

Making a difference...together

## Vehicle Wash Interceptor Maintenance Log

**Dimensions of Vehicle Wash Interceptor** (keep sheets for each interceptor on site)

**Length, width, wetted height** \_\_\_\_\_

**Volume (cubic metres)** \_\_\_\_\_

see note below for calculations

<b>Interceptor Inspections</b>												
	January			February			March			April		
Floating material (cm)												
Sludge (cm)												
Date of inspection												
Initials												
	May			June			July			August		
Floating material (cm)												
Sludge (cm)												
Date of inspection												
Initials												
	September			October			November			December		
Floating material (cm)												
Sludge (cm)												
Date of inspection												
Initials												
<b>Inspect and record results of all three chambers</b> <b>CLEAN-OUT WITHIN 7 DAYS if floating material (oils and grease) exceeds 2.5 cm (one inch) or 5% of wetted height OR the amount of solids exceeds 50% of wetted height</b> <b>Immediately take corrective action if there is evidence of petroleum bypass OR interceptor malfunction</b>												
<b>Interceptor Clean-Out</b>												
Date of clean-out												
Type* of material removed												
Quantity of material removed												
Contractor												
*oil, solids or all												
<b>Interceptor must be cleaned out at least once every twelve months</b> <b>Keep records of the name, address and phone number of each disposal or recycling company that you engage</b>												

Note:

Length (cm) x width (cm) x wetted height (cm) x 0.000001 = cubic metres

Length (in) x width (in) x wetted height (in) x 0.0000164 = cubic metres
