C-3 (SGI).

Capital plans are developed through a process of reviewing:

- Projects in progress
- Condition of existing assets and infrastructure
- Regulatory, environmental, risk, health and safety
- New or renewal initiatives prioritized by communities

The following table summarizes the capital plan by EA.

**Table 3 - Summary of Capital Plan by Electoral Area (in \$ millions)**

|               | 2024 Capital Plan \$M | 2023 Capital Plan \$M* | \$M Change  | % Change     |
|---------------|-----------------------|------------------------|-------------|--------------|
| <b>JDF EA</b> | 2.43                  | 2.11                   | 0.32        | 15.3%        |
| <b>SSI EA</b> | 12.01                 | 6.64                   | 5.37        | 80.8%        |
| <b>SGI EA</b> | 6.15                  | 8.88                   | (2.73)      | -30.8%       |
| <b>Total</b>  | <b>20.59</b>          | <b>17.63</b>           | <b>2.96</b> | <b>16.8%</b> |

\*Based on Amendment Financial Plan (Bylaw No. 4570)

- JDF: The provisional 2024 capital plan is \$2.43 million, an increase of \$0.32 million or 15.3%. The increase is primarily due to new projects including site efficiency upgrades in Port Renfrew Refuse Disposal \$262k, a \$175k water quality sampling study in Wilderness Mountain Water, \$175k master plan studies in Port Renfrew Water/Sewer, and a \$160k vehicle replacement in the East Sooke Fire Protection service. Increases in capital are offset by projects completing by the end of 2023, including a firetruck replacement for Willis Point Fire Protection.

- SSI: The provisional 2024 capital plan is \$12.01 million, an increase of \$5.37 million or 80.8%. New projects in 2024 include construction improvements and electrical upgrades to the wastewater treatment plant in the Ganges Sewer service of \$3.45 million and \$575k respectively, design and construction of a park maintenance facility in the SSI Pool & Park Land of \$518k, a backup power system in Highland/Fernwood Water of \$470k, and water treatment plant SCADA upgrades in the Beddis Water service valued at \$220k.
- SGI: The provisional 2024 capital plan is \$6.15 million, a decrease of (\$2.73) million or (30.8%). New 2024 capital spending include a replacement firetruck for South Galiano Fire valued at \$400k, and \$285k in additional costs for the Money Lake Dam seismic reinforcement initiative in the Lyall Harbour Water service. Increases in capital are offset by projects completing by the end of 2023, including Hope Bay and Port Washington dock improvements in the SGI Harbour service, a mini pumper for Pender Fire, and partial completion of the Magic Lakes Estates wastewater treatment plant upgrade.

The 2024 Capital Plan Summary overview are included in Appendix A-4 (JDF), Appendix B-4 (SSI) and Appendix C-4 (SGI).

Capital projects are typically funded by annual contributions from operating, grants, reserves and/or long-term debt. Grant funding can have a significant impact on the implementation of the plan as program intakes and results are unknown during the planning process. When changes in funding occurs, financial plan amendments are prepared and presented for approval.

### **Advanced Approvals**

Advanced approval is requested in situations where the commencement or continuity of work before March 2024 is required to address operational needs. These are often related to items that have regulatory compliance implications, grant deadlines and capital projects for which tenders must be issued and where a delay can have negative impacts on service delivery. Items identified as required activities in advance of final budget approval are listed in Appendix D.

### **Summary**

The attached 2024 EA budget packages in Appendix A (JDF), Appendix B (SSI) and Appendix C (SGI), which include operating and capital, are provided for provisional approval. Appendix D contains items that, as a result of business requirements, require early approval in advance of final budget approval in March.

The provisional budget is subject to change as a result of the final 2023 surplus/deficits, receipt of revised assessment and any adjustments recommended by respective commissions prior to final approval of the financial plan in March 2024.

### **CONCLUSION**

The EA budgets have been delegated to the EAC by the CRD Board for review and provisional approval. Overall, the 2024 EA preliminary budgets have been prepared in alignment with service plans and direction received by the respective EA director.

**RECOMMENDATION**

The Electoral Areas Committee recommends the Committee of the Whole recommend to the Capital Regional District Board:

1. That the 2024 Electoral Area Services Budgets be given provisional approval as presented; and
2. That the new initiatives for January 1, 2024 implementation identified in Appendix D, be approved for expenditure.

|                         |                | 2023      | 2024    | 2025    | 2026      | 2027    | 2028    |
| Beginning Balance       |                | 125,101   | 197,001 | 262,491 | 327,981   | 202,170 | 267,160 |
| Transfer from Op Budget |                | 65,380    | 65,490  | 65,490  | -         | 65,490  | 65,490  |
| Transfer to Op Budget   |                | -         | -       | -       | (125,811) | (500)   | -       |
| Interest Income*        |                | 6,520     |         |         |           |         |         |
| Ending Balance \$       |                | 197,001   | 262,491 | 327,981 | 202,170   | 267,160 | 332,650 |

### Assumptions/Background:

Budgeted transfers to reserve will provide funding for elections every 4 years

\* Interest is included in determining the estimated ending balance for the current year. Interest in planning years nets against inflation which is not included.

## **2024 Budget**

### **UBCM**

### **EAC Review**

OCTOBER 2023

**Service:** 1.104 Union of B.C. Municipalities

**Committee:** Electoral Area

**DEFINITION:**

To provide for membership dues and convention expenses. Section 787 (b) - SLP - February 1, 1966.

**PARTICIPATION:**

All electoral areas and those municipalities not maintaining their own membership (currently electoral areas only) on the basis of converted hospital assessed value of land and improvements.

**MAXIMUM LEVY:**

No limit

**FUNDING:**

Requisition

**GENERAL INFORMATION:**

Association of Vancouver Island and Coastal Communities (AVICC)

Commencing 1982 costs relating to AVICC, which are incurred solely on behalf of the electoral areas, are included in the UBCM budget rather than Legislative and General Government.

# **CAPITAL REGIONAL DISTRICT**

## **2024 Budget**

### **Building Inspection**

#### **EAC Review**

OCTOBER 2023

**Service:** 1.318 Building Inspection

**Committee:** Electoral Area

**DEFINITION:**

To carry out the Building Regulations function as specified by Section 818 of the Local Government Act (Letters Patent - January 1, 1970).

**SERVICE DESCRIPTION:**

The building inspection department provides building inspection services to homeowners, builders and contractors in compliance with both the BC Building Code and CRD Building Bylaw 3741 (2010), Amendment 3780 (2011), and Amendment 4403 (2021). The Building inspection service includes receiving, reviewing and advising on building permit applications, processing of the applications including code analysis and referrals to other agencies, issuing building permits and verifying conditional requirements, arranging and carrying out site and construction inspections and granting final approval for occupancy. Staff also provides inspection services to other CRD departments on a cost recovery basis.

**PARTICIPATION:**

All Electoral Areas on the basis of their value of converted hospital assessments.

**MAXIMUM LEVY:**

Not stated.

**FUNDING:**

Fees and charges and requisition to all Electoral Areas

|  | Total Other Changes                               | 146,991           |  |
| 2024 Budget  |   | 2,241,973         |  |
| Summary of % Expense Increase  |   |                   |  |
|  | Increase in salaries                              | 3.4%              |  |
|  | 2024 IBC Expenses                                 | 3.7%              |  |
|  | 2024 Allocations                                  | 1.9%              |  |
|  | Legal Expenses                                    | 0.4%              |  |
|  | Balance of increase                               | 1.2%              |  |
|  | % expense increase from 2023:                     | 10.6%             |  |
|  | % Requisition increase from 2023 (if applicable): | 15.0%             | Requisition funding is 25.2% of service revenue                |
| Overall 2023 Budget Performance  |   |                   |  |
| (expected variance to budget and surplus treatment)  |   |                   |  |
| Revenues are projected at \$56,629 (2.8%) higher than budget primarily due to higher permit fee revenues driven by increased construction activity in Q1-2 2023. Operating expenditures are projected at \$89,603 (-4.4%) lower than budget primarily due to staff vacancies and lower equipment purchase expenses. The \$146,232 favourable variance will be transferred to the Operating Reserve Fund, which has an expected year end balance of \$529,573 before this transfer. |   |                   |  |

### Assumptions/Background:

\*Interest should be included in determining the estimated ending balance for the current year. Interest in planning years nets against inflation which is not included.

# **CAPITAL REGIONAL DISTRICT**

## **2024 Budget**

### **Electoral Area Fire Services**

#### **EAC Review**

OCTOBER 2023

**Service:**     **1.369 Electoral Area Fire Services**

**Committee: Electoral Area**

**DEFINITION:**

Service may undertake or cause to be undertaken for one or more electoral areas or defined areas thereof a program of fire regulation and may fix the terms and conditions under which the program will be provided, and, without limiting the generality of the foregoing, may, by bylaw, undertake different programs for different electoral areas or defined areas thereof (Juan de Fuca and Southern Gulf Islands).

**PARTICIPATION:**

Fire Service Areas within Juan de Fuca and Southern Gulf Islands Electoral Areas

**CAPITAL DEBT:**

N/A

**COMMISSION:**

N/A

**MAXIMUM LEVY:**

Supplementary LP's dated July 7, 1983 provide a maximum levy of \$0.246 per \$1,000.

**FUNDING:**

Requisition

**1.369 - Electoral Area Fire Services**

#### **Assumptions/Background:**

\*Interest should be included in determining the estimated ending balance for the current year. Interest in planning years nets against inflation which is not included.

# **CAPITAL REGIONAL DISTRICT**

## **2024 BUDGET**

### **Electoral Area Emergency Planning Coordination**

#### **EAC Review**

OCTOBER 2023

**Service:** 1.372 Emergency Planning Coordination

**Committee:** Planning, Transportation & Protective Services

**DEFINITION:**

No establishment bylaw. Service is provided by CRD staff for coordination of emergency operations for the CRD.

**SERVICE DESCRIPTION:**

This service provides support to a range of Protective Services responsibilities and to carry out the responsibilities legislated under the *Emergency Program Act*. Costs for staff are placed in this budget and allocated based on percentages to the other services, such as 911, hazmat, and emergency management.

**FUNDING:**

Allocations from protection services and requisition.

# **CAPITAL REGIONAL DISTRICT**

## **2024 Budget**

### **Vancouver Island Regional Library**

#### **EAC Review**

OCTOBER 2023

**Service:**    **1.119**    **Vancouver Island Regional Library**

**Committee:**    **Electoral Area**

## **2020 Budget**

A local service within the Juan de Fuca Electoral Area under Part 3 of the Library Act.  
Bylaw No. 2248 (November 23, 1994). Amended by Bylaw No. 2346 (February 12, 1997).

### **SERVICE DESCRIPTION:**

This service provides the services of the Vancouver Island Regional Library (VIRL) to the westerly portion of Juan de Fuca Electoral Area (JDFEA). The VIRL delivers service to the JDFEA through its Sooke and Port Renfrew Branches. Under the Library Act, S.B.C. 1994, the CRD was required to take over the library responsibilities belonging to School District No. 62 (Sooke) to participate in the regional library district. The library district is the Vancouver Island Regional Library District (VIRL), headquartered in Nanaimo. The CRD provides the service by funding a budget set by the VIRL and appointing a member to the library board. Service began in 1994.

### **PARTICIPATION:**

Westerly portion of Juan de Fuca Electoral Area.

### **MAXIMUM LEVY:**

None stated

### **FUNDING:**

Requisition

## **2024 Budget**

### **Langford EA - GVPL**

#### **EAC Review**

OCTOBER 2023

**Service:** 1.133 Langford EA - GVPL

**Committee:** Electoral Area

**DEFINITION:**

To establish a local service for the purpose of contributing to the cost of library services that are provided within the service area by the Greater Victoria Public Library District. Bylaw No. 2357 adopted February 1997.

**SERVICE DESCRIPTION:**

This service, established in 1997, provides the services of the Greater Victoria Public Library Board (GVPLB) to the Willis Point and Malahat areas within the Juan de Fuca Electoral Area. The service is on a contract basis because the service area is so small. The contract is annually renewed. Payment to the GVPLB is made in the form of a contribution to the GVLPB's budget. This service is one a number of services in which the CRD makes an annual contribution to a public library service.

**PARTICIPATION:**

A portion of the Electoral Area of Juan de Fuca.

**MAXIMUM LEVY:**

Greater of \$17,850 or \$0.33 / \$1,000 of actual assessed value of land and improvements. To a maximum of \$130,947.

**FUNDING:**

Requisition

### **Soil Deposit and Removal**

#### **EAC Review**

OCTOBER 2023

**Service:**    **1.319    Soil Deposit and Removal**

**Committee: Electoral Area**

**DEFINITION:**

The regulation of the deposit or removal of soil, sand, gravel, rock or other material on land in the municipality or in any area in the municipality (see 930(d)(e) of the Municipal Act). Authority received under SLP issued February 12, 1973, and as amended by SLP August 25, 1986. This function is performed by CRD Bylaw Officers , who ensure that permits are purchased by any person who deposits or removes said materials.

**SERVICE DESCRIPTION:**

Administration and enforcement of the Soil Deposit and Removal Bylaw for the Juan de Fuca Electoral Area (JdF EA).

**PARTICIPATION:**

Participants consist solely of the Juan de Fuca Electoral Area. Requisition to all participants on the basis of prior year caseload.

| Participants<br>Electoral Area | 2000 est | Percentage |
|--------------------------------|----------|------------|
| JDF EA                         | 1        | 100%       |

**MAXIMUM LEVY:**

Net cost of this function not to exceed **\$50,000**.

### **Community Planning (JDF)**

#### **EAC Review**

OCTOBER 2023

Service: 1.325 Community Planning

Committee: Electoral Area

**DEFINITION:**

To provide land use planning services at the community level for the JDF electoral area (Supplementary Letters Patent - January 1, 1970).

**SERVICE DESCRIPTION:**

Community Planning service involves preparation, review and amendment of five official community plans and two comprehensive community development plans.

Development Services involves preparation and administration of Land Use Bylaws, subdivision Bylaw, and process zoning amendments, development permits, development variance permits, soil deposit/removal permits, and review land and water referrals, subdivisions referrals, and ALR exclusions.

Administrative Services involves preparation of agendas, minutes and providing administrative support for the Juan de Fuca (JdF) Land Use Committee (LUC), six advisory planning commissions (APC), three board of variances, the Agricultural Advisory Planning Commission (AAPC), and the Economic Development Commission (EDC).

**PARTICIPATION:**

JDF Electoral Area on the basis of converted hospital assessments.

**MAXIMUM LEVY:**

None stated.

**FUNDING:**

Requisition and user fees.

| Project Number    | 22-02   | Capital Project Title | Otter Point Ground Water Study (for OCP) | Capital Project Description | Study of ground water availability to aid in land use decision making and support OCP policy |
| Project Rationale | Public comments received in response to a number of recent development proposals have raised concern that there is insufficient ground water resources to support both existing development and new development. The OCP supports development in rural areas where there are sufficient ground water resources and the development will not put resources at risk of contamination or depletion. The study will provide information to help determine this. The study may lead to further studies and monitoring. |                       |  |                             |  |

### Assumptions/Background:

To set aside funds for reimbursing District of Saanich for incident response, as per agreement between the CRD and Saanich

\*Interest should be included in determining the estimated ending balance for the current year. Interest in planning years nets against inflation which is not included.

### Assumptions/Background:

# **CAPITAL REGIONAL DISTRICT**

## **2024 Budget**

### **Emergency Program (JDF)**

#### **EAC Review**

OCTOBER 2023

**Service:** 1.370 JDF Emergency Program

**Committee:** Electoral Area

**DEFINITION:**

To provide an Emergency Program as an Extended Service under the Emergency Program Act.  
Establishment Bylaw No. 2109 (April 28, 1993). Repealed and replaced by Bylaw No. 2268 (December 14, 1994).  
Order in Council #287 provides the CRD with the same powers as a local authority under the Emergency Program Act.

**SERVICE DESCRIPTION:**

Governed by Bylaw #3444, this service provides planning and management of an emergency response plan for the Juan de Fuca (JdF) Electoral Area, including Port Renfrew, Willis Point and the Malahat. The emergency response plan involves response to, and recovery from, a community disaster or emergency.

The Planning and Protective Services department has administrative responsibility for the service and the Senior Manager of Protective Services has immediate operational responsibility. The Juan de Fuca Emergency Management Commission (JDFEMC) administers the service.

**PARTICIPATION:**

Electoral Area of Juan de Fuca.

**LEVY:**

The annual costs of providing the Extended Service of Emergency Program, net of grants and other revenue, shall be recovered by requisition of money under Section 809.1 of the Municipal Act under Section 809.1 of the Municipal Act to be collected by a property value tax to be levied and collected under Section 810.1 (1) of the Municipal Act.

**MAXIMUM LEVY:**

None stated.

**FUNDING:**

Requisition

### Assumptions/Background:

# **CAPITAL REGIONAL DISTRICT**

## **2024 Budget**

### **EA - Community Parks (JDF)**

#### **EAC Review**

OCTOBER 2023

**Service:** 1.405 JDF EA Community Parks & Recreation

**Committee:** Juan De Fuca Electoral Area Parks & Rec

**DEFINITION:**

To acquire, develop, operate and maintain community parks in the JDF Electoral Area.  
(Letters Patent - August 28, 1975).

**SERVICE DESCRIPTION:**

This is a service for the provision of community parks for the Juan de Fuca Electoral Area. The services provide for ocean and lake beach/foreshore access, trails, right-of-ways, easements, playgrounds, sports fields, a tennis court and skate park.

**PARTICIPATION:**

Electoral Area of Juan de Fuca

**MAXIMUM LEVY:**

Greater of \$227,173 or \$0.15 / \$1,000 on actual assessed value of land and improvements. To a maximum of \$487,076.  
(Bylaw 4087, Amend bylaw 245, March, 2016; Bylaw 4150, Juan de Fuca Community Parks Services Conversion Bylaw No. 1, 2017)

**COMMISSION:**

Continuation Bylaw #3763 (May 2011), an advisory commission for Community Parks and Recreation in the Juan de Fuca Electoral Area.  
Original establishment Bylaw for this commission Dec 2004.

**AUTHORITY:**

Requires written approval of electoral area Director. Participating electoral areas must be designated by bylaw.

**FUNDING:**

Requisition

**1.405 - EA - Community Parks (JDF)**

### Assumptions/Background:

# **CAPITAL REGIONAL DISTRICT**

## **2024 Budget**

### **Port Renfrew Refuse Disposal**

#### **EAC Review**

OCTOBER 2023

**Service:** 1.523 Port Renfrew Refuse Disposal

**Committee:** Electoral Area

**DEFINITION:**

To provide, maintain, operate and regulate disposal facilities. Local Service Bylaw No. 1745 (November 8, 1989), latest amendment 3357 (February 19, 2007).

**SERVICE DESCRIPTION:**

Provision of recycling and solid waste transfer station operations in Port Renfrew.

**PARTICIPATION:**

Local Service Area #3 of the Electoral Area of Sooke B(762)

**MAXIMUM LEVY:**

\$15.18 / \$1,000 on actual assessed value of land and improvements. To a maximum of \$2,585,406.

**MAXIMUM CAPITAL DEBT:**

N/A

**COMMISSION:**

Bylaw No. 3280, continues Port Renfrew Local Services Committee (September 14, 2005).  
Bylaw No. 3707, discontinues Local Services Committee (June 9, 2010).  
Bylaw No. 3745, continues under Port Renfrew Utility Committee (December 8, 2010).

**RESERVE FUND:**

Bylaw No. 2665 - Port Renfrew Solid Waste Removal and Disposal Capital Reserve Fund.

## **2024 Budget**

### **Port Renfrew Water**

#### **EAC Review**

OCTOBER 2023

**Service:**     **2.650**     **Port Renfrew Water**

**Committee: Electoral Area**

**DEFINITION:**

To establish, acquire, operate and maintain a water supply system for the Port Renfrew Water Area. The service is to supply, treat, convey, store and distribute water. Local Service Area Bylaw No.1747 (Nov 8, 1989). Amended Bylaw No. 1960 (Jan. 29, 1992).

**PARTICIPATION:**

Local Service Area #5, E(762)

**MAXIMUM LEVY:**

Greater of \$40,000 or \$18.28 / \$1,000 of actual assessed value of land and improvements. To a maximum of \$2,705,464.

**COMMISSION:**

Port Renfrew Local Service Committee established by Bylaw No. 1770 (November 22, 1989).  
Port Renfrew Utility Services Committee (Juan de Fuca EA) established by Bylaw No. 3281 (September 14, 2005).

**FUNDING:**

**User Charge:**

50% of operating cost to be collected by an annual user fee to be charged per single family equivalency actually connected to the system.

**Parcel Tax:**

50% of operating costs are collected as a parcel tax to be charged to every parcel within the local service area.

**Connection Charges:**

At cost - Bylaw No. 1803 (amended Bylaw 3892).

**RESERVE FUND:**

Approved by Bylaw No. 2138 (June 23, 1993); amended to sewer and water reserve fund by Bylaw No. 2577 (December 1997).

| Project Number | 20-01 | Capital Project Title | Hydrant Replacement Program | Capital Project Description | Hydrants are reaching their end of life and require replacement. |
|----------------|-------|-----------------------|-----------------------------|-----------------------------|--|

Project Rationale The hydrants in the water system are nearing their end of life. To maintain fire protection planned hydrant replacement is required.

|                |       |                       |                              |                             |   |
|----------------|-------|-----------------------|------------------------------|-----------------------------|---|
| Project Number | 22-01 | Capital Project Title | Alternative Approval Process | Capital Project Description | An alternative approval process to fund Supply System Replacement and AC Pipe Replacement Program |
|----------------|-------|-----------------------|------------------------------|-----------------------------|---|

Project Rationale A referendum is required to seek elector consent to borrow to fund the supply system replacement, AC pipe replacement, and SCADA replacements.

|                |       |                       |                           |                             |   |
|----------------|-------|-----------------------|---------------------------|-----------------------------|---|
| Project Number | 23-01 | Capital Project Title | Supply System Replacement | Capital Project Description | Replacement of the remainder of the asbestos cement supply system is required to maintain level of service. |
|----------------|-------|-----------------------|---------------------------|-----------------------------|---|

Project Rationale The 2017 project to replace a section of the aging asbestos supply pipe from the water treatment plant to the distribution system was complete. Funds are required to replace the remaining approximately 1.4 km of pipe so that service is maintained.

|                |       |                       |                             |                             |   |
|----------------|-------|-----------------------|-----------------------------|-----------------------------|---|
| Project Number | 23-02 | Capital Project Title | AC Pipe Replacement Program | Capital Project Description | Frequent asbestos cement distribution pipe failures necessitate their replacement to maintain the level of service. |
|----------------|-------|-----------------------|-----------------------------|-----------------------------|---|

Project Rationale There have been frequent pipe breaks with the existing asbestos cement pipe, replacement is required to maintain the level of service. Funds are required to design and develop a replacement program and replace priority pipe, starting with pipe in the Beach Camp area and Queesto Drv and Tsonoqua Drv, approximately 1 km of pipe.

Service: 2.650 Port Renfrew Water

Project Number23-03

Capital Project TitleMiscellaneous Repairs & Replacements

Capital Project DescriptionReplacement of SCADA equipment before equipment failure, and replacement of the water treatment roof

Project RationaleThe SCADA equipment is nearing its end of life and requires replacement before the equipment fails.The water treatment roof has had some minor repairs to address leaks, but requires replacement.

Project Number24-01

Capital Project TitleWater Master Plan Study

Capital Project DescriptionMaster Planning study for the Port Renfrew service area (25% CWF)

Project RationaleMaster Planning study for the Port Renfrew service area - Existing, Future and Inclusion of Pacheedaht First Nation to be delivered in parallel with Sewer Master Plan Study. Based on recent application, anticipated 75% GCF and 25% CWF for grant funding.

### Assumptions/Background:

-Transfer as much as operating budget will allow.

\* Interest is included in determining the estimated ending balance for the current year. Interest in planning years nets against inflation which is not included.

# **CAPITAL REGIONAL DISTRICT**

## **2024 Budget**

### **Wilderness Mountain Water**

#### **EAC Review**

OCTOBER 2023

**Service:** 2.691 Wilderness Mountain Water Service

**Committee:** Electoral Area

**DEFINITION:**

To finance, operate and maintain the supply, conveyance, treatment, storage and distribution of water to the Wilderness Mountain Local Service area that is within the JDF Electoral Area. The service was established by Bylaw No. 3503, adopted on May 14, 2008.

**PARTICIPATION:**

Wilderness Mountain Local Service Area

**MAXIMUM LEVY:**

Greater of \$130,000 or \$3.27/ \$1,000 of actual assessed value of land and improvements. To a maximum of \$329,424.

**MAXIMUM CAPITAL DEBT:**

|                     |  |
|---------------------|--|
| Maximum Authorized: | \$281,000 (MFA Bylaw No.3504, Wilderness Mountain Water Service adopted on May 14, 2008) |
| Borrowed:           | \$281,000 (MFA Bylaw No.3504, Wilderness Mountain Water Service)                         |

**COMMISSION:**

Wilderness Mountain Water Service Commission established by Bylaw No. 3511 (July 9, 2008).

**FUNDING:**

**Consumption Charge:**

Water Consumption charge will be collected from each Single Family Equivalent connected to the water system

**User Charge:**

Collected as a fixed user fee charged quarterly to each Single Family Equivalent connected to the system

**Parcel Tax:**

Charged to each taxable parcel in the service area whether connected or not.

**RESERVE FUND # 1075:**

Approved by Bylaw No. 3535 adopted on November 12, 2008.

# **CAPITAL REGIONAL DISTRICT**

## **2024 Budget**

### **Port Renfrew Sewer**

#### **EAC Review**

OCTOBER 2023

**Service:** 3.850 Port Renfrew Sewer

**Committee:** Electoral Area

**DEFINITION:**

To provide, operate and maintain sewage collection and disposal facilities for the Port Renfrew Sewerage System Specified Area - Bylaw No.1744, November 8, 1989. Amended Bylaw No. 1961, January 29, 1992.

**PARTICIPATION:**

Local Service Area C(762) LSA#2.

**MAXIMUM LEVY:**

Greater of \$40,000 or \$18.28 / \$1,000 on actual assessed value of land and improvements. To a maximum of \$884,597.

**MAXIMUM CAPITAL DEBT:**

Nil

**COMMISSION:**

Port Renfrew Local Services Committee established by Bylaw No. 1770, November 22, 1989.  
Port Renfrew Utility Services Committee (Juan de Fuca EA) established by Bylaw No. 3281 (September 14, 2005).

**FUNDING:**

**User Charge:** 50% of operating cost to be imposed as an annual user fee to each connected property.

**Parcel Tax:** 50% of operating costs are collected as a parcel tax to be charged to every parcel within the local service area.

**Connection Charge:** Based on actual cost.

**RESERVE FUND:**

Port Renfrew Sewer System Capital Reserve Fund, Bylaw No. 2139 (June 23, 1993).

|                         |                | 2023      | 2024    | 2025    | 2026      | 2027    | 2028    |
| Beginning Balance       |                | 125,101   | 197,001 | 262,491 | 327,981   | 202,170 | 267,160 |
| Transfer from Op Budget |                | 65,380    | 65,490  | 65,490  | -         | 65,490  | 65,490  |
| Transfer to Op Budget   |                | -         | -       | -       | (125,811) | (500)   | -       |
| Interest Income*        |                | 6,520     |         |         |           |         |         |
| Ending Balance \$       |                | 197,001   | 262,491 | 327,981 | 202,170   | 267,160 | 332,650 |

### Assumptions/Background:

Budgeted transfers to reserve will provide funding for elections every 4 years

\* Interest is included in determining the estimated ending balance for the current year. Interest in planning years nets against inflation which is not included.

## **2024 Budget**

### **UBCM**

### **EAC Review**

OCTOBER 2023

**Service:** 1.104 Union of B.C. Municipalities

**Committee:** Electoral Area

**DEFINITION:**

To provide for membership dues and convention expenses. Section 787 (b) - SLP - February 1, 1966.

**PARTICIPATION:**

All electoral areas and those municipalities not maintaining their own membership (currently electoral areas only) on the basis of converted hospital assessed value of land and improvements.

**MAXIMUM LEVY:**

No limit

**FUNDING:**

Requisition

**GENERAL INFORMATION:**

Association of Vancouver Island and Coastal Communities (AVICC)

Commencing 1982 costs relating to AVICC, which are incurred solely on behalf of the electoral areas, are included in the UBCM budget rather than Legislative and General Government.

# **CAPITAL REGIONAL DISTRICT**

## **2024 Budget**

### **Building Inspection**

#### **EAC Review**

OCTOBER 2023

**Service:** 1.318 Building Inspection

**Committee:** Electoral Area

**DEFINITION:**

To carry out the Building Regulations function as specified by Section 818 of the Local Government Act (Letters Patent - January 1, 1970).

**SERVICE DESCRIPTION:**

The building inspection department provides building inspection services to homeowners, builders and contractors in compliance with both the BC Building Code and CRD Building Bylaw 3741 (2010), Amendment 3780 (2011), and Amendment 4403 (2021). The Building inspection service includes receiving, reviewing and advising on building permit applications, processing of the applications including code analysis and referrals to other agencies, issuing building permits and verifying conditional requirements, arranging and carrying out site and construction inspections and granting final approval for occupancy. Staff also provides inspection services to other CRD departments on a cost recovery basis.

**PARTICIPATION:**

All Electoral Areas on the basis of their value of converted hospital assessments.

**MAXIMUM LEVY:**

Not stated.

**FUNDING:**

Fees and charges and requisition to all Electoral Areas

|  | Total Other Changes                               | 146,991           |  |
| 2024 Budget  |   | 2,241,973         |  |
| Summary of % Expense Increase  |   |                   |  |
|  | Increase in salaries                              | 3.4%              |  |
|  | 2024 IBC Expenses                                 | 3.7%              |  |
|  | 2024 Allocations                                  | 1.9%              |  |
|  | Legal Expenses                                    | 0.4%              |  |
|  | Balance of increase                               | 1.2%              |  |
|  | % expense increase from 2023:                     | 10.6%             |  |
|  | % Requisition increase from 2023 (if applicable): | 15.0%             | Requisition funding is 25.2% of service revenue                |
| Overall 2023 Budget Performance  |   |                   |  |
| (expected variance to budget and surplus treatment)  |   |                   |  |
| Revenues are projected at \$56,629 (2.8%) higher than budget primarily due to higher permit fee revenues driven by increased construction activity in Q1-2 2023. Operating expenditures are projected at \$89,603 (-4.4%) lower than budget primarily due to staff vacancies and lower equipment purchase expenses. The \$146,232 favourable variance will be transferred to the Operating Reserve Fund, which has an expected year end balance of \$529,573 before this transfer. |   |                   |  |

## Reserve Schedule

### Reserve Fund: 1.320 Noise Control - Operating Reserve Fund - Bylaw 4146

- Capital Regional District Operating Reserve Fund was established in 2016 under Bylaw No. 4146. The funds in this reserve shall be expended for unforeseen legal expense or other operating costs. Monies set aside shall be deposited under separate account in the bank and until required to be used may be invested in the manner provided by Section 364(2) of the Municipal Act.

## Reserve Cash Flow

### Assumptions/Background:

\*Interest should be included in determining the estimated ending balance for the current year. Interest in planning years nets against inflation which is not included.

# **CAPITAL REGIONAL DISTRICT**

## **2024 BUDGET**

### **Electoral Area Emergency Planning Coordination**

#### **EAC Review**

OCTOBER 2023

**Service:** 1.372 Emergency Planning Coordination

**Committee:** Planning, Transportation & Protective Services

**DEFINITION:**

No establishment bylaw. Service is provided by CRD staff for coordination of emergency operations for the CRD.

**SERVICE DESCRIPTION:**

This service provides support to a range of Protective Services responsibilities and to carry out the responsibilities legislated under the *Emergency Program Act*. Costs for staff are placed in this budget and allocated based on percentages to the other services, such as 911, hazmat, and emergency management.

**FUNDING:**

Allocations from protection services and requisition.

### Assumptions/Background:

ERF to fund future replacement of vehicles and equipment.

# **CAPITAL REGIONAL DISTRICT**

## **2024 Budget**

### **Admin Expenditures (SSI)**

#### **EAC Review**

OCTOBER 2023

**Service:** 1.111 SSI Admin. Expenditures

**Committee:** Electoral Area

**DEFINITION:**

To establish, according to Section 800 of the Local Government Act, a service to provide funding for electoral area administrative expenditures.

**SERVICE DESCRIPTION:**

Electoral area administration funding pays for part of EA director remuneration (amount that exceeds Municipal Director amount included in Board expense) and alternate, Corporate services administration, telecommunications, travel, electoral area office space and other contractual support costs as needed by director.

**PARTICIPATION:**

Electoral Area of Salt Spring Island

**MAXIMUM LEVY:**

None Stated

**FUNDING:**

Requisition and internal allocation

**Change in Budget 2023 to 2024**  
**Service: 1.111 SSI Admin**

**Total Expenditure**

**Comments**

**2023 Budget**

**1,161,470**

**Change in Salaries:**

|                                |         |   |
|--------------------------------|---------|---|
| Base salary and benefit change | 15,082  | Inclusive of estimated collective agreement changes |
| Step increase/paygrade change  | 9,761   |   |
| 1.0 FTE Engineering Technician | 121,254 | 1.0 FTE transferred in from SSI Parks               |
| Other                          | 164     |   |

**2024 Budget**

**1,373,862**

**Summary of % Expense Change**

|   |                  |  |
|---|------------------|--|
| 2024 Base salary and step increases                   | 2.1%             |  |
| 1.0 FTE addition                                      | 10.4%            |  |
| Standard Overhead and HR Allocations                  | 1.9%             |  |
| Internal allocation within SSI Admin                  | 4.8%             | Offsetting recovery allocation within SSI Admin budget |
| One-time 2023 LCC election costs                      | -6.0%            |  |
| Reserve transfers                                     | 5.2%             |  |
| Balance of change                                     | -0.1%            |  |
| % expense increase from 2023:                         | <b>18.3%</b>     |  |
| <br>% Requisition increase from 2023 (if applicable): | <br><b>10.0%</b> | <br>Requisition funding is 49.8% of service revenue    |

**Overall 2023 Budget Performance**

(expected variance to budget and surplus treatment)

*There is a one-time favourable variance of \$8,682 (0.7%) - \$300 LCC; \$446 Director; \$7,936 Management - mainly due to lower salaries and wages, staff training and travel expenses. This variance will be transferred to Equipment Replacement Funds, which have a collective expected year end balance of \$60,112 before these transfers.*

## **2024 Budget**

### **SSI Emergency Program**

#### **EAC Review**

OCTOBER 2023

**Service:**    1.371    SSI Emergency Program

**Committee:** Electoral Area

**DEFINITION:**

To provide an Emergency Program as an Extended Service in preparation for emergencies.

Establishment Bylaw No. 2084 (December 16, 1992). Bylaw No. 2094 (February 1993), establishes the mode of operation and administration of the program.

Bylaw No. 2204 (April 27, 1994) and Bylaw No. 2205 (April 27, 1994) repeal and replace Bylaws 2084 and 2094 respectively.

Bylaw No. 2486 (March 26, 1997) establishes guidelines for the operation and administration of the SSI Program and repeals Bylaw No. 2205.

Order in Council #287 provides the CRD with the same powers as a local authority under the Emergency Program Act.

**SERVICE DESCRIPTION:**

Governed by Bylaw #3446, this service provides planning and management of community disaster emergency response and recovery plans for the communities of Salt Spring Island Electoral Area. The service was started in 1992 in response to the *Provincial Emergency Program Act*.

The Planning and Protective Services department has administrative responsibility for the service and the Manager of Electoral Area Fire and Emergency Programs has immediate operational responsibility.

**PARTICIPATION:**

The service and participating area shall be coterminous with that of the Salt Spring Island Electoral Area.

**LEVY:**

The cost of providing the service established shall be recovered by requisition of money under Section 809.1 of the Municipal Act to be collected by a property value tax to be levied and collected under Section 810.1 of the Municipal Act.

**FUNDING:**

### Assumptions/Background:

# **CAPITAL REGIONAL DISTRICT**

## **2024 Budget**

### **Storm Water Quality Management (SSI)**

#### **EAC Review**

OCTOBER 2023

**Service:** 1.535 SSI Stormwater Quality Management

**Committee:** Electoral Area Services

**DEFINITION:**

To provide for the control of pollution in stormwater runoff from land. In Bylaw No. 2454 (adopted February, 1997 for the EA of Salt Spring Island) "stormwater runoff" includes seepage, overland flow and stormwater runoff within ditches, streams, rivers, ponds, lakes and other watercourses.

**SERVICE DESCRIPTION:**

The service provides a stormwater quality program in the Salt Spring Island Electoral Area to coordinate and provide information for management of stormwater quality and watershed protection.

**PARTICIPATION:**

The Electoral Area of the Salt Spring Island.

**MAXIMUM LEVY:**

Greater of \$34,365 or \$0.0078 / \$1,000 on actual assessed value of land and improvements. To a maximum of \$54,094.

**FUNDING:**

Requisition

# **CAPITAL REGIONAL DISTRICT**

## **2024 Budget**

### **Highland/Fernwood Water (SSI)**

#### **EAC Review**

OCTOBER 2023

**Service:** 2.621 Highland & Fernwood Water (SSI)

**Committee:** Electoral Area

**DEFINITION:**

To construct water works for the provision, supply, treatment, conveyance, storage and distribution of water for the Salt Spring Island Highland and Fernwood Water Service, Bylaw No. 3753 (April 13, 2011).

**PARTICIPATION:**

Local Service Area #63, 3(764)

**MAXIMUM LEVY:**

Greater of \$350,000 or \$2.572 / \$1,000 of actual assessed value of land and improvements. To a maximum of \$794,257.

**COMMISSION:**

Fernwood and Highland Water Service Commission - Bylaw 4371 (Dec. 09, 2020)

**FUNDING:**

**Parcel Tax:** Annual, levied only on all properties capable of being connected to the system.

**User Charge:** Annual Fixed Fee per single family dwelling unit or equivalent.  
The consumption charge for water will be the total volume of water metered to the water service connections, measured in cubic metres at the following rate:

- First 38 cubic metres or portion - \$0.64 / cubic metre
- Next 68 cubic metres or portion - \$2.00 / cubic metre
- Greater than 106 cubic metres - \$5.13 / cubic metre

**Water Connection Charge:** Actual cost for the connection.

**RESERVE FUND:**

Established by Bylaw #3907 (April 16, 2014)

**2.621 - Highland/Fernwood Water (SSI)**

| 21-05               | New                      | Water Main AC replacement detailed design  | Water Main AC replacement detailed design. Includes CRD project management.   | \$ 230,000                | S           | Debt           | \$ -         | \$ -         | \$ 230,000   | \$ -         | \$ -         | \$ -         | 230,000                       |
| 23-01               | New                      | Phased program of AC Water main replacement  | Engineering and construction of replacement/renewal of failing water main for high priority areas (\$1000/m over 5 years). Includes construction services and CRD project management.   | \$ 13,000,000             | S           | Debt           | \$ -         | \$ -         | \$ -         | \$ 2,665,000 | \$ 2,665,000 | \$ 2,665,000 | 7,995,000                     |
| 24-01               | New                      | Ferwood PS Hazard Assess and Demolition  | Assessment of hazard and demolition. Includes CRD project management.   | \$ 60,000                 | S           | Res            | \$ -         | \$ -         | \$ 60,000    | \$ -         | \$ -         | \$ -         | 60,000                        |
| 25-01               | New                      | Fence installation around storage reservoirs   | Install fencing around all reservoirs and WTP. Includes CRD project management.   | \$ 140,000                | S           | Debt           | \$ -         | \$ -         | \$ 140,000   | \$ -         | \$ -         | \$ -         | 140,000                       |
| 23-07               | Renewal                  | WTP SCADA Upgrades - WTP Communications and Control Upgrades   | To upgrade RTU programming software to Workbench. Replace the RTU and PLC controller due to age and criticality to current CRD I/O standards. At end of life for SCADAPAC 357e Series PLCs and add equipment feedback wiring to monitor valve position, motor speed etc. Includes CRD project management. | \$ 220,000                | S           | Debt           | \$ -         | \$ 220,000   | \$ -         | \$ -         | \$ -         | \$ -         | 220,000                       |
| 24-02               | New                      | Highlands Middle Reservoir Repair  | Install new manway in Reservoir, replace temporary piping with permanent, possible power line relocation.   | \$ 115,000                | S           | Debt           | \$ -         | \$ 100,000   |              | \$ -         | \$ -         | \$ -         | 100,000                       |
| 24-02               | New                      | Highlands Middle Reservoir Repair  | CRD Project Management  |                           | S           | Res            | \$ -         | \$ 15,000    | \$ -         | \$ -         | \$ -         | \$ -         | 15,000                        |
| 24-03               | New                      | WTP driveway improvements  | Gravel portion of driveway requires regular maintenance to provide safe access to buildings. Upgrade driveway to asphalt or concrete. Includes CRD project management.  | \$ 35,000                 | S           | Debt           | \$ -         | \$ 35,000    | \$ -         | \$ -         | \$ -         | \$ -         | 35,000                        |
| 24-04               | Replacement              | WTP Bring safety chain to specification.   | Removable chain requires replacement with a code compliant removable portion of pipe railing. Retrofit with removable railing. Includes CRD project management.   | \$ 13,000                 | S           | Res            | \$ -         | \$ 13,000    | \$ -         | \$ -         | \$ -         | \$ -         | 13,000                        |
| 24-05               | Replacement              | Fernwood Reservoir 1. Repair roof top railing and check for building code compliance and replace or repair | Code compliance/replacement and ladder enclosure and upper railing are rusting and require assessment. Includes CRD project management.   | \$ 15,500                 | S           | Res            | \$ -         | \$ 15,500    | \$ -         | \$ -         | \$ -         | \$ -         | 15,500                        |
| 24-06               | New                      | Critical Spares: Chlorine pump and coagulant pump  | Purchase spares. Includes CRD project management.   | \$ 12,000                 | S           | Res            | \$ -         | \$ 12,000    | \$ -         | \$ -         | \$ -         | \$ -         | 12,000                        |
| 24-07               | New                      | Install support for lifting apparatus over DAF system.   | Support for a lifting apparatus is required at ceiling level to lift the 80lb lid for the Saturator as well as for confined space entry apparatus.  | \$ 65,000                 | S           | Debt           | \$ -         | \$ 55,000    | \$ -         | \$ -         | \$ -         | \$ -         | 55,000                        |

Capital Project Title

Referendum or Alternative Approval  
Process - Funding for Future Projects

Capital Project Description

Undertake a referendum or AAP to borrow funds to carry out the intake, DAF, back up power and upper reservoir projects.

Project Rationale Undertake a referendum or AAP to borrow funds to carry out the intake, back up power and upper reservoir projects.

Project Number

21-01

Capital Project Title

Public Engagement for Future Projects

Capital Project Description

Public engagement for the intake, DAF, back up power and upper reservoir projects.

Project Rationale Public engagement for the intake and upper reservoir projects.

Project Number

22-01

Capital Project Title

Back up Power

Capital Project Description

Design and Construction of back up power system. Includes CRD project management.

Project Rationale Design and construction of a backup power system needed in the event of a power failure to continue to provide water to the community.

Project Number

21-03

Capital Project Title

Highland Upper Reservoir Replacement

Capital Project Description

Construction to replace existing leaking upper reservoir. Includes CRD project management.

Project Rationale Upper reservoir is leaking and wasting water. Needs to be replaced.

## **2024 Budget**

### **Cedars of Tuam Water (SSI)**

#### **EAC Review**

OCTOBER 2023

**Service:** 2.622 Cedars of Tuam Water (SSI)

**Committee:** Electoral Area

**DEFINITION:**

To provide and operate water supply and distribution facilities for the Salt Spring Island Cedars of Tuam Water System Service Area.  
Bylaw No. 3021 (October 9, 2002).

**PARTICIPATION:**

Local Service Area #45, T(764).

**MAXIMUM LEVY:**

Greater of \$25,425 or \$6.75 / \$1,000 of actual assessed value of land and improvements. To a maximum of \$114,177.

**COMMISSION:**

Cedars of Tuam Water Service Commission established by bylaw No 3693 (April 14th, 2010).

**FUNDING:**

**User Charge**

- Annual Fixed Fee per per single family dwelling unit or equivalent plus consumption charge
- The consumption charge for water will be the total volume of water metered to the water service connections, measured in cubic meters at the following rate:
  - First 38 cubic metres or portion - \$7.00 / cubic metre
  - Greater than 38 cubic metres - \$18.00 / cubic metre

**Water Connection Charge**

- Actual cost for the connection.

**RESERVE FUND:**

Fund 1057, established by Bylaw #3136 (June 14, 2004); amended by Bylaw 3948 (April 16, 2014).

## **2024 Budget**

### **Beddis Water**

#### **EAC Review**

OCTOBER 2023

Service: **2.624 Beddis Water (SSI)**

Committee: **Electoral Area**

**DEFINITION:**

To provide and operate water supply and distribution facilities for the Salt Spring Island Beddis Water System Service Area.  
Bylaw No. 3188 (November 24, 2004).

**PARTICIPATION:**

Order in Council No 176, February 24, 2005.

**MAXIMUM LEVY:**

Greater of \$133,000 or \$2.71 / \$1,000 of actual assessed value of land and improvements. To a maximum of \$440,091.

**MAXIMUM CAPITAL DEBT:**

|  |          |             |       |
|--|----------|-------------|-------|
| Beddis Waterworks 1994 previous debt paid out 2011     | \$95,909 |             |       |
| AUTHORIZED: LA Bylaw No. 3193 (November 24, 2004)      |          | \$325,500   |       |
| BORROWED: SI Bylaw No. 3291                            |          | (\$325,500) | 1.80% |
| Remaining:   |          | \$0         |       |
| AUTHORIZED: LA Bylaw No. 3825 (July 11, 2012)          |          | \$400,000   |       |
| BORROWED: SI Bylaw No. 3882 (Jan 9, 2013) Matures 2023 |          | (\$300,000) | 3.15% |
| BORROWED: SI Bylaw No. 3910 (July 2013) Matures 2023   |          | (\$70,000)  | 3.85% |
| Remaining:   |          | \$30,000    |       |

**COMMISSION:**

Beddis Water Service Commission established by Bylaw No. 3693 (April 14th, 2010)

**FUNDING:**

Any deficiencies after user charge and/or frontage tax or parcel tax to be levied on taxable school assessments, excluding property that is taxable for school purposes by Special Act.

|                                 |   |
|---------------------------------|---|
| <b>User Charge:</b>             | Fixed user charge + variable consumption charge to all metered properties.  |
| <b>Parcel Tax:</b>              | Annual, only on properties capable of being connected to the system, starting 2006.   |
| <b>User Charge:</b>             | <ul style="list-style-type: none"><li>- Annual Fixed Fee per per single family dwelling unit or equivalent.</li><li>- The consumption charge for water will be the total volume of water metered to the water service connections, measured in cubic meters at the following rate:<ul style="list-style-type: none"><li>• First 38 cubic metres or portion - \$3.10 / cubic metre</li><li>• Next 68 cubic metres or portion - \$6.30 / cubic metre</li><li>• Greater than 106 cubic metres - \$8.50 / cubic metre</li></ul></li></ul> |
| <b>Water Connection Charge:</b> | The connection charge for a service shall be the actual cost for the connection.  |

**RESERVE FUND:**

Fund 1069, established by Bylaw # 3274 (April 27, 2005)

# **CAPITAL REGIONAL DISTRICT**

## **2024 Budget**

### **Cedar Lane Water (SSI)**

#### **EAC Review**

OCTOBER 2023

Service: 2.628 Cedar Lane Water (SSI)

Committee: Electoral Area

**DEFINITION:**

To provide and operate water supply and distribution facilities for the Salt Spring Island Cedar Lane Water Service Area.  
Bylaw 3424 (Oct 10, 2007)

**PARTICIPATION:**

Local Service Area #31, P(764)

**MAXIMUM LEVY:**

Greater of \$54,000 or \$4.76/ \$1,000 of actual assessed value of land and improvements to a maximum of \$153,241.

**MAXIMUM CAPITAL DEBT:**

|             |                                  |             |
|-------------|----------------------------------|-------------|
| Authorized: | LA Bylaw No. 3425 (Oct 10, 2007) | \$168,000   |
| Borrowed:   | SI Bylaw 3514 (Feb 13, 2008)     | (\$60,000)  |
|             | SI Bylaw 3634 (Aug 12, 2009)     | (\$108,000) |
| Remaining:  |                                  | <u>\$0</u>  |

**COMMISSION:**

Cedar Lane Water Service Commission established by Bylaw 3505, Feb 13, 2008.

**FUNDING:**

**Parcel Tax:** Annual charge only on properties capable of being connected to the system.

**User Charge:** Annual Fixed Fee per single family dwelling unit or equivalent.  
The consumption charge for water will be the total volume of water metered to the water service connections, measured in cubic meters at the following rate:

- First 30 cubic metres or portion - \$2.50 / cubic metre
- Next 30 cubic metres or portion - \$9.00 / cubic metre
- Greater than 61 cubic metres - \$25.00 / cubic metre

**RESERVE FUND BYLAW:**

Cedar Lane Water Service Capital Reserve Fund, Bylaw #3582 (Nov 12, 2008).  
Cedar Lane Water Service Operating Reserve Fund, Bylaw #4144 (Dec 14, 2016).

Cedar Lane Water (SSI)

|                   |  |                       |                      |                             |                    |
|-------------------|--|-----------------------|----------------------|-----------------------------|--------------------|
| Project Number    | 18-01  | Capital Project Title | Abandon unused wells | Capital Project Description | Decommission wells |
| Project Rationale | The original system drilled five wells, and two (well #1 and #5) are in production and operate separately. Wells that are no longer in use must be closed to avoid potential future aquifer contamination. Abandoning a well must be in accordance with Groundwater Protection Regulations |                       |                      |                             |                    |

|                   |  |                       |  |                             |  |
|-------------------|--|-----------------------|--|-----------------------------|--|
| Project Number    | 21-01  | Capital Project Title | Power generation equipment design and construction | Capital Project Description | Design of back up power generation for WWTP and Pump stations. |
| Project Rationale | Design and construction of back up power generation for WWTP and Pump stations to maintain potable water service during power outages. |                       |  |                             |  |

|                   |  |                       |   |                             |  |
|-------------------|--|-----------------------|---|-----------------------------|--|
| Project Number    | 23-01  | Capital Project Title | Investigation for new groundwater sources | Capital Project Description | Conduct study and site investigation to identify groundwater sources and new well location. Includes CRD project management. |
| Project Rationale | Conduct study and site investigation to identify groundwater sources and new well location as the current wells are depleting. In the SAMP of April 2020 by McElhanney Consulting Services Ltd. It was noted that a new well will be required in the next 1 to 5 years at a cost of \$60K. |                       |   |                             |  |

|                   |  |                       |                                     |                             |   |
|-------------------|--|-----------------------|-------------------------------------|-----------------------------|---|
| Project Number    | 21-03  | Capital Project Title | Detailed Hydrogeological Assessment | Capital Project Description | Conduct a detailed hydrogeological assessment of the Cedar Lane water system. |
| Project Rationale | Detailed study of groundwater source, state of the aquifer, ground water balance and potential risks and concerns are required to support a sustainable groundwater supply for the residents of the Cedar Lane Water Service Area. Note that approval for a CWF grant was obtained on August 10th, 2020. |                       |                                     |                             |   |

Cedar Lane Water (SSI)

**Project Number** 21-06

**Capital Project Title**

WTP Manganese treatment construction / chlorine exhaust

**Capital Project Description**

Construct and install manganese removal system and exhaust in chlorine room. Includes construction management and CRD project management.

**Project Rationale** Health Canada has changed manganese limits. Maximum acceptable concentration (MAC) for total manganese in drinking water is 0.12 mg/L (120 µg/L). Cedar Lane water testing results can exceed this threshold value and sometimes double. There is some urgency to get this done as it is a potential health issue. SSI Engineering intends to get the design done (by third party consultant) in the last half of 2022.

**Project Number**

24-02

**Capital Project Title**

WTP provide spare pressure pump and sub-drive unit

**Capital Project Description**

WTP provide spare pressure pump and sub-drive unit. Includes CRD project management.

**Project Rationale**

**Other Changes:**

|  |         |  |
|--|---------|--|
| Standard OH Allocations                  | 5,024   | Increase in 2023 operating costs               |
| Sludge Hauling Contracts                 | 23,020  | Increase in sludge hauling costs               |
| Screenings, Grit & Waste Sludge Disposal | 4,490   | Increase in sludge disposal costs              |
| IWS Labour Allocation                    | 32,850  | Increase in IWS operations labour charge costs |
| MFA Debt Servicing Costs                 | 11,333  | \$1,007,500 new borrowings planned in 2024     |
| Transfer to ORF                          | (7,000) | \$7,000 reduction in transfer to ORF           |
| Other                                    | 7,660   |  |
| Total Other Changes                      | 77,377  |  |

**2024 Budget**

**1,264,781**

**Summary of % Expense Increase**

|                               |      |
|-------------------------------|------|
| IWS Labour Allocation         | 2.8% |
| Sludge Hauling Contracts      | 1.9% |
| MFA Debt Servicing Costs      | 1.0% |
| Balance of increase           | 0.9% |
| % expense increase from 2023: | 6.5% |

% Requisition increase from 2023 (if applicable):

3.5%

Requisition funding is 4.9% of service revenue

**Overall 2023 Budget Performance**

(expected variance to budget and surplus treatment)

There is an estimated one-time unfavorable variance of \$20,492(1.7%) mainly due to repairs and maintenance for emergency response, waste sludge disposal and hauling costs. This variance will be covered by Operating Reserve Fund, which has an expected year end balance of \$141,833 before this transfer.

### Assumptions/Background:

Membrane replacement at \$500K every 10 years, anticipated next replacement in 2030.

# **CAPITAL REGIONAL DISTRICT**

## **2024 Budget**

### **Maliview Sewer Utility (SSI)**

#### **EAC Review**

OCTOBER 2023

**Service:**     **3.820 Maliview Sewer Utility (SSI)**

**Committee: Electoral Area**

**DEFINITION:**

To operate and maintain a sewage collection and disposal system for the Maliview Estates Sewage Collection and disposal System Specified Area on Salt Spring Island (Local Service Establishment Bylaw No. 1938, October 23, 1991)

**PARTICIPATION:**

Maliview Estates - G(764) LSA#12

**MAXIMUM LEVY:**

Greater of **\$20,000** or **\$2.50 / \$1,000** on actual assessed value of land and improvements. To a maximum of **\$175,295**.

**MAXIMUM CAPITAL DEBT:**

|             |                           |                                 |

### **SSI Public Library**

#### **Local Community Commission (LCC) Review**

OCTOBER 2023

Service: 1.141 SSI Public Library

Committee: Electoral Area

**DEFINITION:**

To establish a service for the purpose of contributing to the cost of maintaining, equipping and operating the Salt Spring Island Public Library service by Bylaw No. 2725 adopted November 1999 and amended December 2009.

**SERVICE DESCRIPTION:**

This service makes an annual contribution to the Salt Spring Island Public Library Association to provide public library service for Salt Spring Island Electoral Area. In recent years in response to a drive for a new library, the CRD has passed loan authorization bylaws – one for the purchase of land (2006), the other for construction of a building (2009). Both transactions are supported by referendums. SSI Library was grandfathered in being allowed to own its own library, but under provincial legislation cannot build or acquire a new building. The new library building construction, completed in 2013, is owned by the CRD, and was funded two thirds by federal/provincial infrastructure grants.

**PARTICIPATION:**

The Electoral Area of Salt Spring Island.

**MAXIMUM LEVY:**

Greater of \$600,000 or \$0.186 / \$1,000 of actual assessed value of land and improvements. To a maximum of \$1,289,114.

**MAXIMUM CAPITAL DEBT:**

| Summary of % Expense Change                           |                   |   |
| 2024 contribution to SSI Public Library Association   | 6.9%              |   |
| Balance of change                                     | 0.6%              |   |
| % expense increase from 2023:                         | 7.5%              |   |
| % Requisition increase from 2023 (if applicable):     | 7.5%              | Requisition funding is 99.8% of service revenue                           |

**Overall 2023 Budget Performance**  
(expected variance to budget and surplus treatment)

There is an estimated one-time favourable variance of \$780 (0.1%) mainly due to lower repairs and maintenance expenses. This variance will be moved to Capital Reserve, which has an expected year end balance of \$73,100 before this transfer.

## Reserve Schedule

### Reserve Fund: 1.141 SSI Public Library - Capital Reserve Fund - Bylaw 3940

-Capital Reserve Fund for SSI Library was established in 2014 under Bylaw No. 3940.  
 -Surplus monies from the operation of the service may be paid from time to time into the reserve fund.  
 -Monies in the reserve fund will be used to provide for new capital works and extension or renewal of existing capital works, including the planning, study, design, construction of facilities, land acquisition, as well as machinery or equipment necessary for capital works and related debt servicing payments.

## **2024 Budget**

### **Fernwood Dock (SSI)**

#### **EAC Review**

OCTOBER 2023

**Service:**    1.236    SSI Small Craft Harbour (Fernwood Dock)

**Committee:** Salt Spring Island Parks & Recreation

**DEFINITION:**

A local service area to establish, acquire and operate a service of small craft harbour facilities.  
Bylaw No. 3030, November 27, 2002.

**SERVICE DESCRIPTION:**

This is a service for funding and operating the Fernwood Dock, a small craft harbour facility on Salt Spring Island. This dock was divested to the CRD from the Department of Transportation in 2002. The Federal Government provided one-time funding of approximately \$280,000 for dock rehabilitation. This service is administered by the Salt Spring Island Parks and Recreation Commission.

**PARTICIPATION:**

Salt Spring Island Electoral Area.

**MAXIMUM LEVY:**

Greater of \$162,800 or \$0.05 / \$1,000 on hospital assessments for the Electoral Area of Salt Spring Island. To a maximum of \$346,536.

**COMMISSION:**

Fernwood Dock Management Commission (Bylaw # 3030, Nov 2002, Amendment Bylaw # 3762, Feb 2011).  
Salt Spring Island Parks and Recreation Commission (Bylaw #4293 No.1, 2019)

**FUNDING:**

Parcel Tax

## **2024 Budget**

### **Salt Spring Island Arts**

#### **Local Community Commission (LCC) Review**

OCTOBER 2023

**Service:** 1.299 SSI Arts

**Committee:** Electoral Area

**DEFINITION:**

To establish a service for the purpose of contributing to the cost of maintaining, equipping and operating the ArtSpring Theatre and contributing to arts programming through the Gulf Islands Community Arts Council (Bylaw No. 3116, January 29, 2004).

**SERVICE DESCRIPTION:**

This is a service for the contribution to the operation of the ArtSpring Theatre and the arts programs on Salt Spring Island. ArtSpring Theatre is operated by the Island Arts Centre Society. The arts programs are run by the Gulf Islands Community Arts Council. The CRD owns the land that the ArtSpring Theatre is situated on and there is a 10 year license of occupation with the Island Arts Society. Funds provided to ArtSpring Theatre are for maintaining, equipping and operating the facility. Funds provided to the Community Arts Council are for arts programming.

**PARTICIPATION:**

Electoral Area of Salt Spring Island

**MAXIMUM LEVY:**

Greater of \$93,050 or \$0.031 / \$1,000 of actual assessed value of land and improvements. To a maximum of \$214,852.

**FUNDING:**

Requisition

# **CAPITAL REGIONAL DISTRICT**

## **2024 Budget**

### **SSI Search and Rescue**

#### **Local Community Commission (LCC) Review**

OCTOBER 2023

**Service:** 1.378 SSI Search and Rescue

**Committee:** Electoral Area

**DEFINITION:**

To establish a contribution to a search and rescue service in the Salt Spring Island Electoral Area.  
Establishment Bylaw No. 3494 (Nov. 14, 2007).

**SERVICE DESCRIPTION:**

Governed by Bylaw #3494, the service provides cost coverage for overhead expenses for the Salt Spring Island Search and Rescue Society.

The CRD has no operational responsibility beyond payment for overhead.

**PARTICIPATION:**

The Electoral Area of Salt Spring Island

**MAXIMUM LEVY:**

Greater of \$15,000 or \$0.0053 / \$1,000 on actual assessed value of land and improvements. To a maximum of \$36,733.

**FUNDING:**

Requisition

### **Salt Spring Island - Community Recreation**

#### **Local Community Commission (LCC) Review**

OCTOBER 2023

**Service:** 1.458 SSI Community Recreation

**Committee:** Salt Spring Island Parks & Recreation

**DEFINITION:**

Supplementary Letters Patent, Division XV, October 3, 1975 established to provide recreational programs for any Electoral Area.  
Bylaw No. 462 (March 8, 1978) to add Salt Spring Island as a participant.

**SERVICE DESCRIPTION:**

This is a service for the provision of recreation programs and day camps for youth on Salt Spring Island.

**PARTICIPATION:**

Electoral Area of Salt Spring Island

**MAXIMUM LEVY:**

Greater of \$262,436 or \$0.079 / \$1,000 on actual assessed value of land and improvements. To a maximum of \$547,527.

**MAXIMUM CAPITAL DEBT:**

N/A

**COMMISSION:**

Salt Spring Island Parks and Recreation Advisory Commission  
Continuation Bylaw #3763 (May 2011), an advisory commission for Parks and Recreation in the Salt Spring Island Electoral Area.  
Original established by Bylaw (Bylaw No. 327 - January 12, 1977).

**FUNDING:**

**Change in Budget 2023 to 2024**  
**Service: 1.458 SSI Recreation**

**Comments**

**2023 Budget** **285,642**

**Change in Salaries:**

|   |          |   |
|---|----------|---|
| 0.6 FTE: Rec program assistant          | 53,832   | 2024 IBC 16b-1.1 SSI Parks Recreation SIMS Staffing       |
| 0.175 FTE: Rec coordinator              | 15,081   | 0.175 FTE transferred in from Parkland budget (1.459)     |
| Wages and benefits - Daycamp (on-going) | (15,000) | Summer day camp supervisor under regular salaries in 2024 |
| Other                                   | (2,214)  | Reduction in aux wages                                    |
| Total Change in Salaries                | 51,699   |   |

**Other Changes:**

|                           |        |   |
|---------------------------|--------|---|
| Rec Centre Programs costs | 33,585 | Increase in service level (recreation programs) |
| Staff training & develop  | 1,240  | increase in staff training costs                |
| Standard OH Allocation    | 1,042  | Increase in 2023 expenses                       |
| HR Allocation             | 1,829  | Increase in allocation from HR                  |
| Reserve Transfer          | 5,000  | \$5,000 increase to ORF transfer                |
| Other                     | 1,665  |   |
| Total Other Changes       | 44,361 |   |

**2024 Budget** **381,702**

**Summary of % Expense Change**

|                               |       |
|-------------------------------|-------|
| 2024 IBC Costs                | 18.8% |
| Rec centre & day camps        | 11.8% |
| OH & HR allocations           | 1.0%  |
| Reserve transfer              | 1.8%  |
| Balance of change             | 0.3%  |
| % expense increase from 2023: | 33.6% |

% Requisition increase from 2023 (if applicable): 43.5% Requisition funding is 28.8% of service revenue

**Overall 2023 Budget Performance**  
(expected variance to budget and surplus treatment)

Revenues are projected at \$44,881 (15.7%) higher than budget mainly due to higher tennis court and day camp program fees, grants and donations. Operating costs are projected at \$49,881 (17.5%) higher than budget mainly due to higher auxiliary wages and benefits and recreation program expenses. Therefore, there is an estimated one-time unfavourable variance of \$5,000 (1.8%). This variance will be carried over to 2024 budget.

## **2024 Budget**

### **Salt Spring Island - Pool & Park Land**

#### **Local Community Commission (LLC) Review**

OCTOBER 2023

**Service:** 1.459 SSI Pool & Park Land

**Committee:** Salt Spring Island Parks & Recreation

**DEFINITION:**

A specified area established in 1972 to provide parks, recreation and related community programs, equipment, facilities and acquisition of real property. Bylaw No. 91(February 23, 1972). Since repealed, Bylaw No. 2422 (1996) and Bylaw No. 3183 (2004). Bylaw 4002 (2015) repeals bylaw 2422 and 3206.

**SERVICE DESCRIPTION:**

This is a service for the provision of general administrative services, water access points, active parks (playing fields) and overseeing facility upgrades, leisure brochures for Salt Spring Island.

**PARTICIPATION:**

Electoral Area of Salt Spring Island

**MAXIMUM LEVY:**

Greater of \$1,896,612 or \$0.6325 / \$1,000 on actual assessed value of land and improvements. To a maximum of \$4,383,681.

**MAXIMUM CAPITAL DEBT:**

N/A

**COMMISSION:**

Salt Spring Island Parks and Recreation Advisory Commission  
Continuation Bylaw #3763 (May 2011), an advisory commission for Parks and Recreation in the Salt Spring Island Electoral Area.  
Original established by Bylaw (Bylaw No. 327 - January 12, 1977).

**FUNDING:**

Requisition

**Change in Budget 2023 to 2024 Service:**

**Summary of % Expense Change**

Pool - Regular salaries increase

3.8%

Pool - Programs and supplies costs

0.9%

Pool - Transfer to reserves

2.2%

Park Land - Transfer to reserves

-0.3%

Park Land - Utilities/Rent/Contracts/Education/Supplies

3.8%

Park Land - SSI EA Admin allocations (Admin & Engineering support)

3.5%

Balance of change

-0.4%

% expense increase from 2023:

**13.5%**

% Requisition increase from 2023 (if applicable):

**19.1%**

Requisition funding is 81.1% of service revenue

**Overall 2023 Budget Performance**

(expected variance to budget and surplus treatment)

*Pool: expenses are projected to be \$45,067 (4.8%) over the budget mainly due to higher salaries & wages, contract for services and program development charges. Revenue is projected to \$12,190 (1.2%) over the budget mainly due to higher pool fees revenue. These result in projected one-time unfavorable variance of \$36,877 (3.7%) which will be carried over to 2024 budget. Park land: expenses are projected to be \$54,573 (4.9%) over the budget mainly due to higher repairs & maintenance costs, contract for services, rents and parks maintenance labour charges. Revenue is projected to \$31,257 (2.8%) over the budget mainly due to higher lease income. These result in projected one-time unfavorable variance of \$23,316 (2.1%) which will be carried over to 2024 budget. Combined: There is a one-time unfavorable variance of \$60,193 (2.8%) which will be carried over to 2024 budget.*

# **CAPITAL REGIONAL DISTRICT**

## **2024 Budget**

### **SSI Septage/Composting**

#### **Local Community Commission (LCC) Review**

OCTOBER 2023

**Service:**     **3.705 SSI Liquid Waste Disposal**

**Committee: Electoral Area**

**DEFINITION:**

To provide, operate, collect, treat and dispose of septage and sewage sludge and co-compost septage and sewage sludge with wood waste for the local service area on Salt Spring Island under Bylaw No. 2118 (April 1993).

**PARTICIPATION:**

The additional local service area is co-terminus with the boundaries of the electoral area of Salt Spring Island.  
The electoral area of Salt Spring Island is the only participating area for this additional local service.

**MAXIMUM LEVY:**

Greater of \$126,650 or \$0.10 / \$1,000 on actual assessments for land and improvements. To a maximum of \$693,072.

**COMMISSION:**

Salt Spring Island Local Community Commission (SSI LCC)

**FUNDING:**

|                           |   |
|---------------------------|---|
| <b>Parcel Tax:</b>        | Annual, levied on all properties in the Electoral Area      |
| <b>Tipping Fee:</b>       | \$0.455 per imperial gallon (Bylaw No. 4470, November 2021) |
| <b>Connection Charge:</b> | N/A   |

**RESERVE FUND:**

Bylaw No. 2274 (Feb 22, 1995)

**Change in Budget 2023 to 2024****Service: 3.705 SSI Septage/Composting****Total Expenditure****Comments****2023 Budget****1,028,430****Other Changes:**

|  |         |  |

**2024 Budget****1,150,132****Summary of % Expense**

|                                      |              |
|--------------------------------------|--------------|
| Increased sludge disposal costs      | 10.2%        |
| IWS Labour Allocation                | 1.4%         |
| Increased reserve transfers          | 0.2%         |
| Balance of increase                  | 0.1%         |
| <b>% expense increase from 2023:</b> | <b>11.8%</b> |

*% Requisition increase from 2023 (if applicable):***9.4%***Requisition funding is 35.9% of service revenue***Overall 2023 Budget Performance**

(expected variance to budget and surplus treatment)

*Revenue is projected at \$5,250 (0.8%) higher than budget due to higher than expected revenue from tipping fees. Operating expenses are projected at \$1,088 (0.1%) lower than budget mainly due to lower maintenance and labour charges. The \$6,338 favourable variance will be transferred to the Capital Reserve Fund, which has an expected year end balance of \$125,334 before this transfer.*

### Assumptions/Background:

Budgeted transfers to reserve will provide funding for elections every 4 years

\* Interest is included in determining the estimated ending balance for the current year. Interest in planning years nets against inflation which is not included.

### **UBCM**

### **EAC Review**

OCTOBER 2023

**Service:** 1.104 Union of B.C. Municipalities

**Committee:** Electoral Area

**DEFINITION:**

To provide for membership dues and convention expenses. Section 787 (b) - SLP - February 1, 1966.

**PARTICIPATION:**

All electoral areas and those municipalities not maintaining their own membership (currently electoral areas only) on the basis of converted hospital assessed value of land and improvements.

**MAXIMUM LEVY:**

No limit

**FUNDING:**

Requisition

**GENERAL INFORMATION:**

Association of Vancouver Island and Coastal Communities (AVICC)

Commencing 1982 costs relating to AVICC, which are incurred solely on behalf of the electoral areas, are included in the UBCM budget rather than Legislative and General Government.

## **2024 Budget**

### **Building Inspection**

#### **EAC Review**

OCTOBER 2023

**Service:** 1.318 Building Inspection

**Committee:** Electoral Area

**DEFINITION:**

To carry out the Building Regulations function as specified by Section 818 of the Local Government Act (Letters Patent - January 1, 1970).

**SERVICE DESCRIPTION:**

The building inspection department provides building inspection services to homeowners, builders and contractors in compliance with both the BC Building Code and CRD Building Bylaw 3741 (2010), Amendment 3780 (2011), and Amendment 4403 (2021). The Building inspection service includes receiving, reviewing and advising on building permit applications, processing of the applications including code analysis and referrals to other agencies, issuing building permits and verifying conditional requirements, arranging and carrying out site and construction inspections and granting final approval for occupancy. Staff also provides inspection services to other CRD departments on a cost recovery basis.

**PARTICIPATION:**

All Electoral Areas on the basis of their value of converted hospital assessments.

**MAXIMUM LEVY:**

Not stated.

**FUNDING:**

Fees and charges and requisition to all Electoral Areas

**Overall 2023 Budget Performance**  
(expected variance to budget and surplus treatment)

Revenues are projected at \$56,629 (2.8%) higher than budget primarily due to higher permit fee revenues driven by increased construction activity in Q1-2 2023. Operating expenditures are projected at \$89,603 (-4.4%) lower than budget primarily due to staff vacancies and lower equipment purchase expenses. The \$146,232 favourable variance will be transferred to the Operating Reserve Fund, which has an expected year end balance of \$529,573 before this transfer.

**1.318 - Building Inspection**

# **CAPITAL REGIONAL DISTRICT**

## **2024 BUDGET**

### **Noise Control**

#### **EAC Review**

CCTOBER 2023

**Service:**    1.320    Noise Control

**Committee:** Electoral Area

**DEFINITION:**

To provide noise control to member electoral areas of the Capital Regional District (Letter Patent - September 3, 1981; amended January 18, 1984; Supplementary Letters Patent - January 22, 1987). This function is performed by Bylaw officers from the CRD's Langford and Salt Spring Island offices.

**SERVICE DESCRIPTION:**

Administration and enforcement of the Noise Bylaws for the three Electoral Areas.

**PARTICIPATION:**

All Electoral Areas, based on converted hospital assessments.

**MAXIMUM LEVY:**

\$ 0.50 / \$1,000

Total such functions of 1.320 (Noise Control) and 1.322 (Nuisance & Unsightly Premises) not to exceed \$1.00 / \$1,000 overall.

**MAXIMUM CAPITAL DEBT:**

Nil

**COMMISSION:**

**FUNDING:**

## Reserve Schedule

### Reserve Fund: 1.320 Noise Control - Operating Reserve Fund - Bylaw 4146

- Capital Regional District Operating Reserve Fund was established in 2016 under Bylaw No. 4146. The funds in this reserve shall be expended for unforeseen legal expense or other operating costs. Monies set aside shall be deposited under separate account in the bank and until required to be used may be invested in the manner provided by Section 364(2) of the Municipal Act.

## Reserve Cash Flow

## **2024 BUDGET**

### **Nuisance & Unsightly Premises**

#### **EAC Review**

OCTOBER 2023

**Service:** 1.322 Nuisance & Unsightly Premises

**Committee:** Electoral Area

**DEFINITION:**

To provide regulation of nuisances and unsightly premises to the participating electoral areas (Letters Patent - May 19, 1977). This function is performed by Bylaw Officers from the CRD's Langford and Salt Spring Island offices.

**SERVICE DESCRIPTION:**

Enforce the Nuisance and Unsightly Premises Bylaw for the three Electoral Areas as in accordance with procedures and provisions of the Local Government Act.

**PARTICIPATION:**

All Electoral Areas, based on converted hospital assessments.

**MAXIMUM LEVY:**

\$ 0.50 / \$1,000

Total such functions of 1.320 (Noise Control) and 1.322 (Nuisance & Unsightly Premises) not to exceed \$1.00 / \$1,000 overall.

**FUNDING:**

### Assumptions/Background:

\*Interest should be included in determining the estimated ending balance for the current year. Interest in planning years nets against inflation which is not included.

# **CAPITAL REGIONAL DISTRICT**

## **2024 BUDGET**

### **Electoral Area Emergency Planning Coordination**

#### **EAC Review**

OCTOBER 2023

**Service:** 1.372 Emergency Planning Coordination

**Committee:** Planning, Transportation & Protective Services

**DEFINITION:**

No establishment bylaw. Service is provided by CRD staff for coordination of emergency operations for the CRD.

**SERVICE DESCRIPTION:**

This service provides support to a range of Protective Services responsibilities and to carry out the responsibilities legislated under the *Emergency Program Act*. Costs for staff are placed in this budget and allocated based on percentages to the other services, such as 911, hazmat, and emergency management.

**FUNDING:**

Allocations from protection services and requisition.
