

Fulford Water Service

WATER CONSERVATION NOTICE

While our lake level is currently normal, that can quickly change with hotter, drier conditions. In order to preserve an adequate water supply, we all need to do our part to conserve the community's water supply. Every drop counts!

Residents are encouraged to adopt the following Water Conservation practices:

- Ensure water service is shut-off when property is uninhabited for a period of time.
- Limited watering of trees, shrubs and vegetables with container, hose with shut-off valve, or micro-irrigation system.
- No washing of outdoor surfaces such as driveways, sidewalks and decks.
- Wash vehicles and boats with a container or hose with shut-off valve.
