Dear Juan de Fuca Water Distribution Commission:

We support bringing a municipal water supply line down Finney Road from Luxton to Sooke Road for the purpose of the Mews farming their lands, as well as for the future water needs of connected residents, businesses, or industries. Of note, we have had discussions with the city of Langford about developing our 2 acre parcel of land at 1120 Finney Road, which will require access to water service. We are willing to work collaboratively with our neighbors, the city of Langford and the CRD to achieve this.

Also, neighboring farm Lohbrunner has one water line that splits into 2 each with a separate meter - one to the house and the second to the field, and we would like to explore a similar situation. As we are farming our lands at 1110 Finney Road, we are requesting information about installing an agricultural meter separate from our homes.

Regards,

Corinne & Doug Popadynech
